Unlocking the Magic of Facilitation - Sam Killermann 2016

Have you ever been in a training and marveled at how quickly the time flew by? Genuinely enjoyed a meeting you were expecting to dread? Learned something powerful about a topic you thought wouldn't engage you? Experienced an intimate, vulnerable, transformative moment with a group of total strangers? Then you've witnessed the magic of facilitation. Like all magic tricks - though they seem to defy reason when you're spectating for the first time - once the secrets of facilitation are unveiled to you, you'll look

back with a bland obviousness. Of course that's how it's done. In this book, co-authors and social justice facilitators Sam Killermann and Meg Bolger teach you how to perform the favorite tricks they keep up their sleeve. It's the learning they've accumulated from thousands of hours of facilitating, debriefing, challenging, and failing; it's the lessons from their mentors, channeled through their experience; it's the magician's secrets, revealed to the public, because it's about time folks have the privilege of looking behind the curtain of facilitation and thinking of course that's how it's done. This book highlights 11 key concepts every facilitator should know, that most facilitators don't even know they should know. They are sometimes-tiny things that show up huge in facilitation. It's a book for facilitators of all stripes, goals, backgrounds, and settings - and the digestible, enjoyable, actionable lessons would benefit anyone who is

responsible for engaging a group of people in learning. Presto Sketching - Ben Crothers 2017-10-19

Resonate - Nancy Duarte
2013-07-02

Reveals the underlying story form of all great presentations that will not only create impact, but will move people to action. Presentations are meant to inform, inspire, and persuade audiences. So why then do so many audiences leave feeling like they've wasted their time? All too often, presentations don't resonate with the audience and move them to transformative action. Just as the author's first book helped presenters

become visual communicators, *Resonate* helps you make a strong connection with your audience and lead them to purposeful action. The author's approach is simple: building a presentation today is a bit like writing a documentary. Using this approach, you'll convey your content with passion, persuasion, and impact. Author has a proven track record, including having created the slides in Al Gore's Oscar-winning *An Inconvenient Truth*. Focuses on content development methodologies that are not only fundamental but will move people to action. Upends the usual paradigm by making the audience the hero and the presenter the mentor. Shows how to use story techniques of conflict and resolution. Presentations don't have to be boring ordeals. You can make them fun, exciting, and full of meaning. Leave your audiences energized and ready to take action with *Resonate*.

Show and Tell - Dan Roam
2014-04-10

"If I tell you the truth, if I tell it with a story, and if I tell that story with pictures, I can keep you glued to your seat. Let me show you how." For the vast majority of us, giving a presentation is an extremely difficult and nerve-wracking process, whether we're in a one-on-one meeting, a conference room with a dozen strangers, or a lecture hall in front of thousands. But according to Dan Roam, the

visual communications expert and acclaimed author of *The Back of the Napkin*, it doesn't have to be so hard. We struggle when we forget the basic steps we learned in kindergarten: show and tell. In this short but powerful book, Roam introduces a new set of tools for making extraordinary presentations in any setting. He also draws on ideas he's been honing for more than two decades, as an award-winning presenter who has brought his whiteboard everywhere from Fortune 500 companies to tiny startups to the White House. Even if you're already a good speaker, you'll learn more about understanding your audience, organizing your content, building a clear storyline, creating effective visuals, and channeling your fear into fun. And you'll master three fundamental rules:

- When we tell the truth, we connect with our audience, we become passionate, and we find self-confidence.
- When we tell a story, we make complex concepts clear, we make ideas unforgettable, and we include

everyone. • When we use pictures, people see exactly what we mean, we captivate our audience's mind, and we banish boredom. From nailing the opening to leaving a lasting impression, you'll soon be able to give the performance of a lifetime . . . time after time. PLEASE NOTE: This eBook edition of SHOW AND TELL is carefully laid out to match the print book; this means it reads much better as designed pages, but you won't be able to use some features such as highlighting and annotating text.

Visual Thinking - Colin Ware
2010-07-27

Visual Thinking brings the science of perception to the art of design. Designers increasingly need to present information in ways that aid their audience's thinking process. Fortunately, results from the relatively new science of human visual perception provide valuable guidance. In this book, Colin Ware takes what we now know about perception, cognition, and attention and transforms it into concrete advice that designers can directly apply. He demonstrates how designs can be considered as tools for cognition - extensions of the viewer's brain in much the same way that a hammer is an extension of the user's hand.

The book includes hundreds of examples, many in the form of integrated text and full-color diagrams. Experienced professional designers and students alike will learn how to maximize the power of the information tools they design for the people who use them. Presents visual thinking as a complex process that can be supported in every stage using specific design techniques Provides practical, task-oriented information for designers and software developers charged with design responsibilities Includes hundreds of examples, many in the form of integrated text and full-color diagrams Steeped in the principles of "active vision, which views graphic designs as cognitive tools

SoulCollage - Seena B. Frost
2001

"SoulCollage™ is a process through which you contact your intuition and create an incredible deck of cards which have deep personal meaning and which will help you with

life's questions. Following the simple SoulCollage directions, your hands move fragments of cut-out magazine pictures around, fitting them together in a surprising new way and gluing them down on a card. Cards containing the images you select -- or the images that select you -- come straight through your Soul, bypassing the mind. This is a multi-leveled, creative process which anyone can do. All you need is a good pair of scissors, pre-cut mat board cards, glue, and images you can cut out from magazines, greeting cards, personal photos, postcards, catalogues, and calendars. It is wonderful to have other people with whom to share the process. The cards are fun to take to a friend's house, to work with in therapy or support groups, or to keep on your coffee table."--Publisher description.

Blah Blah Blah - Dan Roam
2011-11-01

Ever been to so many meetings that you couldn't get your work done? Ever fallen asleep during a bulletpoint presentation?

Ever watched the news and ended up knowing less? Welcome to the land of Blah Blah Blah. The Problem: We talk so much that we don't think very well. Powerful as words are, we fool ourselves when we think our words alone can detect, describe, and defuse the multifaceted problems of today. They can't—and that's bad, because words have become our default thinking tool. The Solution: This book offers a way out of blah-blah-blah. It's called "Vivid Thinking." In Dan Roam's first acclaimed book, *The Back of the Napkin*, he taught readers how to solve problems and sell ideas by drawing simple pictures. Now he proves that Vivid Thinking is even more powerful. This technique combines our verbal and visual minds so that we can think and learn more quickly, teach and inspire our colleagues, and enjoy and share ideas in a whole new way. The Destination: No more blah-blah-blah. Through Vivid Thinking, we can make the most complicated subjects

suddenly crystal clear. Whether trying to understand a Harvard Business School class, or what went down in the Conan versus Leno battle for late-night TV, or what Einstein thought about relativity, Vivid Thinking provides a way to clarify anything. Through dozens of guided examples, Roam proves that anyone can apply this systematic approach, from left-brain types who hate to draw to right-brainers who hate to write. This isn't just a book about improving communications, presentations, and ideation; it's about removing the blah-blah-blah from your life for good.
