Pieces for Children - Béla Bartók

Selected from the two volumes of Bartóks For Children, these 42 works were written without octaves to fit the hands of younger players. Each piece has a descriptive title, with half including the words "song" or "dance". Like much of the composer's writing, the pieces directly reflect the use of folk idioms.

Practical Aspects of Knowledge Management - Dimitris Karagiannis 2004-12-01

This book contains the papers presented at the 5th International Conference on Practical Aspects of Knowledge Management organized by the Department of Knowledge Management, Institute of Computer Science and Business Informatics, University of Vienna. The event took place on December 02-03, 2004 in Vienna. The PAKM conference series offers a communication forum and meeting ground for practitioners and researchers engaged in developing and deploying advanced business solutions for the management of knowledge and intellectual capital. Contributions pursuing integrated approaches

which consider organizational, technological and cultural issues of knowledge management have been elected for presentation. PAKM is a forum for people to share their views, to exchange ideas, to develop new insights, and to envision completely new kinds of solutions for knowledge management problems. The accepted papers are of high quality and are not too specialized so that the main issues can be understood by someone outside the respective field. This is crucial for an interdisciplinary exchange of ideas. Like its predecessors, PAKM 2004 featured two invited talks. It is a real joy seeing the visibility of the conference increase and noting that knowledge management researchers and practitioners from all over the world submitted papers. This year, 163 papers and case studies were submitted, from which 48 were accepted.

Facade Construction Manual - Thomas Herzog 2004-01-01
«Facade Construction Manual» provides a systematic survey of contemporary expertise in the application of new materials and energy-efficient technologies in facade design. It surveys the facade design requirements made by various types of buildings, as well as the most important materials, from natural stone through to synthetics, and documents a diversity of construction forms for a wide range of building types.

Ijrvet International Journal for Research in Vocational Education and Training - Michael Gessler 2019-01-07
The International Journal for Research in Vocational Education and Training (IJRVET) is a double blind peer-reviewed journal for VET-related research. This journal provides full open electronic access to its content on the principle that making research freely available to the science community and the public supports a greater global exchange of knowledge and the further development of expertise in the field of Vocational Education and Training (understood in a wide sense and also known as e.g. TVET Technical Vocational Education and Training, Professional Education and Training, Career and Technical Education, Workforce Education). All articles can also be downloaded from the IJRVET Homeage: <http://www.ijrvet.net>. IJRVET covers all topics of VET-related research from Career and Technical Education (CTE) and Initial Vocational Education and Training (IVET) to Workforce Education and Continuing Vocational Education and Training (CVET). The Yearbook includes all electronic articles published in 2018

Virtual Art - Oliver Grau 2004-09-17

An overview of the art historical antecedents to virtual

reality and the impact of virtual reality on contemporary conceptions of art. Although many people view virtual reality as a totally new phenomenon, it has its foundations in an unrecognized history of immersive images. Indeed, the search for illusionary visual space can be traced back to antiquity. In this book, Oliver Grau shows how virtual art fits into the art history of illusion and immersion. He describes the metamorphosis of the concepts of art and the image and relates those concepts to interactive art, interface design, agents, telepresence, and image evolution. Grau retells art history as media history, helping us to understand the phenomenon of virtual reality beyond the hype. Grau shows how each epoch used the technical means available to produce maximum illusion. He discusses frescoes such as those in the Villa dei Misteri in Pompeii and the gardens of the Villa Livia near Prima porta, Renaissance and Baroque illusion spaces, and panoramas, which were the most developed form of illusion achieved through traditional methods of painting and the mass image medium before film. Through a detailed analysis of perhaps the most important German panorama, Anton von Werner's 1883 The Battle of Sedan, Grau shows how immersion produced emotional responses. He traces immersive cinema through Cinerama, Sensorama, Expanded Cinema, 3-D, Omnimax and IMAX, and the head mounted display with its military origins. He also examines those characteristics of virtual reality that distinguish it from earlier forms of illusionary art. His analysis draws on the work of contemporary artists and groups ART+COM, Maurice Benayoun, Charlotte Davies, Monika Fleischmann, Ken Goldberg, Agnes Hegedues, Eduardo Kac, Knowbotic Research, Laurent Mignonneau, Michael Naimark, Simon Penny, Daniela Plewe, Paul

Sermon, Jeffrey Shaw, Karl Sims, Christa Sommerer, and Wolfgang Strauss. Grau offers not just a history of illusionary space but also a theoretical framework for analyzing its phenomenologies, functions, and strategies throughout history and into the future.

