Diary of an Oxygen Thief - Anonymous
2016-05-23

Hurt people hurt people. Say there was a novel in which Holden Caulfield was an alcoholic and Lolita was a photographer's assistant and, somehow, they met in Bright Lights, Big City. He's blinded by love. She by ambition. Diary of an Oxygen Thief is an honest, hilarious, and heartrending novel, but above all, a very realistic account of what we do to each other and what we allow to have done to us.

Video Games as Culture - Daniel Muriel
2018-03-14

Video games are becoming culturally dominant. But what does their popularity say about our contemporary society? This book explores video game culture, but in doing so, utilizes video games as a lens through which to understand contemporary social life. Video games are becoming an increasingly central part of our cultural lives, impacting on various aspects of everyday life such as our consumption, communities, and identity formation. Drawing on new and original empirical data – including interviews with gamers, as well as key representatives from the video game industry,

media, education, and cultural sector – Video Games as Culture not only considers contemporary video game culture, but also explores how video games provide important insights into the modern nature of digital and participatory culture, patterns of consumption and identity formation, late modernity, and contemporary political rationalities. This book will appeal to undergraduate and postgraduate students, as well as postdoctoral researchers, interested in fields such Video Games, Sociology, and Media and Cultural Studies. It will also be useful for those interested in the wider role of

culture, technology, and consumption in the transformation of society, identities, and communities.

Reinventing the Curriculum - Mark Priestley

2013-06-20

Scotland's Curriculum for Excellence offers an example of a different approach to national curriculum development. It combines what are claimed to be the best features of top-down and bottom-up approaches to curriculum development, and provides an indication of the broad qualities that school education should promote rather than a detailed description of curriculum content.

Advocates of the approach argue that it provides central guidance for schools and maintains national standards whilst at the same time allowing schools and teachers the flexibility to take account of local needs when designing programmes of education. *Reinventing the Curriculum* uses Scotland's Curriculum for Excellence as a rich case study, analysing the strengths and weaknesses of this approach to curriculum design and development, and exploring the implications for curriculum planning and development around the world.

Superheresies - Chuck Pineau 2019-12-30

Three stories starring Golden Age heroes and featuring existential themes.

Rembrandt - Jonathan Bikker 2019

Innovatively and provocatively, Rembrandt turned the art world upside down in the Golden Age. His poignant works and his life story continue to inspire and move the world 350 years after his death. The largest and most spectacular collection of his paintings, prints and drawings in the world is curated by the Rijksmuseum. In 2019, the museum honours Rembrandt with the exhibition 'Alle Rembrandts'. Never before has the Rijksmuseum presented an exhibition of all of

Rembrandt's works from the collection: a one-off exhibition of no less than 400 Rembrandts.

Together they paint an unparalleled picture of Rembrandt as a human being, as an artist, as a storyteller and innovator. Jonathan Bikker, research curator at the Rijksmuseum, describes the highs and lows of Rembrandt's life in an accessible way, opening up the genius of Rembrandt's character and the innovative qualities of his work to the general public.

Uplifting Leadership - Andy Hargreaves

2014-06-04

What does it take to do more with less? How can you do better than before, or better than others?

How do you turn losses into wins, or near-bankruptcy into strong profitability, or abject failure into stellar success? The power of uplift

enables any organization to do more with less, beat the competition, and perform better than ever. Leaders who uplift their employees' passions, intellects, and commitments produce remarkable results. Based on original research from a seven-year global study, Uplifting Leadership reveals how leaders from diverse organizations inspired and uplifted their teams' performance. Distilling the six common characteristics of leaders at high-performing organizations across business, sports, and education, authors Andy Hargreaves, Alan Boyle, and Alma Harris explore the nature of uplift, its

impact on performance, and the ways to achieve it within and beyond an organization's walls, revealing how leaders: Identify and articulate an inspiring dream that is coherently connected to the best of what the organization has been before Pursue that dream at a sustainable pace without squandering resources, incurring excessive debt, or burning people out Forge paths of innovation and improvement that others have overlooked or rejected Monitor progress by using metrics and indicators in a mindful and meaningful way Build teams that naturally pull people into change rather than pushing them through it Featuring

case studies of organizations as diverse as Shoebuy.com, Fiat, Dogfish Head Craft Brewery, Marks & Spencer, Cricket Australia, Burnley Football Club, and the Vancouver Giants, as well as world-leading educational systems, Uplifting Leadership provides tools for leaders to incorporate these performance-driving strategies into their own. For leaders who want their people to try harder, transform what they do, reach for a higher purpose, and stay resolute and resilient when opposing forces threaten to defeat them, Uplifting Leadership provides a path to better performance across any organization.

