Dispute Resolution in Sport - David McArdle
2014-09-19

An increasing number of sport disputes are being resolved by way of arbitration. This is the first book to critically examine the processes and benefits of sport-specific arbitration as compared to litigation. The book explores, in depth, the development of alternative dispute resolutions in sports, paying particular attention to high-profile institutions such as the Court of Arbitration for Sport, the FIFA Football Dispute Resolution Panel and important national-level bodies, and their relationship with national and international-level actors such as the IOC, WADA and the European Union. It also examines in detail the legal frameworks within which sports arbitration systems operate, considers their similarities with other arbitral bodies and considers the extent to which ADR in sport can be seen as a consequence of, and perhaps a solution to, the 'juridification' of sports. Offering a theoretical basis with which to understand the relationship between arbitration and litigation, as well as providing guidance on key contemporary issues and best practice, this book is important reading for students, researchers and practitioners working in sports law, sports management and

administration, sports politics, sports ethics, and international organisation.

Sports Law in Poland - Eligiusz Jerzy Krześniak
2021-09-20

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Poland deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to

sports law at this specific level. Lawyers representing parties with interests in Poland will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

Professional sport, amateur sport, sport media, sporting goods and licensing, and fitness, wellness, and health are presented alongside the emerging and rapidly evolving sectors of sport marketing, legalized sport wagering, and esports for a realistic look at how governance is applied across different sectors. To enhance practical application, a related web resource presents 12 in-depth case studies and debates on relevant examples of governance in action within sports organizations. in esports. Critical thinking skills are encouraged with multiple-choice and discussion questions provided at the end of each case study. Phenomenology and Pedagogy in Physical Education - Oyvind Standal 2016-01-29

Phenomenology is a philosophical approach to the study of consciousness and subjective experience. In recent years it has become a more prominent element of the social scientific study of sport and a core component of the important emergent concept of physical literacy. This book is the first to offer a philosophically-sound investigation of phenomenological perspectives on pedagogy in physical education. The book argues that phenomenology offers a particularly interesting theoretical approach to physical education because of the closely embodied relationship between the knowledge object (the actions, activities and practices of movement) and the knowing subject (the pupil). Drawing on the work of key phenomenological thinkers but also exploring the implications of this work for teaching practice, the book helps to illuminate our understanding of important concepts in physical education such as practical knowledge, skill acquisition, experience and ethics. This is fascinating reading for any serious student or researcher working in physical education or the philosophy or sociology of sport.

[Political Expression in Sport](#) - Cem Abanazir 2022-11-14

This powerful new book looks at how private institutions governing and organising sport restrict political expression. Uniquely, it makes a case for the freedom of expression for athletes, spectators and audiences built upon philosophical foundations. In the era of Colin Kaepernick and taking-a-knee, politics and protest in sport have never been more visible and immediate. Drawing on a wide range of international cases, including protest actions from athletes such as Tommie Smith and John Carlos, Naomi Osaka and Feyisa Lilesa, as well the reactions from sport organisations including the IOC, FIFA, UEFA and the NFL, the book argues that the organisation of sport at the hands of associations and leagues, and their transnational power to regulate, adjudicate and enforce

matters according to their interests, leads to the restriction of freedom of expression. Focusing on the individual, the book presents a framework for the defence of freedom of expression in sport on moral grounds, and also explores the limits to freedom of expression, especially those arising from hate speech, that might better serve both the individual and sport as an institution. This book is fascinating reading for anybody with an interest in the ethics, philosophy or politics of sport, sport governance, the relationship between sport and wider society, or moral or political philosophy.

A Global History of Doping in Sport - John Gleaves 2016-03-22

From turn-of-the-century horseracing to the monolithic anti-doping attitudes now supported by sporting organizations, the development of anti-doping ideology has spread throughout modern sport. Yet heretofore few historians have

explored the many ways that international sport has responded to doping. This book seeks to fill that gap by examining different aspects of sport's global efforts to respond to athletes doping. By incorporating cultural, political, and feminist histories that examine international responses to doping, this special issue aims to better articulate the narrative of doping. The work starts with the first mention of doping in any sport. It examines not only the first efforts to ban doping but also the athletes who sought performance enhancers. Focusing on specific framing events, authors in this issue examine how history of doping and how it has indelibly marked the sporting landscape. The result is a work with both breadth and focus. From stories of Japanese swimmers to Italian runners to American jockeys, the work spans the range of doping history. At the same time, the authors remain focused around one single issue: the history of doping in sport. This book was published as a special issue of the *International Journal of the History of Sport*.

Philosophical Issues in Sport Science - Emily Ryall 2020-02-18

The role and value of science within sport increases with ever greater professionalization and commercialization. Scientific and

technological innovations are devised to increase performance, ensure greater accuracy of measurement and officiating, reduce risks of harm, enhance spectatorship, and raise revenues. However, such innovations inevitably come up against epistemological and metaphysical problems related to the nature of sport and physical competition. This Special Issue identifies and explores key and contemporary philosophical issues in relation to the science of sport and exercise. It is divided into three sections: 1. Scientific evidence, causation, and sport; 2. Science technology and sport officiating; and 3. Scientific influences on the construction of sport. It brings together scholars working on philosophical problems in sport to examine issues related to the values and assumptions behind sport and exercise science and key problems resulting from these and to provide recommendations for improving its practice.

