The Canadian Almanac & Directory is the most complete source of Canadian information available - cultural, professional and financial institutions, legislative, governmental, judicial and educational organizations. Canada's authoritative sourcebook for almost 160 years, the Canadian Almanac & Directory gives you access to almost 100,000 names and addresses of contacts throughout the network of Canadian institutions.

Strengthening Forensic Science in the United States -
National Research Council 2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of

adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital

tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Guide to Microforms in Print - 1998

Biographical Dictionary of Councilors of the Indies, 1717-1808 - Mark A. Burkholder 1986

A valuable new reference work for students of the Spanish Empire, this dictionary presents biographies of the 172 men who served on the Council of the Indies--the supreme judicial tribunal for Spain's colonial empire--from the time of Philip V's reforms in 1717 to the French invasion in 1808. Based on the extensive documentation contained in Spanish archives and on various secondary sources, it offers a wealth of historical detail on a period that is important both to Spanish history and to the development of the New World.

American Universities and Colleges - American Council on Education 1997

**** Produced in collaboration with the American Council on Education. Previous editions are cited in BCL3 and Guide to Reference Books. Arranged by state, some 1,900 institutions are covered, including 58 for the first time. Material comes directly from the institutions themselves in response to a questionnaire. Entries provide both the essential statistical data (tuition, room, board, admissions requirements, financial aid, enrollments) and other information important to decision making (e.g. student life, library holdings, physical plant, study abroad programs). Enhancing the institution profiles are sections on foreign students at US institutions, professional education, and the history of higher education in the US, among other topics.

The Future of Nursing - Institute of Medicine 2011-02-08

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Atlanta Magazine - 2006-01

Atlanta magazine's editorial mission is to engage our community through provocative writing, authoritative reporting, and superlative design that illuminate the people, the issues, the trends, and the events that define our city. The magazine informs, challenges, and entertains our readers each month while helping them make intelligent choices, not only about what they do and where they go, but what they think about matters of

importance to the community and the region. Painter's Handbook - Mark David Gottsegen 2006-04-01

Much more than just another guide to artists' materials, The Painter's Handbook is an amazingly useful resource, with information on everything from the canvas up: the canvas itself, plus paper, sizes and grounds, pigments and binders, solvents and thinners, varnishes and preservatives. Dozens of step-by-step recipes for make-it-yourself paints, pastels, varnishes, gessos, sizes, supports, and equipment take this indispensable guide way beyond the competition. Authoritatively written by Mark David Gottsegen, chair of the federal government's ASTM committee on artist's materials, the revised Painter's Handbook considers the enormous changes in the art-materials world since the first edition was published in 1993. New materials, new health issues, new information on outmoded and even harmful supplies and practices mean that every painter needs a copy of The Painter's Handbook.

A Parallel Postsecondary Universe - Clifford Adelman 2000

This report describes a new system of credentialing that has arisen in the information technology and telecommunications industries over the past decade. It compares this system to traditional higher education, identifying both similarities and dissimilarities, and points to some cases in which the two interact.... The summary section of this report emphasizes the major themes of the certification system and its relationship to higher education: 1. The system is global and operates in many languages. 2. The student, not the institution, is at the center of the system. 3. The system has brought competency-based education and performance assessment to a status they have never enjoyed within traditional higher education. 4. Certification replace neither experience nor degrees, and the IT system does not pretend to be higher education. the summary also indicates the critical need for more information on certification candidates and providers of course work, since the new system is now large enough to play a role in state and national planning for postsecondary education. (HoF/text adopted).