I Will Survive - Gloria Gaynor 2014-03-11

I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of

disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s,

sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

Teacher Agency - Mark Priestley 2015-10-22

Recent worldwide education policy has reinvented teachers as agents of change and professional developers of the school curriculum. Academic literature has analyzed changes in how teacher professionalism is conceived in policy and in practice but Teacher Agency provides a fresh

perspective on this issue, drawing upon an ecological theory of agency. Using this model for understanding agency, Mark Priestley, Gert Biesta and Sarah Robinson explore empirical findings from the 'Teacher Agency and Curriculum Change' project, funded by the UK-based Economic and Social Research Council (ESRC). Drawing together this research with the authors' international experiences and perspectives, Teacher Agency addresses theoretical and practical issues of international significance. The authors illustrate how teacher agency should be understood not only in terms of

individual capacity of teachers, but also in respect of the cultures and structures of schooling.

Sheng - Chege Githiora 2022-04-15

The city of Nairobi is a rich context for the study of sociolinguistic phenomena. The coexistence of speakers of many different languages, further differentiated by socio-economic status, age and ethnicity provide conditions for the development

of a mixed code such as Sheng, an urban variety of Kenyan Swahili which has morphed from a "youth language" into a vernacular of wider use. Sheng is a unique phenomenon in the study of linguistic change and innovation in an African context, a reflection of the ethnolinguistic diversity of Kenya, and language asymmetry created by socio-economic disparities. It also provides a window into understanding the processes of urban multilingualism, within the specific space structuring of Nairobi city. This book is a detailed account of the rise and development of Sheng, its linguistic structure, social functions, and possible

future directions. The author's analysis of its presence in newspapers, TV, radio and online, makes it clear that Sheng functions as a particularly useful lens through which to explore contemporary Kenya. Chege Githiora is Professor of Linguistics, African Languages and Literatures at the University of London's School of Oriental and African Studies (SOAS), and is author of *Afro-Mexicans: Discourse of race and identity in the African Diaspora*.

Europe - On Air - Suzanne Lommers 2012

During the interwar years, broadcast radio became a popular way for Europeans to consume

local, national, and international news. The medium not only began to shape European policy and politics, but also laid the foundation for European unification and global interconnectedness. In *Europe On Air*, Suzanne Lommers has documented the rich and often underexposed history of broadcast radio through the lens of international European relations. She specifically explores the roles of Radio Moscow, Radio Luxembourg, Vatican Radio, and the International Broadcasting Union as institutions that played an important role in national identities and establishing standards for broadcasting. The

radio also offered new opportunities to politicians, who seized upon a vibrant and more direct way to communicate with their constituents. Essential reading for scholars of technology and European history, *Europe-On Air* reveals broadcast radio to be a technology that revolutionized international relations during the brief respite between the chaos of war in Europe.

Hugh Johnson's Pocket Wine Book - Hugh Johnson 1981

[Sociology for Music Teachers](#) - Hildegard Froehlich 2015-07-02

"Sociology for Music Teachers: Perspectives for Practice examines the history and development of the social factors that affect students' values, tastes, and attitudes that school music teachers confront as an integral part of their work. It makes the case that knowledge of sociology impacts the selection of materials, methods, and teaching strategies by which teachers effectively communicate new ideas and experiences to the students, and through the students, to the community."--Back cover.

Reimagining the Purpose of Schools and Educational Organisations - Anthony Montgomery
2015-12-22

This book features a diverse set of perspectives all focused towards questioning the role schools actually play in society and, more importantly, the

role they could potentially play. Containing papers presented at the 1st International Conference on Reimagining Schooling which took place in Thessaloniki, Greece, June 2013, bringing together international and multi-disciplinary perspectives on the future of education and schools. Combines diverse specialties analyzing schools as organizations and questions the purpose of schools. The book explores the current purpose of schooling and debates what roles and values young people currently learn from schooling. It examines such issues as the impact of Neoliberalism, the pursuit of the socially

just school, and imagining contemporary schools beyond their consumerist mentality. Tackling development in the growing economic and social crisis in Europe, and offering transformative analysis of the psychology and decision-making involved for innovating teaching, learning, socio-economic and policy contexts. In addition, the book shows different ways young people can be creatively involved in reimagining schooling. It also details both innovative and radical ideas that currently exist about school transformation such as building learning partnerships for all and creating synergies across formal and informal

settings of learning. Raising important questions for the future of the relationship between teacher and pupil and positive and pro-active behavior. There is a growing realization that schools fail to accommodate diverse types of learning and that their purpose is not simply about education. Featuring academics and practitioners from many different disciplines, this book boldly questions the values that currently permeate school walls and suggests ways that schooling itself can be made better.

