Cinque Canti / Five Cantos -

Ludovico Ariosto 1996-03-01

This new translation brings to English-speaking readers an intense and brooding work by the greatest poet of the Italian Renaissance, Ludovico Ariosto. Begun as a sequel to his epic masterpiece Orlando Furioso (1516), the unfinished Cinque

Canti are a powerful poem in their own right. Tragic in tone, they depict the disintegration of the chivalric world of Charlemagne and his knights and give poetic expression to a sense of cultural, political, and religious crisis felt in Ariosto's Italy and in early sixteenth-century Europe more

generally. David Quint's introduction freshly examines the literary sources and models of the Cinque Canti and discusses the cultural contexts and historical occasions of the poem. Printed with facing Italian text, this volume allows the modern reader to experience a work of Renaissance literature whose savage beauty still has the power to chill and fascinate.

Organizing for Social Justice - International Labour Office 2004
Freedom of association, and the recognition of the right to bargain collectively, are not only fundamental human rights at work, but also vital elements of economic, social and political processes. Organizing for Social Justice takes account of the current trends in exercising these rights as well as the significant challenges that still remain in many parts of the world, particularly in today's global economy. The chapters are: Freedom of association and collective bargaining; The foundations for democratic development; From principles to practice: The challenges ahead; Organizing and bargaining in the

global economy; Encouraging progress: Technical cooperation to strengthen and extend freedom of association and collective bargaining; Building on progress

Noun+Noun Compounds in

Italian - Radimský Jan

2015-12-28

This book investigates one concrete compounding pattern in present-day Italian within a larger overview of Italian compounding. Various accounts and classifications of Noun + Noun combinations in Italian are reviewed, with special focus on the status of the lexical integrity hypothesis. The author sets out to propose an integrated approach to the Noun + Noun compounding pattern, rigorously based on large representative data sets that were extracted from the Italian web corpus ItWaC as both automatically and manually post-processed frequency lists. On the basis of such data, it is aimed to show the behaviour of various subtypes of Noun + Noun

compounds. Starting out with the Bisetto-Scalise classification, the author carefully examines the status of coordinate compounds, ATAP compounds (i.e., the group comprising attributive and appositive structures) and subordinate compounds (comprising verbal-nexus and grounding compounds), discussing both theoretical and empirical implications of this classification scheme. Moreover, the original Bisetto-Scalise model is supplemented with further classification levels in order to capture specific compounding types such as relational (i.e. inherently trinominal) compounds. A major merit of the present study lies in the quantitative dimension of the data it deals with. In light of this data, the author emphasizes the gradient nature of the traditional dichotomy between syntax and compounding. The book will thus appeal not only to the linguists interested specifically in

Italian word-formation, but also to a larger community of scholars who seek a more general view of the word-formation phenomena.

Human Systems Engineering and Design III - Waldemar

Karwowski 2020-08-29

This book focuses on novel design and systems engineering approaches, including theories and best practices, for promoting a better integration of people and engineering systems. It covers a range of innovative topics related to: development of human-centered systems; interface design and human-computer interaction; usability and user experience; innovative materials in design and manufacturing; biomechanics and physical rehabilitation, as well as safety engineering and systems complexity. The book, which gathers selected papers presented at the 3rd International Conference on Human Systems Engineering and Design: Future Trends and Applications (IHSED

2020), held on September 22-24, 2020, at Juraj Dobrila University of Pula, in Pula, Croatia, provides researchers and practitioners with a snapshot of the state-of-the-art and current challenges in the field of human systems engineering and design.

Twelve Years A Slave (Illustrated) - Solomon Northup 2014-08-22

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to

friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

Engraved on Steel: History of Picture Production Using Steel Plates - Basil Hunnisett

2018-09-05

First published in 1998, *Engraved on Steel* focuses on engraving and engravers, exploring the use of steel engraving in both the decorative arts and in printing, Basil Hunnisett also describes the context of the steel engraver's work. The processes by which steel engraving became one of the most widely used forms of printing in the 19th century are described in detail as the developments in the print industry, paper manufacture and publishing that determined its

history. The activities of print publishers are also examined, including those of art unions.

Dictionary of Indo-European Concepts and Society - Émile Benveniste 2016

Since its publication in 1969, Émile Benveniste's *Vocabulaire--* here in a new translation as the *Dictionary of Indo-European Concepts and Society--* has been the classic reference for tracing the institutional and conceptual genealogy of the sociocultural worlds of gifts, contracts, sacrifice, hospitality, authority, freedom, ancient economy, and kinship. A comprehensive and comparative history of words with analyses of their underlying neglected genealogies and structures of signification--and this via a masterful journey through Germanic, Romance, Indo-Iranian, Latin, and Greek languages--Benveniste's dictionary is a must-read for anthropologists, linguists, literary theorists, classicists, and

philosophers alike. This book has famously inspired a wealth of thinkers, including Roland Barthes, Claude Lévi-Strauss, Pierre Bourdieu, Jacques Derrida, Umberto Eco, Giorgio Agamben, François Jullien, and many others. In this new volume, Benveniste's masterpiece on the study of language and society finds new life for a new generation of scholars. As political fictions continue to separate and reify differences between European, Middle Eastern, and South Asian societies, Benveniste reminds us just how historically deep their interconnections are and that understanding the way our institutions are evoked through the words that describe them is more necessary than ever.