Holism and the Cultivation of Excellence in Sports and Performance - Jesus Ilundain-Agurruza 2018-02-02

Skillful Striving is a multi-methodological and cross-cultural examination of how we flourish holistically through performative endeavors, e.g., sports, martial and performing arts. Relying primarily on sport philosophy, value theory, phenomenology, philosophy of mind, pragmatism, and East Asian philosophies (Japanese and Chinese), it espouses thick holism. Concerned with an integrative bodymind gradually achieved through performance that aims at excellence, the process of self-cultivation proper of thick holism relies on an ecologically rich epistemic landscape where skills are coupled to virtues in pragmatic contexts. Ultimately, this process results in admirable performances and exemplary character. Japanese *dō* (practices of self-cultivation) are prominent modes and models of such flourishing. A holistic and radically enactive approach that advances contentless capacities in lieu of representations transparently accounts for the kind of action that characterizes such expert performances. Importantly, these performer-centered endeavors unfold within communities that foster the cultivation of our abilities as lifelong quests for human excellence. Each chapter can be read independently but still forms part of a continuous argumentative and narrative thread. This book was previously

published as a special issue of Sport, Ethics and Philosophy.

Commercial Dispute Resolution in China

Wolters Kluwer Hong Kong 2021-11-15

2020 marked a remarkably unusual year for all, tough and impressive enough. Along with the prevalence of COVID-19 and the deepening of economic globalization, work and production in China were resumed in an orderly manner, bringing positive economic growth against the trend. In this context, commercial dispute resolutions in China were faced with new challenges, and endured new reforms while embracing new developments. The promulgation of new laws and regulations in 2020, including the Civil Code of the People's Republic of China and the Supplementary Arrangements on Mutual Implementation of Arbitral Awards in Mainland China and Hong Kong Special Administrative Region, has elevated the arbitration system to a higher level. Arbitration institutions such as the Beijing Arbitration Commission/Beijing International Arbitration Center (hereinafter referred to as "BAC/BIAC") carried out anti-pandemic measures in a timely manner to ensure the well-functioning of the arbitration procedures. Meanwhile, China's judicial supervision on arbitration and arbitration disclosure have undergone impressive developments. In 2020, the procedural standards of commercial mediation were further optimized, and commercial mediation institutions continued to expand and grow, while the number of mediation cases increased steadily. The "one-stop" diversified dispute resolution system was fully advanced, and the systems of litigation-mediation and arbitration-mediation have been constantly improved. Online mediation

mechanism was rapidly developed in response to the new norms of pandemic prevention and control. Sino-foreign joint mediation mechanism has been gradually established, and international commercial mediation rules and systems are continuously refined. While rolling out countermeasures in full scale to mitigate impacts of pandemic, China achieved some eye-catching accomplishments in terms of legal system development and dispute resolution practices in 2020. In the area of construction engineering, new and old arbitration rules continue to coexist during the transition period of the Civil Code before it takes effect, while the arbitration and resolution of disputes over public-private-partnership (PPP) have made great breakthroughs. In the real estate sector, stricter regulatory policies were enacted and effectuated to ensure that "housing should be for living in, not for speculation". Hot topics such as real estate enterprise operations, real estate development modes, and regulation over long rental apartments attracted widespread social attention. In the energy sector, the transformation of energy structure was implemented on a large scale. The Energy Law has generally taken shape. Carbon-neutral efforts were intensified. The carbon credit trading market is prospering. Relevant regulatory rules thereof were established. In the financial sector, several new financial products gave rise to crises in 2020 but were promptly resolved. The rights-protection mechanism for stock investors was further perfected. The protection for personal financial information was strengthened, and the explorations over the system for individual bankruptcy have been accelerated. In the realm of investments, the pandemic directly affects investors' valuation of enterprises and expectation of profitability. Regulatory authorities and courts continued to enhance investment supervision and adjudication rules, all of which had far-reaching influences on the resolution of investment disputes. In terms of international trade, multiple statutes and regulatory rules were enacted in order to safeguard national security and to protect the interests of Chinese enterprises. Judicial authorities took the lead in exploring and identifying new transaction modes under the premise of adhering to international trade rules.

