A Field Guide to Lies - Daniel J.
Levitin 2016-09-06

From The New York Times bestselling
author of THE ORGANIZED MIND and THIS
IS YOUR BRAIN ON MUSIC, a primer to
the critical thinking that is more
necessary now than ever. We are
bombarded with more information each
day than our brains can
process—especially in election
season. It's raining bad data, half-
truths, and even outright lies. New
York Times bestselling author Daniel

J. Levitin shows how to recognize
misleading announcements, statistics,
graphs, and written reports revealing
the ways lying weasels can use them.
It's becoming harder to separate the
wheat from the digital chaff. How do
we distinguish misinformation,
pseudo-facts, distortions, and
outright lies from reliable
information? Levitin groups his field
guide into two categories—statistical
information and faulty
arguments—ultimately showing how
science is the bedrock of critical
thinking. Infoliteracy means
understanding that there are
hierarchies of source quality and
bias that variously distort our
information feeds via every media
channel, including social media. We
may expect newspapers, bloggers, the
government, and Wikipedia to be

factually and logically correct, but they so often aren't. We need to think critically about the words and numbers we encounter if we want to be successful at work, at play, and in making the most of our lives. This means checking the plausibility and reasoning—not passively accepting information, repeating it, and making decisions based on it. Readers learn to avoid the extremes of passive gullibility and cynical rejection. Levitin's charming, entertaining, accessible guide can help anyone wake up to a whole lot of things that aren't so. And catch some lying weasels in their tracks!

The System of Objects - Jean Baudrillard 2020-04-07

The System of Objects is a tour de force—a theoretical letter-in-a-bottle tossed into the ocean in 1968, which brilliantly communicates to us

all the live ideas of the day. Pressing Freudian and Saussurean categories into the service of a basically Marxist perspective, The System of Objects offers a cultural critique of the commodity in consumer society. Baudrillard classifies the everyday objects of the “new technical order” as functional, nonfunctional and metafunctional. He contrasts “modern” and “traditional” functional objects, subjecting home furnishing and interior design to a celebrated semiological analysis. His treatment of nonfunctional or “marginal” objects focuses on antiques and the psychology of collecting, while the metafunctional category extends to the useless, the aberrant and even the “schizofunctional.” Finally, Baudrillard deals at length with the

implications of credit and advertising for the commodification of everyday life. The System of Objects is a tour de force of the materialist semiotics of the early Baudrillard, who emerges in retrospect as something of a lightning rod for all the live ideas of the day: Bataille’s political economy of “expenditure” and Mauss’s theory of the gift; Reisman’s lonely crowd and the “technological society” of Jacques Ellul; the structuralism of Roland Barthes in The System of Fashion; Henri Lefebvre’s work on the social construction of space; and last, but not least, Guy Debord’s situationist critique of the spectacle.

Post-Communist Mafia State - B lint Magyar 2016-03-01

Having won a two-third majority in

Parliament at the 2010 elections, the Hungarian political party Fidesz removed many of the institutional obstacles of exerting power. Just like the party, the state itself was placed under the control of a single individual, who since then has applied the techniques used within his party to enforce submission and obedience onto society as a whole. In a new approach the author characterizes the system as the 'organized over-world', the 'state employing mafia methods' and the 'adopted political family', applying these categories not as metaphors but elements of a coherent conceptual framework. The actions of the post-communist mafia state model are closely aligned with the interests of power and wealth concentrated in the hands of a small group of insiders.