Koji Alchemy - Jeremy Umansky 2020-05-04

The first book devoted to processes, concepts, and recipes for fermenting and culturing foods with koji, the microbe behind the delicious, umami flavors of soy sauce, miso, mirin, and so many of the ingredients that underpin Japanese cuisine Koji Alchemy chefs Jeremy Umansky and Rich Shih—collectively considered to be the most practical, experienced, generous educators on the culinary power of this unique ingredient—deliver a comprehensive look at modern koji use around the world. Using it to rapidly age charcuterie, cheese, and other ferments, they take the magic of koji to the next level, revolutionizing the creation of fermented foods and flavor profiles for both professional and home cooks. Koji Alchemy includes: A foreword by best-selling author Sandor Katz (The Art of Fermentation) Cutting-edge techniques on koji growing and curing Information on equipment and setting up your kitchen More than 35 recipes for sauces, pastes, ferments, and alcohol, including stand-outs like Popcorn Koji, Roasted Entire Squash Miso, Korean Makgeolli, Amazake Rye Bread, and more “Koji Alchemy is empowering and does much to open the door to further creativity and innovation. . . . I can’t wait to see and taste the next wave of koji experimentation it inspires.” —Sandor Katz

Studies in the History of Accounting - Ananias Charles Littleton 2017-10-26

bookdown - Yihui Xie 2016-12-12

bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not

only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

The Art of Structuring - Katrin Bergener 2019-01-25
Structuring, or, as it is referred to in the title of this book, the art of structuring, is one of the core elements in the discipline of Information Systems. While the world is becoming increasingly complex, and a growing number of disciplines are evolving to help make it a better place, structure is what is needed in order to understand and combine the various perspectives and approaches involved. Structure is the essential component that allows us to bridge the gaps between these different worlds, and offers a medium for communication and exchange. The contributions in this book build these bridges, which are vital in order to communicate between different worlds of thought and methodology – be it between Information Systems (IS) research and practice, or between IS research and other research disciplines. They describe how structuring can be and should be done so as to foster communication and collaboration. The topics covered reflect various layers of structure that can serve as bridges: models, processes, data, organizations, and technologies. In turn, these aspects are complemented by visionary outlooks on how structure influences the field.

The Once-Only Principle - Robert Krimmer 2021-07-02

This open access State-of-the-Art Survey describes and documents the developments and results of the Once-Only Principle Project (TOOP). The Once-Only Principle (OOP) is part of the seven underlying principles of the eGovernment Action Plan 2016-2020. It aims to make the government more effective and to reduce administrative burdens by asking citizens and companies to provide certain standard information to the public authorities only once. The project was horizontal and policy-driven with the aim of showing that the implementation of OOP in a cross-border and cross-sector setting is feasible. The book summarizes the results of the project from policy, organizational, architectural, and technical points of view.

Trauma and Guilt - Susanne Veas-Gulani 2003-01-01

This book analyzes postwar literary works on large area bombings of German cities both in the context of trauma theory and questions of guilt and shame about Germany's Nazi past, embedding the recent debate surrounding the air war of World War II and its influence on German culture in a broader historical, societal, and psychological context.

Edited by Gerfried Stocker and Christine Schepf. Essays by Peter J. Bentley, Erkki Huhtamo, Friedrich Kittler and Pierre Levy.