The Nazi Genocide of the Sinti and Roma -
Romani Rose 1995

Only Paradoxes to Offer - Joan Wallach Scott
1996

When feminists argued for political rights in the context of liberal democracy, they insisted that the differences between men and women were irrelevant for citizenship. Yet by acting on behalf of women, they introduced the very idea of difference they sought to eliminate. Scott reads feminist history in terms of this paradox.

The Socially Just School - John Smyth
2014-07-08

This book explores schools and how they can function as social institutions that advance the

interests and life chances of all young people, especially those who are already the most marginalized and at an educational disadvantage. Social justice is a key theme as the book examines the needs of youth, the concept of school culture, school/community relations, socially critical pedagogy, curriculum and leadership and a socially critical approach to work. The Socially Just School is based upon four decades of intensive writing and researching of young lives. This work presents an alternative to the damaging school reform in which schools are made to serve the interests of the economy,

education systems, the military, corporate or national interests. Readers will discover the hallmarks of socially just schools: - They educationally engage young people regardless of class, race, family or neighbourhood location and they engage them around their own educational aspirations. - They regard all young people as being morally entitled to a rewarding and satisfying experience of school, not only those whose backgrounds happen to fit with the values of schools. - They treat young people as having strengths and being 'at promise' rather than being 'at risk' and with 'deficits' or as 'bundles of

pathologies' to be remedied or 'fixed'. - They are 'active listeners' to the lives and cultures of their students and communities and they construct learning experiences that are embedded in young lives. This highly readable book will appeal to students and scholars in education and sociology, as well as to teachers and school administrators with an interest in social justice.

Education, Justice, and Democracy - Danielle Allen 2013-03-04

Education is a contested topic, and not just politically. For years scholars have approached it from two different points of view: one empirical,

focused on explanations for student and school success and failure, and the other philosophical, focused on education's value and purpose within the larger society. Rarely have these separate approaches been brought into the same conversation. *Education, Justice, and Democracy* does just that, offering an intensive discussion by highly respected scholars across empirical and philosophical disciplines. The contributors explore how the institutions and practices of education can support democracy, by creating the conditions for equal citizenship and egalitarian empowerment, and how they can advance justice,

by securing social mobility and cultivating the talents and interests of every individual. Then the authors evaluate constraints on achieving the goals of democracy and justice in the educational arena and identify strategies that we can employ to work through or around those constraints. More than a thorough compendium on a timely and contested topic, Education, Justice, and Democracy exhibits an entirely new, more deeply composed way of thinking about education as a whole and its importance to a good society.

Pa' Siempre - Renée Gregorio 2016

Poetry. From the afterword: "As poets, we found

Cuba's contradictions, juxtapositions, mystery and sensuality provocative and inviting. Traveling family-to-family across the island, our psyches and our poetry were transformed, not by people wanting to leave Cuba for the material promises of life elsewhere, but by those whose priority was to stay. Ones who might through resistance and creativity be part of the next Revolution: artists, agriculturists, progressive thinkers, social and political reformers working to guarantee freedom of speech and fair and proper wages for all: street sweeper to surgeon. With things in flux, what remains is the island's vibrant beauty, the

cloud-swept mountains, iridescent playas, fertile valleys, shimmering canefields, lively port cities and the faded pastels of colonial towns. Add the kaleidoscope of cultures, the Afro roots, a trade-wind vibe, the power of Santeria, an inescapable sizzle of music-and the pot begins to boil. Finally, spice the mix liberally with those classic Cuban hallmarks of genuine social living, ones that have largely disappeared in our homeland: immediate camaraderie, spontaneous generosity, a from-the-heart curiosity. We hope these poems give you a measure, a view into a people and a place that we have been lucky enough to be captivated by

for many years, a place that can only make you feel more alive, more enlarged and more embraced than you've known."

Achtung-Panzer! - Heinz Guderian 1995

This is one of the most significant military books

of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish,

French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast.

This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Microclimate for Cultural Heritage - Dario Camuffo

2019-06-28

Microclimate for Cultural Heritage: Measurement, Risk Assessment, Conservation, Restoration, and Maintenance of Indoor and Outdoor Monuments, Third Edition, presents the latest on

microclimates, environmental issues and the conservation of cultural heritage. It is a useful treatise on microphysics, acting as a practical handbook for conservators and specialists in physics, chemistry, architecture, engineering, geology and biology who focus on environmental issues and the conservation of works of art. Sections covers applied theory, environmental issues and conservation,

practical utilization, along with suggestions, examples, common issues and errors. Incorporates research on the effects of climate change from Climate for Culture, the EU funded, five-year project focusing on climate change's impact on cultural heritage preservation Covers green lighting technology, like LED and OLED, it's impacts on indoor microclimates, preservation and color rendering Includes a case study on sea level issues and cultural heritage in Venice