While the traditional mafia channeled wealth and economic players into its spheres of influence by means of direct coercion, the mafia state does the same by means of parliamentary legislation, legal prosecution, tax authority, police forces and secret service. The innovative conceptual framework of the book is important and timely not only for Hungary, but also for other post-communist countries subjected to autocratic rules. ÿ

The Feminine Mystique - Betty Friedan 2010

When Betty Friedan produced The Feminine Mystique in 1963, she could not have realized how the discovery and debate of her contemporaries' general malaise would shake up society. Victims of a false belief system, these women were following strict social convention by loyally conforming to the pretty image of the magazines, and found themselves forced to seek meaning in their lives only through a family and a home. Friedan's controversial book about these women - and every woman - would ultimately set Second Wave feminism in motion and begin the battle for equality. This groundbreaking and life-changing work remains just as powerful, important and true as it was forty-five years ago, and is

essential reading both as a historical document and as a study of women living in a man's world. 'One of the most influential nonfiction books of the twentieth century.' Global Environmental Change -

National Research Council 1991-02-01

Global environmental change often seems to be the most carefully examined issue of our time. Yet understanding the human sideâ€"human causes of and responses to environmental changeâ€"has not yet received sustained attention. Global Environmental Change offers a strategy for combining the efforts of natural and social scientists to better understand how our actions

influence global change and how global change influences us. The volume is accessible to the nonscientist and provides a wide range of examples and case studies. It explores how the attitudes and actions of individuals, governments, and organizations intertwine to leave their mark on the health of the planet. The book focuses on establishing a framework for this new field of study, identifying problems that must be overcome if we are to deepen our understanding of the human dimensions of global change, presenting conclusions and recommendations.

The "People Power" Family Superbook: Book 13. Shopping Guide (Online Shopping, Product Reviews, Department Stores, Trade Shows, Closeout - Wholesale, Factory Outlets) - Tony

Kelbrat 2014-03-31

In my opinion, unless you're a total introvert, agoraphobic, disabled or too lazy to leave the house, your best bet to buy most things you need is locally. Go to the Yellow Pages, read your local newspapers, drive around the shopping areas, go to local free ad websites and talk to people you know about what you need. I generally buy most of my stuff from the big department stores but if I need something like furniture, I'll check out the furniture stores on the poor side of the town because the prices for the same goods are often much cheaper than a store in the higher class part of town plus you can often haggle with the owner on a cash deal. By shopping on the poor side of town at supermarkets for food, you can often save several

dollars on a load of groceries. Beyond that, I generally go to the thrift stores a few times a year to buy t-shirts, clothes and anything else that strikes my fancy as I look around.

The Day of the Triffids - John Wyndham 2010-07-01

The classic postapocalyptic thriller with “all the reality of a vividly realized nightmare” (The Times, London). Triffids are odd, interesting little plants that grow in everyone’s garden. Triffids are no more than mere curiosities—until an event occurs that alters human life forever. What seems to be a spectacular meteor shower turns into a bizarre, green inferno that blinds everyone and renders humankind helpless. What follows is even stranger: spores from the inferno

cause the triffids to suddenly take on a life of their own. They become large, crawling vegetation, with the ability to uproot and roam about the country, attacking humans and inflicting pain and agony. William Masen somehow managed to escape being blinded in the inferno, and now after leaving the hospital, he is one of the few survivors who can see. And he may be the only one who can save his species from chaos and eventual extinction . . . With more than a million copies sold, The Day of the Triffids is a landmark of speculative fiction, and “an outstanding and entertaining novel” (Library Journal). “A thoroughly English apocalypse, it rivals H. G. Wells in conveying how the everyday invaded by the alien would feel. No wonder Stephen King admires Wyndham so

much.” –Ramsey Campbell, author of The Overnight “One of my all-time favorite novels. It’s absolutely convincing, full of little telling details, and that sweet, warm sensation of horror and mystery.”