Advances in Human Factors and Systems Interaction -

Isabel L. Nunes 2020-06-30

This book presents cutting-edge research on innovative system interfaces, highlighting both lifecycle development and human–technology interaction, especially in virtual, augmented and mixed reality systems. It describes advanced methodologies and tools for evaluating and improving interface usability, and

discusses new models, case studies and good practices. The book addresses the human, hardware, and software factors in the process of developing interfaces for optimizing total system performance, while minimizing costs. It also highlights the forces currently shaping the nature of computing and systems, such as the importance of portability and technologies for reducing power requirements; the need for better assimilation of computation in the environment; and solutions to promote computer and system accessibility for people with special needs. Based on the AHFE 2020 Virtual Conference on Human Factors and Systems Interaction, held on July 16–20, 2020, the book offers a timely survey and a practice-oriented guide for systems interface users and developers alike.

Die heutige Bedeutung oraler Traditionen / The Present-Day Importance of Oral Traditions - Walther Heissig 1998
Besondere Aufmerksamkeit verdient das Problem der Archivierung von Tonbandaufnahmen. Sie stellen oft die einzigen Dokumente dahinschwinden der mündlichen Überlieferungen dar; um ihre Erhaltung sollte man daher überaus besorgt sein, zumal Tonbandaufnahmen durch zahlreiche Einflüsse, nicht zuletzt durch die kosmische Strahlung, permanent gefährdet sind. Auf der Arbeitstagung fand unter den Teilnehmern ein Erfahrungsaustausch über die derzeit und in naher Zukunft am besten geeigneten Tonträger zur Archivierung von Tonbandaufnahmen statt. Die Probleme der Archivierung von mündlichen Überlieferungen gehen jedoch weit über die der Archivierung von Tonbandaufnahmen hinaus. Vor allem in Osteuropa gibt es außerordentlich umfangreiche Archive schriftlich aufgezeichneter mündlicher Traditionen. So begann beispielsweise die Sammelstätigkeit der Esten auf diesem Gebiet bereits im 17.

Jahrhundert. Das Archiv der Estnischen Folklore umfaßte 1981 nicht weniger als 1.134.020 Seiten und 33.995 Stücke in einer Phonotheke. Das Material aus diesen Archivalsammlungen wurde bislang nur zu einem Bruchteil veröffentlicht und wissenschaftlich bearbeitet. Das Problem der Bewältigung solcher Stoffmassen, auch mit modernen Methoden der Daten- und Textverarbeitung, beschäftigt zahlreiche Wissenschaftler. 3. Zum Problem der Publikation von mündlichen Überlieferungen wurde die Frage erörtert, welche Auswahl aus dem in der Regel sehr umfangreichen Material nach welchen Kriterien getroffen werden sollte. Mit dem "Normales" taucht die Frage nach populären bzw. wissenschaftlichen Editionen auf.
Metallurgy in Antiquity - Robert James Forbes 1950

Now-time Image-space - Kia Lindroos 1998
Lindroos constructs an alternative interpretation on history, time, politics and art, approached through the moment of the Now (Jetztzeit). In the first section, she elaborates the critique of chronologic-linear way of understanding history. Through a close reading of Benjamin's "Work of Art" essay, the second section examines the problems of origins, authenticity and traditions of art through the ideas of artistic avant-garde and politicization of aesthetics. The end of the book discusses the concept of image and the new images as an Image-Space (Bildraum) of action.

Language and Economy - Florian Coulmas 1992-01-01

Late Medieval and Early Modern Fight Books - 2016-06-27
Late Medieval and Early Modern Fight Books offers insights into the cultural and historical transmission and practices of martial arts, based on interdisciplinary research on the corpus of the Fight

Books (Fechtbücher) in 14th- to 17th-century Europe.

History of Computer Art - Thomas Dreher 2020-08-20

The development of the use of computers and software in art from the Fifties to the present is explained. As general aspects of the history of computer art an interface model and three dominant modes to use computational processes (generative, modular, hypertextual) are presented. The "History of Computer Art" features examples of early developments in media like cybernetic sculptures, computer graphics and animation (including music videos and demos), video and computer games, reactive installations, virtual reality, evolutionary art and net art. The functions of relevant art works are explained more detailed than usual in such histories.

