100 Things to See in the Night Sky,

Expanded Edition - Dean Regas 2020-06-16

Discover the amazing wonders of the night sky with this expanded edition to 100 Things to See in the Night Sky, perfect for every amateur stargazer and armchair astronomer! Keep your feet on the ground and experience the night sky to the fullest by exploring planets, satellites, and constellations with this all-inclusive reference guide to space. 100 Things to See in the Night Sky, Expanded Edition is full of information on the many amazing things you can see with a telescope, or just your naked eye! From shooting stars to constellations and planets to satellites, this book gives you a clear picture of what you can see on any given night. Learn about the celestial bodies that have captured people's imaginations for centuries, with specific facts alongside traditional myths and beautifully illustrated photographs and star charts that will help you know where to look for the best view. With this illuminating guide, you'll enjoy hours of stargazing, whether you're travelling, camping, sitting in your back yard, or simply flipping through the beautiful images in this book.

Facts from Space! - Dean Regas 2016-10-01

A guided tour through the universe--and beyond! From the sun's super-hot core to the many moons of Neptune, we're traveling to the far reaches of our solar system and beyond! Astronomer Dean Regas presents Facts from Space!--an exciting education on everything outside our atmosphere. Inside, you'll discover space facts and celestial trivia, including: A day on Venus is longer than its year. Early space missions ejected human waste into space, where it froze into intricate crystals that still float in space today. After being in space, some astronauts returned to Earth up to 2 inches taller than when they left. The stars in the Big Dipper are shifting among themselves and will look like a "Big Spatula" by the year 75,000. And more! Packed with fascinating information, it's a stellar read for sci-fi fans and at-home

astronomers alike!

Astronomy Lab for Kids - Michelle Nichols
2016-10

Introduces readers to the basics of space in lessons that can be done with everyday items from around your house.

My First Book of Planets: All about the Solar System for Kids - Bruce Betts 2020-06-16

Astronomy - Nomad Press 2015

Head outside and look up. What do you see? At night you might see stars, the moon, the Milky Way, and planets! During the day all these things will still be there, but they'll be hidden by the bright light of the sun. Astronomy is the study of celestial objects and what's beyond the nebulous boundaries of space. InAstronomy: Cool Women in Space, young readers will be inspired by stories of women who have made great strides in a field that takes courage, persistence, and creativity to pursue. Most

people have heard of Carl Sagan and Stephen Hawking, but have you heard of Maria Mitchell or Caroline Herschel? For many decades, female astronomers have been defining the field by making discoveries that changed the human relationship with space. *Astronomy: Cool Women in Space* will introduce young readers to three women who are bringing the science of astronomy forward and inspiring the next generation of astronomers. The primary sources, essential questions, and knowledge connections within *Astronomy: Cool Women in Space* encourage both boys and girls to explore our celestial world while being inspired to ask what role they might play in the next discovery. *About the Milky Way (Our Home Galaxy) : 3rd Grade Science Textbook Series* - Baby Professor 2015-12-20

Is your child interested to know what's out there? Well, let him see for himself! This beautiful book features the universe with all its twinkling stars and pretty planets. Use this book to encourage your child to like space science because it provides a memorable visual experience. Don't forget to grab a copy today!