The Rule of Law in International Affairs - Ian Brownlie 1998-08-26

This volume consists of a carefully edited version of the General Course on Public International Law delivered at the Hague Academy of International Law to commemorate the fiftieth anniversary of the foundation of the United Nations. The author brings to them not only his background of academic distinction, but his experience as a practitioner concerned with major international legal issues. The rule of law in international affairs is a question of perennial concern but it is of greater moment these days for a number of reasons. The active agenda of the Security Council and its relative solidarity creates a paradox. Its increased political power is a source of hope but the modalities of the exercise of power present problems of principle and of legal concern.

Another area of concern is the International Court, which has had a successful record since the early eighties and provides one of the guarantees of the maintenance of legality. Recent successes of the Court include the effective resolution of the territorial dispute between Chad and Libya. The general level of compliance with its decisions by States is impressive. Yet its success is matched not by encouragement and enhancement of its facilities but by United Nations financial constraints which hinder its work and, ultimately, may threaten its independence in relation to the political organs of the United Nations.

Developments and Advances in Defense and Security - Álvaro Rocha 2018-04-05

This book includes a selection of articles from The 2018 Multidisciplinary International Conference of Research Applied to Defense and Security

(MICRADS'18), held in Salinas, Peninsula de Santa Elena, Ecuador, from April 18 to 20, 2018. MICRADS is an international forum for researchers and practitioners to present and discuss the most recent innovations, trends, results, experiences and concerns in the various areas of defense and security, together with their technological development and applications. The main topics covered are: Information and Communication Technology in Education; Computer Vision in Military Applications; Engineering Analysis and Signal Processing; Cybersecurity and Cyberdefense; Maritime Security and Safety; Strategy, Geopolitics and Oceanopolitics; Defense planning; Leadership (e-leadership); Defense Economics; Defense Logistics; Health Informatics in Military Applications; Simulation in Military Applications; Computer Networks, Mobility and

Pervasive Systems; Military Marketing; Military Physical Training; Assistive Devices and Wearable Technology; Naval and Military Engineering; Weapons and Combat Systems; Operational Oceanography. The book is aimed at all those dealing with defense and security issues, including practitioners, researchers and teachers as well as undergraduate, graduate, master's and doctorate students.

Ancient Magic - Attilio Mastrocinque 2020-08-07

An international team of scholars from different academic disciplines address some of the most important issues, texts, and objects in the study of ancient magic. The volume is divided into three primary sections. The first part offers new approaches to some of the major theoretical and methodological questions in the study of ancient magic. Most importantly, the authors offer a defense of the term "magic" as a scholarly rubric in the study of

antiquity. The contributors to the second part provide novel interpretations of some of the most significant defixiones, amulets, recipes and rituals from the ancient world. The essays also engage with questions of gender, materiality, visuality, and scribal practice. The final section examines the transmission of magical practice, both in antiquity and in later periods.

Accordingly, the chapters in this final section allow scholars to approach the study of magic over the longue duree. By placing into dialogue the interests, concerns, and methods of scholars from diverse academic fields, this volume provides an interdisciplinary perspective to the study of premodern magic.

The Seri Indians. (1898 N 17 / 1895-1896 (pages 1-344))* - W J McGee 2022-06-02

In this work W J McGee sheds light on one of the least-studied tribes of North America, The Seri Indians. This is a unique tribe in

habits, customs, and language, living in Tiburon Island in Gulf of California and a small adjacent area on the mainland of Sonora (Mexico). McGee covers everything about the tribe from their habitat, history, features, language, characters, and their place in society. Excerpt from the book "The Seri men and women are of splendid physique; they have fine chests, with slender but sinewy limbs, though the hands and especially the feet are large; their heads, while small in relation to stature, approach the average in size; the hair is luxuriant and coarse, ranging from typical black to tawny in color, and is worn long. They are notably vigorous in movement, erect in carriage, and remarkable for fleetness and endurance."