The Democratization of Artificial Intelligence - Andreas Sudmann 2019-10-31

After a long time of neglect, Artificial Intelligence is once again at the center of most of our political, economic, and socio-cultural debates. Recent advances in the field of Artificial Neural Networks have led to a renaissance of dystopian and utopian speculations on an AI-rendered future. Algorithmic technologies are deployed for identifying potential terrorists through vast surveillance networks, for producing sentencing guidelines and recidivism risk profiles in criminal justice systems, for demographic and psychographic targeting of bodies for advertising or propaganda, and more generally for automating the analysis of language, text, and images. Against this background, the aim of this book is to discuss the heterogenous conditions, implications, and effects of modern AI and Internet technologies in terms of their political dimension: What does it mean to critically investigate efforts of net

politics in the age of machine learning algorithms?

Drinking Against Death - Louis D. Nebelsick 2016-12-31

The nine interrelated chapters in this book aim to identify and describe the iconographies and trace fossils of ritual and religion in late prehistoric Europe - to infuse them with meaning, celebrate their complexity and integrate the ideas, which they evoke into the rich tapestry of historically transmitted ancient European and Mediterranean ideology, mythology and ritual. This book explores libation and feasting, engendered patterns of communication, ritual drama and iconographic creativity. Case studies range from 13th century BC Bavarian ostentatious graves, 9th century Scandinavian bog hoards, 8th century Austrian women's chambered tombs, 7th century Lusatian children's graves to 6th century BC Scythian kurgans from the Ukraine. A thick description of ancient European ideology emerges demonstrating that non-literate communities were developing surprisingly vibrant and sophisticated solutions to the problems posed by transcending death, revering the ancestors and communicating between earth and eternity.

Proceedings of the 21st Congress of the International Ergonomics Association (IEA 2021) - Nancy L. Black 2021-05-04

This book presents the proceedings of the 21st Congress of the International Ergonomics Association (IEA 2021), held online on June 13-18, 2021. By highlighting the latest theories and models, as well as cutting-edge technologies and applications, and by combining findings from a range of disciplines including engineering, design, robotics, healthcare, management, computer science, human biology and behavioral science, it provides researchers and practitioners alike with a

comprehensive, timely guide on human factors and ergonomics. It also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance, while at the same time promoting the health, safety and wellbeing of individuals. The proceedings include papers from researchers and practitioners, scientists and physicians, institutional leaders, managers and policy makers that contribute to constructing the Human Factors and Ergonomics approach across a variety of methodologies, domains and productive sectors. This volume includes papers addressing the following topics: Ergonomics in Design for All, Human Factors and Sustainable Development, Gender and Work, Slips Trips and Falls, Visual Ergonomics, Ergonomics for children and Educational Environments, Ageing and Work.

Le Cycle Harmonique (Rotterdam 1691) - Christiaan Huygens 1986

Muziektheoretische studie van de Nederlandse wis-, natuurkundige en astronoom (1629-1695)

6 Viennese Sonatinas - Wolfgang Amadeus Mozart 2005-05-03

Originally composed for three wind instruments, these popular piano transcriptions were first published in the early 1800s. Easier than Mozart's piano sonatas, they remain favorite teaching pieces and are beautiful examples of the composer's mature classical style.

Unlike other editions, this carefully edited volume restores Mozart's articulation markings and the original pairing of several menuet and trio movements that were previously mismatched. A discussion of Mozart's ornamentation and articulation is also included.

Object Fantasies - Philippe Cordez 2018-09-10

In the modern lexicon, 'object' refers to an entity that is materially constituted, spatially defined, and functionally determined. In contrast, the Latin word 'fantasia' has, since antiquity, referred to an apparition or the ability to imagine something that could be equally an object, an image, or a concept. This tension prompts further inquiry into the interrelations and differences between the experience of tangible objects (their perception and handling) and the creation of new objects (their conception and formation). What correlations exist between object fantasies, the self-consciousness of subjects, and the concrete and imagined conditions of human beings' social lives? By addressing this question, this interdisciplinary book opens new perspectives in the field of object studies.

Zoology in Early Modern Culture: Intersections of Science, Theology, Philology, and Political and Religious Education - 2014-10-09

This volume tries to map out the intriguing amalgam of different, partly conflicting approaches that shaped early modern zoology. It demonstrates that theology and philology played a pivotal role in the complex formation of this new science.