–Joe R. Lansdale, author of Edge of Dark Water

The Italian Slow Cooker - Michele Scicolone 2010-01-07

Finally a book that combines the fresh, exuberant flavors of great Italian food with the ease and comfort of a slow cooker. Michele Scicolone, a best-selling author and an authority on Italian cooking, shows how good ingredients and simple techniques can lift the usual “crockpot” fare into the dimension of fine food. Pasta with Meat and Mushroom Ragu, Osso Buco with Red Wine, Chicken with Peppers and

Mushrooms: These are dishes that even the most discriminating cook can proudly serve to company, yet all are so carefree that anyone with just five or ten minutes of prep time can make them on a weekday and return to perfection. Simmered in the slow cooker, soups, stews, beans, grains, pasta sauces, and fish are as healthy as they are delicious. Polenta and risotto, “stir-crazy” dishes that ordinarily need careful timing, are effortless. Meat loaves come out perfectly moist, tough cuts of meat turn succulent, and cheesecakes emerge flawless.

More Work For Mother - Ruth Schwartz Cowan 1985-03-11

In this classic work of women's history (winner of the 1984 Dexter Prize from the Society for the History of Technology), Ruth Schwartz Cowan shows how and why modern women devote as much time to housework as did their colonial sisters. In lively and provocative prose, Cowan explains how the modern conveniences—washing machines, white flour, vacuums, commercial cotton—seemed at first to offer working-class women middle-class standards of comfort. Over time, however, it became clear that these gadgets and gizmos mainly replaced work previously conducted by men, children, and servants. Instead of living lives of leisure, middle-class women found themselves struggling to keep up with ever higher standards of cleanliness.

Freedom's Forge - Arthur Herman
2012-05-08

NEW YORK TIMES BESTSELLER • SELECTED BY THE ECONOMIST AS ONE OF THE BEST BOOKS OF THE YEAR “A rambunctious book that is itself alive with the animal spirits of the marketplace.”—The Wall Street Journal
Freedom’s Forge reveals how two extraordinary American businessmen—General Motors automobile magnate William “Big Bill” Knudsen and shipbuilder Henry J. Kaiser—helped corral, cajole, and inspire business leaders across the

country to mobilize the “arsenal of democracy” that propelled the Allies to victory in World War II. Drafting top talent from companies like Chrysler, Republic Steel, Boeing, Lockheed, GE, and Frigidaire, Knudsen and Kaiser turned auto plants into aircraft factories and civilian assembly lines into fountains of munitions. In four short years they transformed America’s army from a hollow shell into a truly global force, laying the foundations for the country’s rise as an economic as well as military superpower. Freedom’s Forge vividly re-creates American industry’s finest hour, when the nation’s business elites put aside their pursuit of profits and set about saving the world. Praise for Freedom’s Forge “A rarely told industrial saga, rich with

particulars of the growing pains and eventual triumphs of American industry . . . Arthur Herman has set out to right an injustice: the loss, down history’s memory hole, of the epic achievements of American business in helping the United States and its allies win World War II.”—The New York Times Book Review
“Magnificent . . . It’s not often that a historian comes up with a fresh approach to an absolutely critical element of the Allied victory in World War II, but Pulitzer finalist Herman . . . has done just that.”—Kirkus Reviews (starred review) “A compulsively readable tribute to ‘the miracle of mass production.’ ”—Publishers Weekly “The production statistics cited by Mr. Herman . . . astound.”—The Economist
“[A] fantastic book.”—Forbes

"Freedom's Forge is the story of how the ingenuity and energy of the American private sector was turned loose to equip the finest military force on the face of the earth. In an era of gathering threats and shrinking defense budgets, it is a timely lesson told by one of the great historians of our time."—Donald Rumsfeld

Poor People's Movements - Frances Fox Piven
2012-02-08

Have the poor fared best by participating in conventional electoral politics or by engaging in mass defiance and disruption? The authors of the classic *Regulating The Poor* assess the successes and failures of these two strategies as they examine, in this provocative study, four protest movements of lower-class groups in 20th century

America: -- The mobilization of the unemployed during the Great Depression that gave rise to the Workers' Alliance of America -- The industrial strikes that resulted in the formation of the CIO -- The Southern Civil Rights Movement -- The movement of welfare recipients led by the National Welfare Rights Organization.
