**The Multilingual Lexicon** - Jasone Cenoz 2007-05-28

This book is unique because it explores the multilingual lexicon by providing insights from research studies conducted in psycholinguistics, applied linguistics and neurolinguistics. It goes beyond the use of two languages and thus concentrates on a new and developing area in linguistic research. The different perspectives provide a link to the mainstream work on the lexicon and vocabulary acquisition and will stimulate further debate in these areas and in the study of multilingualism.

Codex Cumanicus - Géza Kuun 1981

*Studies on Multilingual Lexicography* - María José Domínguez Vázquez 2019-12-16

Given the new technological advances and their influence and imprint in the design and development of dictionaries and lexicographic resources, it seems important to put together a series of publications that address this new situation, dealing in particular with multilingual and electronic lexicography in an increasingly digital, multilingual and multicultural society. This is the main objective of this volume, which is structured in two central aspects. In the first of them the concept of multilingual lexicography is discussed in regard to the influence that the Internet and the application of digital technologies have exercised and continue to exercise both in the conception and design of dictionaries and new lexicographic application tools as well as the emergence of new types of users and forms of consultation. The role of the dictionary must necessarily be related to social development and changes. In the second thematic section, different dictionaries and resources that focus on a multilingual and electronic approach to the linguistic data for their lexicographical treatment and consultation are presented.

Handbook for Arabic Language Teaching Professionals in the 21st Century - Kassem Wahba 2014-06-03

This landmark volume offers an introduction to the field of teaching Arabic as a foreign or second language. Recent growth in student numbers and the demand for new and more diverse Arabic language programs of instruction have created a need that has outpaced the ability of teacher preparation programs to provide sufficient numbers of well-qualified professional teachers at the level of skill required. Arabic language program administrators anticipate that the increases in enrollment will continue into the next decades. More resources and more varied materials are seriously needed in Arabic teacher education and training. The goal of this Handbook is to address that need. The most significant feature of this volume is its pioneer role in approaching the field of Arabic language teaching from many different perspectives. It offers readers the opportunity to consider the role, status, and content of Arabic language teaching in the world today. The Handbook is intended as a resource to be used in building Arabic language and teacher education programs and in guiding future academic research. Thirty-four chapters authored by leaders in the field are organized around nine themes: \*Background of Arabic Language Teaching; \*Contexts of Arabic Language Teaching; \*Communicative Competence in Arabic; \*The Learners; \*Assessment; \*Technology Applications; \*Curriculum Development, Design, and Models; \*Arabic Language Program Administration and Management; and \*Planning for the Future of Arabic Language Learning and Teaching. The Handbook for Arabic Language Teaching Professionals in the 21st Century will benefit and be welcomed by Arabic language teacher educators and trainers, administrators, graduate students, and scholars around the world. It is intended

to create dialogue among scholars and professionals in the field and in related fields--dialogue that will contribute to creating new models for curriculum and course design, materials and assessment tools, and ultimately, better instructional effectiveness for all Arabic learners everywhere, in both Arabic-speaking and non-Arabic speaking countries.

**Literary Translation, Reception, and Transfer** - Norbert Bachleitner 2020-09-21

The three concepts mentioned in the title of this volume imply the contact between two or more literary phenomena; they are based on similarities that are related to a form of 'travelling' and imitation or adaptation of entire texts, genres, forms or contents. Transfer comprises all sorts of 'travelling', with translation as a major instrument of transferring literature across linguistic and cultural barriers. Transfer aims at the process of communication, starting with the source product and its cultural context and then highlighting the mediation by certain agents and institutions to end up with inclusion in the target culture. Reception lays its focus on the receiving culture, especially on criticism, reading, and interpretation. Translation, therefore, forms a major factor in reception with the general aim of reception studies being to reveal the wide spectrum of interpretations each text offers. Moreover, translations are the prime instrument in the distribution of literature across linguistic and cultural borders; thus, they pave the way for gaining prestige in the world of literature. The thirty-eight papers included in this volume and dedicated to research in this area were previously read at the ICLA conference 2016 in Vienna. They are ample proof that the field remains at the center of interest in Comparative Literature.

