Brilliant Silence - Spencer Holst 2000

A legendary storyteller and writer who has charmed New York audiences for decades, Holst first evolved his oeuvre in the 1950s-60s milieu of Greenwich Village, influenced as much by sophisticated poets/writers (e.g. Hart Crane, Jorge Luis Borges) as by fairy tales/tall-tales which his writings superficially resemble. Each of his sentences, paragraphs, and very, very short stories is a complete and independent act of narrative that delivers the very essence of narrative fiction. In spite of their brevity, these are works of great variety and complexity, displaying a fine intelligence and an inexhaustible capacity for verbal surprise. Holst breaks the very frame of what a story is and what language can do.

Sol Plaatje's Mhudi - Sabatampho Mokae 2021

"Sol Plaatje's Mhudi is the first full-length novel in English to have been written by a black South African and is widely regarded as one of South

Africa's most important literary works. Set in the 1830s, it tells the tale of Mhudi and Ra-Thaga, a romantic story set against a violent backdrop of war between Barolong and Matebele, complicated by the intrusions of Boer trekkers with whom the Barolong form an alliance. It is notable, among other things, for the way Plaatje uses the past to explore the roots of the oppression and injustice suffered by his people a century later, when the book was written"--Page 4 of cover

Becoming Anorexic - Muriel Darmon 2016-10-04
Anorexia tends to be studied within health disciplines, such as medicine, psychoanalysis or psychology. When the condition is discussed in relation to society more broadly, focus is commonly restricted to considerations about the demise of the traditional family meal or the all-pervading obsession with thinness and

media representations of 'size zero' models. But what can sociology tell us about anorexia and how a person becomes anorexic? This book draws on empirical research - both interviews and observation - conducted in and outside medical settings with anorexic girls, medical staff, teachers and other teenagers of the same age. As such, it offers the first fully sociological treatment of the condition, taking the reader closer to the actual experiences of people living with anorexia. It retraces the behaviours, practices and processes that create what is patterned as an anorexic 'career' and reveals the cultural and social characteristics of the people who engage on this path taking them from a simple diet to hospitalization or recovery. Richly illustrated with qualitative research, *Becoming Anorexic: A Sociological Approach* demonstrates that anorexia can be viewed as a very particular work of self-transformation, which requires specific - and social - 'dispositions'. As such, it will

appeal to scholars of sociology and anthropology with an interest in health and illness, the body, social class and gender.

History as a Profession - Pim den Boer 1998

This is a vivid portrait of the French historical profession in

the nineteenth and early twentieth centuries, concluding just before the emergence of the famous Annales school of historians. It places the profession in its social, academic, and political context and shows that historians of the period have been unfairly maligned as amateurish and primitive in comparison to their more celebrated successors. Pim den Boer begins by sketching the contours of French historiography in the nineteenth century, examining the quantity of historical writing, its subject matter, and who wrote it. He traces the growing influence of professional historians. He shows the increasing involvement of the national government in historical studies, paying special attention to the impact of political factions, ranging from ultraroyalists to radical republicans. He explores how historical research and teaching changed at schools and universities. And he shows how nineteenth-century historians' keen understanding of the past

and of historical methodology laid the foundations for historiography in the twentieth century. archives, including official documents, confidential reports, and personal letters. Den Boer makes use of statistical, biographical, and methodological analysis and demonstrates comprehensive knowledge of both minor historians and leading scholars, including Charles Seignobos and Charles-Victor Langlois. Originally published in 1998. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press.
