*Amber Cove* - L. Dawn Adams 2002-08

Maria came to the states to escape the poverty of her village in Puerto Rica, and eventually went to work on the beautiful estate of Amber Cove, never dreaming she would someday become mistress of it. Her first marriage to Carlos was a marriage made in heaven and their baby daughter (Heather) only added to their happiness. However before Heather was two, Carlos was killed. Due to necessity, Maria eventually married the Amber's son, Patrick and had another daughter Danielle. The marriage went from bad to worse and ended in divorce. However Patrick and Maria shared one important desire and that was to keep Amber Cove in the family for generations to come, so he supported them lavishly. Through trials and tribulations and even a terrible accident, which altered Maria and her daughter's lives forever, they managed to remain faithful to their fondest wish. Today Amber Cove remains in the family and the beloved house still rings with the laughter of children.

How To Rope A Savage Cowboy - Anya Summers 2022-03-01

Lincoln is floundering. He did something undeniably stupid. On an evening out with his best buddies in Vegas, he hooked up with a smoking hot female for a torrid, all night escapade. It was one of the most carnal experiences of his life, and one he wouldn't be averse to repeating. Under most circumstances, a one-night stand wouldn't be an issue. Except, the woman is his boss and his best friend's sister. If his buddy discovers their tryst, Lincoln is a dead man. Utter disaster. And yet, there was something about that night that makes him want to risk life and limb to hold her, experience her scorchingly addictive surrender again. As if that isn't bad enough, after they return home, her ex-boyfriend appears in a bid to win her back, unleashing the territorial beast inside Lincoln. She belongs to him, not some city slicker in a suit. He plans to prove to her that she belongs in his bed. That he's the only one who should be gifted with her seductive surrender. Now he's navigating wooing his boss, and falling for her. Can he convince Amber to take a chance on him for more than one night?

*Amber, Furs and Cockleshells* - Anne Mustoe 2011-08-31

Myriad wonderful characters populate the pages of Anne Mustoe's fascinating book as she pedals along three very different, but equally evocative, roads - the Amber Route from the Baltic to the Adriatic, the Santa Fe Trail from the Missouri River to New Mexico and the Pilgrims' Way of St James from Le Puy to Santiago de Compostela. Battling against ferocious winds in Jutland, blizzards in the Rockies, traffic jams of cyclists along the Danube and menus in Czech, Hungarian and Basque, Mustoe survives with her usual fortitude and wry humour, even when she is knocked off her bike by a short-sighted nonagenarian in a Fiat Panda.

*Amber 2021* - David A. Case 2021-06-13

Amber is the collective name for a suite of programs that allow users to carry out molecular dynamics simulations, particularly on biomolecules.

None of the individual programs carries this name, but the various parts work reasonably well together, and provide a powerful framework for many common calculations. The term Amber is also used to refer to the empirical force fields that are implemented here. It should be recognized, however, that the code and force field are separate: several other computer packages have implemented the Amber force fields, and other force fields can be implemented with the Amber programs. Further, the force fields are in the public domain, whereas the codes are distributed under a license agreement. The Amber software suite is divided into two parts: AmberTools21, a collection of freely available programs mostly under the GPL license, and Amber20, which is centered around the pmemd simulation program, and which continues to be licensed as before, under a more restrictive license. Amber20 represents a significant change from the most recent previous version, Amber18. (We have moved to numbering Amber releases by the last two digits of the calendar year, so there are no odd-numbered versions.) Please see <https://ambermd.org> for an overview of the most important changes. AmberTools is a set of programs for biomolecular simulation and analysis. They are designed to work well with each other, and with the "regular" Amber suite of programs. You can perform many simulation tasks with AmberTools, and you can do more extensive simulations with the combination of AmberTools and Amber itself. Most components of AmberTools are released under the GNU General Public License (GPL). A few components are in the public domain or have other open-source licenses. See the README file for more information.

Amber Inclusion - Sasha Korolko 2023-01-01

An elderly woman Joanna tells her life story to a musician who happened to be in her house. It turns out that the musician appears to be in the house not quite accidentally and woman allegedly describes her childhood and youth, although the story belongs to her deceased daughter. An adult daughter ordered a musician for a future concert, knowing in advance that she would not live to see her mother's birthday. Because of the upheavals of life, Joanna is not completely in her mind and she constantly hallucinates with her fears. Her reality is associated with a fictional world, and the viewer will have to wonder: what is reality and what is fiction. Joanna wished grandchildren and a successful marriage for her daughter so badly, that she accepts all their illusory versions at the celebration table as real guests. But even in her made-up world, there is a conflict that Joanna resolves in her very eccentric way. The only real guest at the party is Bryan, a childhood friend of her daughter. He and the musician are playing along with Joanna's illusion without destroying the idyll of her looked forward celebration

**Subpar Parks** - Amber Share 2021-07-13

**\*\*A New York Times Bestseller!\*\*** Based on the wildly popular Instagram account, Subpar Parks features both the greatest hits and brand-new content, all celebrating the incredible beauty and variety of America's national parks juxtaposed with the clueless and hilarious one-star reviews posted by visitors. Subpar Parks, both on the popular Instagram page and in this humorous, informative, and collectible book, combines two things that seem like they might not work together yet somehow harmonize perfectly: beautiful illustrations and informative, amusing text celebrating each national park paired with the one-star reviews disappointed tourists have left online. Millions of visitors each year enjoy Glacier National Park, but for one visitor, it was simply "Too cold for me!" Another saw the mind-boggling vistas of Bryce Canyon as "Too spiky!" Never mind the person who visited the thermal pools at Yellowstone National Park and left thinking, "Save yourself some money, boil some water at home." Featuring more than 50 percent new material, the book will include more depth and insight into the most popular parks, such as Yosemite, Yellowstone, the Grand Canyon, and Acadia National Parks; anecdotes and tips from rangers; and much more about author Amber Share's personal love and connection to the outdoors. Equal parts humor and love for the national parks and the great outdoors, it's the perfect gift for anyone who loves to spend time outside as well as have a good read (and laugh) once they come indoors.

**The Amber Crown** - Jacey Bedford 2022-01-11

In this new epic fantasy, three societal outcasts must work together to fulfill the orders of a dead king's ghost or risk their nation falling to a tyrant. The king is dead, his queen is missing. On the amber coast, the usurper king is driving Zavonia to the brink of war. A dangerous magical power is rising up in Biela Miasto, and the only people who can set things right are a failed bodyguard, a Landstrider witch, and the assassin who set off the whole sorry chain of events. Valdas, Captain of the High Guard, has not only failed in his duty to protect the king, but he's been accused of the murder, and he's on the run. He's sworn to seek justice, but his king sets him another task from beyond the grave. Valdas doesn't believe in magic, which is unfortunate as it turns out. Mirza is the healer-witch of a Landstrider band, valued and feared in equal measure for her witchmark, her scolding tongue, and her ability to walk the spirit world. When she's given a task by Valdas' dead king, she believes that the journey she must take is one she can never return from. Lind is the clever assassin. Yes, someone paid him to kill the king, but who is to blame, the weapon or the power behind it? Lind must face his traumatic past if he's to have a future. Can these three discover the real villain, find the queen, and set the rightful king on the throne before the country is overcome?