Keys to Play - Roger Moseley 2016-10-28

A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program for monographs. Visit www.luminosoa.org to learn more. How do keyboards make music playable? Drawing on theories of media, systems, and cultural techniques, Keys to Play spans Greek myth and contemporary Japanese digital games to chart a genealogy of musical play and its animation via improvisation, performance, and recreation. As a paradigmatic digital interface, the keyboard forms a

field of play on which the book's diverse objects of inquiry—from clavichords to PCs and eighteenth-century musical dice games to the latest rhythm-action titles—enter into analogical relations. Remapping the keyboard's topography by way of Mozart and Super Mario, who head an expansive cast of historical and virtual actors, *Keys to Play* invites readers to unlock ludic dimensions of music that are at once old and new.

Crisis and Critique: Philosophical Analysis and Current Events - Anne Siegetsleitner 2021-06-08

Contemporary deep-reaching changes – whether in financial or real economy, in Europe's political conditions, in the context of scientific theories, in the field of global (environmental) security, or gender relations – are also a challenge to philosophy. The volume comprises cutting-edge scholarly articles from renowned philosophers with various geographical backgrounds and from different philosophical strands. Next to investigating general questions as to the relation of philosophy and critique (What is philosophical critique and which philosophical concepts of critique are of importance today? Where do we need it most? Where are its limits?), the articles focus on issues like theories of democracy and modes of election; the roles of emotions in the political realm; challenges from a widespread discontent in society to politics and science; changes to social identities and different theoretical approaches to social identity formation. The book is indispensable for all who are interested in what contemporary philosophy has to say on crucial issues of our time.

Physical Sciences and Engineering - Tibor W. Marton 1964

Foundations of Music History - Carl Dahlhaus 1983-02-24
A study of the philosophy of music history.

Style and Music - Leonard B. Meyer 1996

Leonard Meyer proposes a theory of style and style change that relates the choices made by composers to the constraints of psychology, cultural context, and musical traditions. He explores why, out of the abundance of compositional possibilities, composers choose to replicate some patterns and neglect others. Meyer devotes the latter part of his book to a sketch-history of nineteenth-century music. He shows explicitly how the beliefs and attitudes of Romanticism influenced the choices of composers from Beethoven to Mahler and into our own time. "A monumental work. . . . Most authors concede the relation of music to its cultural milieu, but few have probed so deeply in demonstrating this interaction."—Choice "Probes the foundations of musical research precisely at the joints where theory and history fold into one another."—Kevin Korsyn, *Journal of American Musicological Society* "A remarkably rich and multifaceted, yet unified argument. . . . No one else could have brought off this immense project with anything like Meyer's command."—Robert P. Morgan, *Music Perception* "Anyone who attempts to deal with Romanticism in scholarly depth must bring to the task not only musical and historical expertise but unquenchable optimism. Because Leonard B. Meyer has those qualities in abundance, he has been able to offer fresh insight into the Romantic concept."—Donal Henahan, *New York Times*

Of Trees and Birds - Alexiadou, Artemis 2019

Gisbert Fanselow's work has been invaluable and

inspiring to many researchers working on syntax, morphology, and information structure, both from a theoretical and from an experimental perspective. This volume comprises a collection of articles dedicated to Gisbert on the occasion of his 60th birthday, covering a range of topics from these areas and beyond. The contributions have in common that in a broad sense they have to do with language structures (and thus trees), and that in a more specific sense they have to do with birds. They thus cover two of Gisbert's major interests in- and outside of the linguistic world (and perhaps even at the interface).

E-Learning in Europe - Learning Europe - Michael Kindt, Ullrich Dittler, Helge Kahler

This book contains contributions about the past, present and future of e-learning in twelve European countries. The papers are written by experts about their respective countries, together with one paper that deals with the subject from a transnational perspective. The main question treated and answered in this book is how digital media has contributed to Higher Education Development in different national contexts. Beyond a mere description of the situation in different countries, the socio-technical approach adopted in this book also offers the opportunity to make comparisons and thus fosters understanding between experts from different disciplines and cultures. This book takes stock of a decade of digital media in Higher Education in Europe by presenting a first comparative approach and encouraging discussion by adopting a relativist rather than a generalist approach. Readers are thus stimulated to envisage how e-learning might have developed in their own work and learning context and to shape how it may do so.