**Biblical Lexicology: Hebrew and Greek** - Eberhard Bons  
2015-07-01

Lexicography, together with grammatical studies and textual criticism, forms the basis of biblical exegesis. Recent decades have seen much progress in this field, yet increasing specialization also tends to have the paradoxical effect of turning exegesis into an independent discipline, while leaving lexicography to the experts. The present volume seeks to renew and intensify the exchange between the study of words and the study of texts. This is done in reference to both the Hebrew source text and the earliest Greek translation, the Septuagint. Questions addressed in the contributions to this volume are how linguistic meaning is effected, how it relates to words, and how words may be translated into another language, in Antiquity and today. Etymology, semantic fields, syntagmatic relations, word history, neologisms and other subthemes are discussed. The main current and prospective projects of biblical lexicology or lexicography are presented, thus giving an idea of the state of the art. Some of the papers also open up wider perspectives of interpretation.

**The Position of the German Language in the World** - Ulrich Ammon 2019-08-08

The Position of the German Language in the World focuses on the global position of German and the factors which work towards sustaining its use and utility for international communication. From the perspective of the global language constellation, the detailed data analysis of this substantial research project depicts German as an example of a second-rank language. The book also

provides a model for analysis and description of international languages other than English. It offers a framework for strengthening the position of languages such as Arabic, Chinese, French, Portuguese, Spanish and others and for countering exaggerated claims about the global monopoly position of English. This comprehensive handbook of the state of the German language in the world was originally published in 2015 by Walter de Gruyter in German and has been critically acclaimed. Suitable for scholars and researchers of the German language, the handbook shows in detail how intricately and thoroughly German and other second-rank languages are tied up with a great number of societies and how these statistics support or weaken the languages' functions and maintenance.

**A Grammar of Classical Arabic** - Wolf Dietrich Fischer 2002  
This concise and well-organised grammar of classical Arabic, here translated from its original German into English for the first time, provides students of Arabic with a highly useful reference tool. While brief enough to be used with efficiency, the book is also

rich in content and thorough in its coverage. Beginning- or advanced-level students working on classical texts and styles will find this grammar quick to use, reliable, and up-to-date. More than just a translation into English, this edition of Wolfdietrich Fischer's Grammar of Classical Arabic includes many revisions and additions provided by Rodgers. In particular, the chapter on syntax offers numerous new text examples and other improvements. The bibliography has been updated to include significant recent contributions to the field of classical Arabic grammar and linguistics. Translated by Jonathan Rodgers with attention to both accuracy and readability, this book is an accessible reference tool that every student of classical Arabic will want to have on hand.

**Names in the Economy** - Terhi Ainiala 2014-07-18

The economy has an increasingly powerful role in the contemporary global world. Academic scholars who study names have recognised this, and, as such, onomastic research has expanded from personal and place names towards names that reflect the new commercial culture. Companies are aware of the significance of naming. Brand, product and company names play an important role in business. Culture produces names and names produce culture. Commercial names shape cultures, on the one hand, and changes in cultures may affect commercial names on the other. The world of the economy and business has created its own culture of names, but this naming culture may also affect other names; even place names and personal names are influenced by it. Names in the Economy: Cultural Prospects is composed of 20 articles that were produced from a collection of papers presented in 2012 at the fourth Names in the Economy symposium in Turku, Finland. These articles will equally be of interest to both academics and professionals. The goal of this book is multidisciplinary and theoretically diverse: it contemplates commercial-bound names from the viewpoints of linguistics and onomastics, as well as marketing and branding

research. In addition to traditional onomastic standpoints, there are newer linguistic theories, sociological and communicational views, multimodality theory, and branding theories. The authors are scholars from three continents and from ten different countries.

