The Future of Nursing - Institute of Medicine
2011-02-08

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as

a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint

for the future of nursing.

In the Nation's Compelling Interest - Institute of Medicine 2004-06-29

The United States is rapidly transforming into one of the most racially and ethnically diverse nations in the world. Groups commonly referred to as

minorities-including Asian Americans, Pacific Islanders, African Americans, Hispanics, American Indians, and Alaska Natives-are the fastest growing segments of the population and emerging as the nation's majority. Despite the rapid growth of racial and ethnic minority groups, their representation among the nation's health professionals has grown only modestly in the past 25 years. This alarming disparity has prompted the recent creation of initiatives to increase diversity in health professions. In the Nation's Compelling Interest considers the benefits of greater racial and ethnic diversity, and identifies institutional and policy-level mechanisms to garner broad support among health professions leaders, community members, and other key stakeholders to implement these strategies.

Assessing the potential benefits of greater racial and ethnic diversity among health professionals will improve the access to and quality of healthcare for

Naoroji - Dinyar Patel 2020-05-12

The definitive biography of Dadabhai Naoroji, the nineteenth-century activist who founded the Indian National Congress, was the first British MP of Indian origin, and inspired Gandhi and Nehru. Mahatma Gandhi called Dadabhai Naoroji the “father of the nation,” a title that today is reserved for Gandhi himself. Dinyar Patel examines the extraordinary life of this foundational figure in India’s modern political history, a devastating critic of British colonialism who served in Parliament as the first-ever Indian MP, forged ties with anti-imperialists around the world, and established self-rule or swaraj as India’s objective. Naoroji’s political career evolved in three distinct phases. He began as the activist who formulated the “drain of wealth” theory, which held the British Raj responsible for India’s crippling poverty and devastating famines.

His ideas upended conventional wisdom holding that colonialism was beneficial for Indian subjects and put a generation of imperial officials on the defensive. Next, he attempted to influence the British Parliament to institute political reforms. He immersed himself in British politics, forging links with socialists, Irish home rulers, suffragists, and critics of empire. With these allies, Naoroji clinched his landmark election to the House of Commons in 1892, an event noticed by colonial subjects around the world. Finally, in his twilight years he grew disillusioned with parliamentary politics and became more radical. He strengthened his ties with British and European socialists, reached out to American anti-imperialists and Progressives, and fully enunciated his demand for swaraj. Only self-rule, he declared, could remedy the economic ills brought about by British control in India. Naoroji is the first comprehensive study of the most

significant Indian nationalist leader before Gandhi.