Cultural Disjunctions - Paul Mendes-Flohr 2021-07-20
"Contemporary Jews variously configure their identity, which is no longer necessarily defined by an observance of the Torah and God's commandments. Indeed, the Jews of modernity are no longer exclusively Jewish. They are affiliated with many communities-vocational, professional, political, and cultural-whose interests may not coincide with that of the community of their birth and inherited culture. In *Cultural Disjunctions*, Paul Mendes-Flohr explores the possibility of a spiritually and intellectually engaged cosmopolitan Jewish identity for our time. To ground this project, he draws on the sociology of knowledge and cultural hermeneutics to reflect on the need to participate in the life of a community so that it enables multiple relations beyond its borders and allows one to balance a commitment to the local and a genuine obligation to the universal. Over the course of six provocative chapters, Mendes-Flohr lays out what this delicate balance can look like for contemporary Jews, both in the Diaspora and in Israel. Mendes-Flohr takes us through the ghettos of twentieth-century Europe, the differences between the personal libraries of traditional and secular Jews, and the role of cultural memory. Ultimately, the author calls for Jews to remain discontent with themselves (as a check on hubris), but also discontent with the social and political order, and to fight for its betterment"--
Technology's Pulse - Michael J. Cowan 2011

Modernity, as has often been observed, was fundamentally concerned with questions of temporality. The period around 1900, in particular, witnessed numerous efforts to define, discipline or 'liberate' temporal experience. Within this broader framework of thinking about temporality, 'rhythm' came to form the object of an

intense and widespread preoccupation. Rhythmical research played a central role not only in the reconceptualisation of human physiology and labour in the late nineteenth century, but also in the emergence of a new leisure culture in the early twentieth. The book traces the ways in which notions of 'rhythm' were mobilised both to conceptualise modernity (narrate its origins and prescribe its directions) and, in particular, to forge a new understanding of temporal media that came to mark the mass-mediated experience of the 1920s: a conception of artistic media as mediators between the organic and the rational, the time of the body and that of the machine. Michael Cowan is Associate Professor of German and World Cinemas at McGill University. He is the author of *Cult of the Will: Nervousness and German Modernity* (2008), as well as several articles and collections on German literature, film, media and cultural history.

Deep Time of the Media - Siegfried Zielinski 2006

"Deep Time of the Media takes us on an archaeological quest into the hidden layers of media development - dynamic moments of intense activity in media design and construction that have been largely ignored in the historical-media archaeological record. Siegfried Zielinski argues that the history of the media does not proceed predictably from primitive tools to complex machinery. In *Deep Time of the Media*, he illuminates turning points of media history - fractures in the predictable - that help us see the new in the old."--

Music Theory For Dummies - Michael Pilhofer 2011-10-07
Grasp the concepts needed to compose, deconstruct, and comprehend music Whether you're a student of music or a music lover, *Music Theory For Dummies* presents you with essential information on how to read, write, and understand music, as well as helpful hints on composing, arranging, and creating original melodies, harmonies, and chords. *Music Theory For Dummies* gives you a friendly, unintimidating overview of the material covered in a typical college-level course and makes music theory easy to understand. It includes updated information on current teaching techniques; the newest music examples and genres; information on mastering major and minor scales, using intervals, and recognizing pitches and clefs; the lowdown on rhythms, tempo, dynamics, and navigation; how to transcribe the music you hear and transposing it to other keys; harmonizing and accompanying melodies; composing and arranging for voices and instruments; performing your own music; and much more. Audio CD includes musical excerpts played on a variety of instruments Makes learning music theory as enjoyable as it is useful Tracks to a typical college-level music theory course Don't get discouraged by the seemingly complicated written structure of musical theory. With *Music Theory For Dummies*, understanding music has never been easier! CD-ROM/DVD and other supplementary materials are not included as part of the e-book file, but are available for download after purchase.