The Turkic Languages - Lars Johanson 2021

"The Turkic languages are spoken today in a vast geographical area stretching from southern Iran to the Arctic Ocean, and from the Balkans to the great wall of China. There are currently twenty literary languages in the group, the most important among them being Turkish with over seventy million speakers; other major languages covered include Azeri, Bashkir, Chuvash, Gagauz, Karakalpak, Kazakh, Kirghiz, Noghay, Tatar, Turkmen, Uyghur, Uzbek, Yakut, Yellow Uyghur and languages of Iran and South Siberia. The Turkic Languages is a reference book which brings together detailed discussions of the historical development and specialized linguistic structures and features of the languages in the Turkic family. Seen from a linguistic typology point of view, Turkic languages are particularly interesting because of their astonishing morphosyntactic regularity, their vast geographical distribution and their great stability over time. This volume builds upon a work which has already become a defining classic of Turkic language study. The present, thoroughly revised edition updates and augments those authoritative accounts, and reflects recent and ongoing developments in the languages themselves, as

well as our further enhanced understanding of the relations and patterns of influence between them. The result is the fruit of decades-long experience in the teaching of the Turkic languages, their philology and literature, and also of a wealth of new insights into the linguistic phenomena and cultural interactions defining their development and use, both historically and in the present day. Each chapter combines modern linguistic analysis with traditional historical linguistics; a uniform structure allows for easy typological comparison between the individual languages. Written by an international team of experts, The Turkic Languages will be invaluable to students and researchers within linguistics, Turcology and Near Eastern and Oriental Studies"--

*Haketía* - Estrella Jalfón de Bentolila 2011

Haketia: A Memoir of Judeo-Spanish Language and Culture in Morocco is a personalized study of the Judeo-Spanish-Arabic language of the Jewish community in northern Morocco. It was the vernacular language of Jews in the region until recent decades. Haketia dates back to time of the Expulsion of Jews from Spain in 1492, and it is to be distinguished from Ladino, another Judeo-Spanish language, spoken largely in the territories of the former Ottoman Empire. With the twentieth century diaspora of the Moroccan Jewish population, Haketia was carried to the Americas, France, Israel, and other countries. In these newly adopted lands, the language was not learned by the newer generations, and its use has been declining. Now it is spoken primarily by people of the older generation, who have their roots in northern Morocco. The vocabulary of Haketia includes a rich array of fifteenth century Castilian words, as well as Arabic verbs with Castilian declensions. Haketia is written with Hebrew

characters.

**The Oxford Handbook of Arabic Linguistics** - Jonathan Owens  
2013-10-03

Until about 60 years ago, linguistic research on the Arabic language in the West was restricted to inquiries on Classical Arabic and the Classical tradition, and spoken Arabic dialects, with historical studies embedded within the broader field of Semitic languages. This situation is changing quickly, not only through the continuation of older research traditions, but also with the integration of new research fields and perspectives. With this expansion comes the danger of specialists in Arabic losing an overview of the field, and of leaving non-specialists without basic resources for evaluating domains of research which they may be interested in for comparative purposes. The Oxford Handbook of Arabic Linguistics will confront this problem by combining state-of-the-art overviews with essays on issues of perspective, controversy, and point of view. In twenty-four chapters, leading experts from around the world will lay out their own stances on controversial issues. The book not only evaluates ways in which questions and theories established in general linguistics and its sub-fields elucidate Arabic, but also challenges approaches which might result in accommodating Arabic to "non-Arabic" interpretations, and brings out the Arabic specificity of individual problems. The Handbook, in one compact volume, gives critical expression to a language which covers large populations and geographical areas, has a long written tradition, and has been the locus of major intellectual fervor and debate.

[Bilingualism and Migration](#) - Guus Extra 1999-01-01

Language acquisition is a human endeavor par excellence. As children, all human beings learn to understand and speak at least one language: their mother tongue. It is a process that seems to take place without any obvious effort. Second language learning, particularly among adults, causes more difficulty. The purpose of this series is to compile a collection of high-quality monographs

on language acquisition. The series serves the needs of everyone who wants to know more about the problem of language acquisition in general and/or about language acquisition in specific contexts.
