AP Chinese Vocabulary Book Version 2020 - DAVID YAO

Advanced Placement is a program in the United States and Canada created by the College Board which offers college-level curricula and

examinations to high school students. American colleges and universities may grant placement and course credit to students who obtain high scores on the examinations. (Wikipedia) AP Chinese is similar to HSK (Chinese Proficiency Test) 6, which assesses test takers' abilities in the application of everyday Chinese. It is the counterpart of the Level VI of the Chinese Language Proficiency Scales for Speakers of Other Languages and the C2 Level of the Common European Framework of Reference (CEF). Test takers who are able to pass the HSK (Level VI) can easily comprehend written and spoken information in Chinese and can effectively express themselves in Chinese, both orally and on paper. All Chinese Vocabulary come with the Best English Translation for better understanding and our many years' experience in HSK and GCSE teaching. We also give HSK level classification which will give you a cross reference for your Chinese standard. Many students call it "LIFE SAVING" for their exam. It takes our years' painful effort to edit. The book give a quick revision for your coming exam! Grab it! Thanks for your support for us to creating better contents for you!

Fluent Forever - Gabriel Wyner 2014-08-05

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A

brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Gitars* Zero At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Mandarin Vocabulary (Blokehead Easy Study Guide) - The Blokehead 2015-06-10

Compared to other Latin-based and Indo-European languages, Mandarin Chinese is relatively easier to learn. The primary reason for this is the simple Mandarin grammar which has no set subject-verb agreement. The second reason is that Mandarin words do not have various plural forms, conjugations, and tenses. Finally, the Mandarin numbering system is one of the simplest in the world and is possibly one of the reasons why the Chinese are so good in handling numbers. Grab the Easy Study Guide Now!

Hacking Chinese - Olle Linge 2016-03-26

Learning Chinese can be frustrating and difficult, partly because it's very different from European languages. Following a teacher, textbook or language course is not enough. They show you the characters, words and grammar you need to become proficient in Chinese, but they don't teach you how to learn them! Regardless of what program you're in (if any), you need to take responsibility for your own learning. If you don't, you will miss many important things that aren't included in the course you're taking. If you study on your own, you need to be even more aware of what you need to do, what you're doing at the moment and the difference between them. Here are some of the questions I have asked and have since been asked many times by students: How do I learn characters efficiently? How do I get the most out of my course or teacher? Which are the best learning tools and resources? How can I become fluent in Mandarin? How can I improve my pronunciation? How do I learn successfully on my own? How can I motivate myself to study more? How can I fit learning Chinese into a busy schedule? The answers I've found to these questions and many others form the core of this book. It took eight years of learning, researching, teaching and writing to figure these things out. Not everybody has the time to do that! I can't go back in time and help myself learn in a better way, but I can help you! This book is meant for normal students and independent language learners alike. While it covers all major areas of learning, you won't learn Chinese just by reading this book. It's like when someone on TV teaches you how to cook: you won't get to eat the delicious dish just by watching the program; you have to do the cooking yourself. That's true for this book as well. When you apply what you learn, it will boost your learning, making every hour you spend count for more, but you still have to do the learning yourself. This is what a few readers have said about the book: "The book had me nodding at a heap of things I'd learnt the hard way, wishing I knew them when I started, as well as highlighting areas that I'm currently missing in my study." - Geoff van der Meer, VP engineering "This publication is like a bible for anyone serious about Chinese proficiency. It's easy for anyone to read and written with scientific precision." - Zachary Danz, foreign teacher, children's theatre artist About me I started learning Chinese when I was 23 (that's more than eight years ago now) and have since studied in many different situations,

including serious immersion programs abroad, high-intensity programs in Sweden, online courses, as well as on the side while working or studying other things. I have also successfully used my Chinese in a graduate program for teaching Chinese as a second language, taught entirely in Chinese mostly for native speakers (the Graduate Institute for Teaching Chinese as a Second Language at National Taiwan Normal University). All these parts have contributed to my website, Hacking Chinese, where I write regularly about how to learn Mandarin.

Fluent in 3 Months - Benny Lewis 2014-03-11

Benny Lewis, who speaks over ten languages—all self-taught—runs the largest language-learning blog in the world, Fluent In 3 Months. Lewis is a full-time "language hacker," someone who devotes all of his time to

finding better, faster, and more efficient ways to learn languages. *Fluent in 3 Months: How Anyone at Any Age Can Learn to Speak Any Language from Anywhere in the World* is a new blueprint for fast language learning. Lewis argues that you don't need a great memory or "the language gene" to learn a language quickly, and debunks a number of long-held beliefs, such as adults not being as good of language learners as children.

The Chinese Language - John DeFrancis 1986-03-01

"DeFrancis's book is first rate. It entertains. It teaches. It demystifies. It counteracts popular ignorance as well as sophisticated (cocktail party) ignorance. Who could ask for anything more? There is no other book like it. ... It is one of a kind, a first, and I would not only buy it but I would

recommend it to friends and colleagues, many of whom are visiting China now and are adding 'two-week-expert' ignorance to the two kinds that existed before. This is a book for everyone." --Joshua A. Fishman, research professor of social sciences, Yeshiva University, New York "Professor De Francis has produced a work of great effectiveness that should appeal to a wide-ranging audience. It is at once instructive and entertaining. While being delighted by the flair of his novel approach, the reader will also be led to ponder on some of the most fundamental problems concerning the relations between written languages and spoken languages. Specifically, he will be served a variety of information on the languages of East Asia, not as dry pedantic facts, but as appealing tidbits that whet the intellectual appetite. The expert will find much to reflect on in this book, for Professor DeFrancis takes nothing for granted." --William S.Y. Wang, professor of linguistics, University of California at Berkeley