Spinoza's Ethica from Manuscript to Print - Piet Steenbakkers 1994

Forensic Anthropology and Medicine - Aurore Schmitt

2007-11-09

Recent political, religious, ethnic, and racial conflicts, as well as mass disasters, have significantly helped to bring to light the almost unknown discipline of forensic anthropology. This science has become particularly useful to forensic pathologists because it aids in solving various puzzles, such as identifying victims and documenting crimes. On topics such as mass disasters and crimes against humanity, teamwork between forensic pathologists and forensic anthropologists has significantly increased over the few last years. This relationship has also improved the study of routine cases in local medicolegal institutes. When human remains are badly decomposed, partially skeletonized, and/or burned, it is particularly useful for the forensic pathologist to be assisted by a forensic anthropologist. It is not a one-way situation: when the forensic anthropologist deals with skeletonized bodies that

have some kind of soft tissue, the advice of a forensic pathologist would be welcome. Forensic anthropology is a subspecialty/field of physical anthropology. Most of the background on skeletal biology was gathered on the basis of skeletal remains from past populations. Physical anthropologists then developed an indisputable “know-how”; nevertheless, one must keep in mind that looking for a missing person or checking an assumed identity is quite a different matter. Pieces of information needed by forensic anthropologists require a higher level of reliability and accuracy than those granted in a general archaeological context. To achieve a positive identification, findings have to match with evidence, particularly when genetic identification is not possible.

Women Deacons? Essays with Answers - Phyllis Zagano

2016-04-28

The question of restoring women to the ordained diaconate surfaced during the Second Vatican Council and continued to resound in academic and pastoral circles well after the diaconate was restored as a permanent order in the church in the West. This volume contains twelve essays—five translated from Italian, three translated from French, and four in their original English—that answer the questions about the history and possible future of women deacons. The Nuptial Mystery - Angelo

Scola 2005-05-12

Translated by Michelle K. Borrás

The idea of love pervades our society, yet it is nearly impossible to answer the question What is

love? especially as we witness the divorce of love from sexuality and of sexuality from procreation. Aware that many people today are skeptical about marriage, Angelo Cardinal Scola nevertheless suggests that only in the category of nuptial mystery do we find a way to adequately describe the phenomenon of love. A bright new leader in the Catholic Church, Cardinal Scola argues that the male-female relationship lies near the heart of what it means to bear the image of God. Scola's book explores the essential sexual differences that both separate and unite men and women, and it shows how men and women can realize their purpose in marriage or celibacy. Conversant with papal teaching and Catholic writers from Aquinas to von Balthasar, Cardinal Scola writes with a deep regard for marriage and the family. His Nuptial Mystery will leave readers with a thoroughly

Christian appreciation for
incarnate love.

Poetry in Pieces - Michelle
Clayton 2011-01-10

Set against the cultural and political backdrop of interwar Europe and the Americas, *Poetry in Pieces* is the first major study of the Peruvian poet César Vallejo (1892–1938) to appear in English in more than thirty years. Vallejo lived and wrote in two distinct settings—Peru and Paris—which were continually crisscrossed by new developments in aesthetics, politics, and practices of everyday life; his poetry and prose therefore need to be read in connection with modernity in all its forms and spaces. Michelle Clayton combines close readings of Vallejo’s writings with cultural, historical, and theoretical analysis, connecting Vallejo—and Latin American poetry—to the broader panorama of international modernism and the avant-garde, and to writers and artists such as Rainer Maria Rilke, James Joyce, Georges Bataille, and Charlie Chaplin. *Poetry in Pieces* sheds new light on one of the key

figures in twentieth-century Latin American literature, while exploring ways of rethinking the parameters of international lyric modernity.

Malone Dies - Samuel Beckett
2012-10-04

'Malone', writes Malone, 'is what I am called now.' On his deathbed, and wiling away the time with stories, the octogenarian Malone's account of his condition is intermittent and contradictory, shifting with the vagaries of the passing days: without mellowness, without elegiacs; wittier, jauntier, and capable of wilder rages than Molloy. The sound I liked best had nothing noble about it. It was the barking of the dogs, at night, in the clusters of hovels up in the hills, where the stone-cutters lived, like generations of stone-cutters before them. it came down to me where I lay, in the house in the plain, wild and soft, at the limit of earshot, soon weary. The dogs of the valley

replied with their gross bay all fangs and jaws and foam...

Man a Machine ; And, Man a Plant - Julien Offray de La Mettrie 1994-01-01

The first modern translation of the complete texts of La Mettrie's pioneering L'Homme machine and L'Homme plante, first published in 1747 and 1748, respectively, this volume also includes translations of the advertisement and dedication to

L'Homme machine. Justin Leiber's introduction illuminates the radical thinking and advocacy of the passionate La Mettrie and provides cogent analysis of La Mettrie's relationship to such important philosophical figures as Descartes, Malebranche, and Locke, and of his lasting influence on the development of materialism, cognitive studies, linguistics, and other areas of intellectual inquiry.