In terms of intellectual property, the Patent Law and the Copyright Law were amended, and various judicial interpretations and guidelines were released intensively. Dispute resolution methods become more diversified, and arbitration and mediation played more important roles. In the area of civil aviation, several rules and regulations were formulated or amended. Phenomena restraining the development of the aviation industry occurred from time to time in 2020, including restrictions against traffic rights, export controls, and intellectual property rights discrimination. In the film and television entertainment industry, risks and opportunities existed side by side. The industry witnessed an increase of disputes over the performance of film and television contracts, disputes over the emerging live streaming business, and disputes over the types of works defined in copyright law. In the field of sports, the sanction mechanisms against doping violations were improved, and the protection for intellectual property rights of sports-related intangible assets were strengthened while the amount of sports-related disputes went up. To present an in-depth and systematic report on the 2020 practices and developments in the aforementioned fields, BAC/BIAC has called upon industry experts to contribute to the Annual Review and Preview of Commercial Dispute Resolution in China (2021) ("2021 Annual Review"), and released it in both Chinese and English to facilitate a better understanding of the status quo of China's commercial dispute resolutions among interested parties at home and abroad. The 2021 Annual Review is compiled based on the following principles: First, a focus on the state of the art. The 2021 Annual Review strives to showcase the latest developments in relevant industries and the leading trends in legal systems and judicial practices. It selected annual hot topics for in-depth analysis, aiming to deliver timely observations and cutting-edge contents while providing detailed information thereof. Second, a focus on the consistency and systematicness. This book recognizes the rapid evolution of Sports Law and seeks to embrace its relevance to the region. This book offers guidance, instruction and legal perspectives to students, athletes, those responsible for the administration of sport, the adjudication of sports-related disputes and the representation of athletes in the Caribbean. It addresses numerous important themes from a doctrinal, socio-legal and comparative perspective, including sports governance, sports contracts, intellectual property rights and doping in sport, among other thought-provoking issues which touch and concern sport in the Commonwealth Caribbean. As part of the well-established Routledge Commonwealth Caribbean Law Series, this book adds to the Caribbean-centric jurisprudence that has been a welcome development across the region. Philosophy and the Martial Arts - Graham Priest 2014-09-19

This is the first substantial academic book to lay out the philosophical terrain within the study of the martial arts and to explore the significance of this fascinating subject for contemporary philosophy. The book is divided into three sections. The first section concerns what philosophical reflection can teach us about the martial arts, and especially the nature and value of its practice. The second section deals with the other direction of the dialectical interplay between philosophy and the martial arts: how the martial arts can inform philosophical issues important in their own right. Finally, because many of the notable martial arts are of Asian origin, there are particularly close links between the arts and Asian philosophies – and Buddhism in particular – and therefore the last section is devoted to this topic. The essays in this collection deal with a wide range of philosophical issues: normative ethics, meta-ethics, aesthetics, phenomenology, the philosophy of mind, Ancient Greek and Buddhist thought. By demonstrating the very real nature of the engagement between the martial arts and philosophy, this book is essential reading for any serious student or scholar with an interest in the martial arts, Eastern philosophy, the philosophy of sport, or the study of physical culture.

In *Ethics and Governance in Sport: the future of sport imagined*, an ensemble of leading international experts from across the fields of sport management and ethics calls for a new model of sport that goes beyond the traditional view that sport automatically encourages positive physical, psychological, social, moral and political values. Acknowledging that sport is beset by poor practice, corruption, and harmful behaviors, it explores current issues in sport ethics, governance and development, considering how good governance and the positive potentials of sport can be implemented in a globalized sporting landscape. *Ethics and Governance in Sport* suggests a future model of sport governance based on well substantiated projections, and argues that identifying the root

causes of harmful behavior, those things that are characteristic of sport, and engaging sport managers, policy makers and leaders of sport organizations, is essential if sport is to thrive. Gender Testing in Sport - Sandy Montanola 2016-02-05

After the young South African athlete Caster Semenya won the 800m title at the 2009 World Championships she was obliged to undergo gender testing and was temporarily withdrawn from international competition. The way that this controversy unfolded represents a rich and multi-layered example of the construction of gender in wider society and the interrelationships between sport, culture and the media. This is the first book to explore the case in depth, from socio-cultural, ethical and legal perspectives. Analysing what came to be called "the Caster Semenya Case" in a comprehensive and multi-disciplinary fashion, and covering issues from media discourses and the rhetoric and regulations of the sport's governing bodies to the reaction of the athlete herself, the book explores the ethics of how gender norms in sport, and in society more

generally, are constructed through appearance, behaviour and sporting performance. This 2009 controversy can be taken as an indicator of the tensions of the time, and served as a link between medical sciences, society and gender. Including discussions of key concepts such as 'intersex', 'body norms', and 'fairness', *Gender Testing in Sport* is fascinating and important reading for anybody with an interest in sport studies, gender studies or biomedical ethics.

Dispute Resolution in Sport - David McArdle 2014-09-19

An increasing number of sport disputes are being resolved by way of arbitration. This is the first book to critically examine the processes and benefits of sportspecific arbitration as compared to litigation. The book explores, in depth, the development of alternative dispute resolutions in sports, paying particular attention to high-profile institutions such as the Court of Arbitration for Sport, the FIFA Football Dispute Resolution Panel and important national-level bodies, and their relationship with national and international-level actors such as the IOC, WADA and the European Union. It also examines in detail the legal frameworks within which sports arbitration systems operate, considers their similarities with

other arbitral bodies and considers the extent to which ADR in sport can be seen as a consequence of, and perhaps a solution to, the 'juridification' of sports. Offering a theoretical basis with which to understand the relationship between arbitration and litigation, as well as providing guidance on key contemporary issues and best practice, this book is important reading for students, researchers and practitioners working in sports law, sports management and administration, sports politics, sports ethics, and international organisation.
