Advances in Emerging Trends and Technologies - Miguel Botto-Tobar 2019-10-12

This book constitutes the proceedings of the 1st International Conference on Advances in Emerging Trends and Technologies (ICAETT 2019), held in Quito, Ecuador, on 29–31 May 2019, jointly organized by Universidad Tecnológica Israel, Universidad Técnica del Norte, and Instituto Tecnológico Superior Rumiñahui, and supported by SNOTRA. ICAETT 2019 brought together top researchers and practitioners working in different domains of computer science to share their expertise and to discuss future developments and potential collaborations. Presenting high-quality, peer-reviewed papers, the book discusses the following topics: Technology Trends Electronics Intelligent Systems Machine Vision Communication Security e-Learning e-Business e-Government and e-Participation

The World's Best Sailboats - Ferenc Mate 2014-11-18

A guided tour of the world's best sailboats with an entertaining expert at your side. With over 100,000 copies sold, these volumes have become invaluable reference for sailors and would-be sailors alike. Using 400 magnificent color photographs and black-and-white illustrations per volume, Máté analyzes the designs and construction methods of the 30 best boat-builders in the world, builders who have, over the years, consistently shown the highest quality and most creative innovation. He visited boatyards in Europe, Canada, and the United States, for his scrupulous firsthand survey. While revealing the secrets of the best builders, he lucidly demonstrates what makes these boats the best, furnishing knowledge that can then be applied while choosing any sailboat of whatever make. Besides the perennial classics of Alden, Baltic, Hinckley and Swan, are new entries like the super-fast J-Boats and super luxurious Oysters. The color photographs are benchmarks in nautical publishing, while the writing is thoughtful, hugely informative and always entertaining.

Land and Society in Early South Asia - Ryosuke Furui 2019-07-02

This volume explores the process of social changes which unfolded in rural society of early medieval Bengal, especially the formation of stratified land relations and occupational groups which later got systematised as jātis. One of the first books to systematically reconstruct the early history of the region, this book presents a history of the economy, polity, law, and social order of early medieval Bengal through a comprehensive study of land and society. It traces the

changing power relations among constituents of rural society and political institutions, and unravels the contradictions growing among them. The author describes the changing forms of agrarian development which were deeply associated with these overarching structures and offers an in-depth analysis of a wide range of textual sources in Sanskrit and other languages, especially contemporary inscriptions pertaining to Bengal. The volume will be an essential resource for researchers and academics interested in the history of Bengal, and the social and economic history of early South Asia.

Jamaican Jew - Isadora Harris 2010

Advanced Global Illumination - Philip Dutre 2018-10-24

This book provides a fundamental understanding of global illumination algorithms. It discusses a broad class of algorithms for realistic image synthesis and introduces a theoretical basis for the algorithms presented. Topics include: physics of light transport, Monte Carlo methods, general strategies for solving the rendering equation, stochastic path-tracing algorithms such as ray tracing and light tracing, stochastic radiosity including photon density estimation and hierarchical Monte Carlo radiosity, hybrid algorithms, metropolis light transport, irradiance caching, photon mapping and instant radiosity, beyond the rendering equation, image display and human perception. If you want to design and implement a global illumination rendering system or need to use and modify an existing system for your specific purpose, this book will give you the tools and the understanding to do so.

Modern Power System Analysis - Turan Gonen 2016-04-19

Most textbooks that deal with the power analysis of electrical engineering power systems focus on generation or distribution systems. Filling a gap in the literature, Modern Power System Analysis, Second Edition introduces readers to electric power systems, with an emphasis on key topics in modern power transmission engineering. Throughout, the boo

Hunters and Bureaucrats - Paul Nadasdy 2011-11-01

This book challenges this conventional wisdom that land claims and co-management -- two of the most visible and celebrated elements of this restructuring the relationship between Aboriginal peoples and the Canadian state -- will help reverse centuries of inequity. Based on three years of ethnographic research in the Yukon, the author examines the complex relationship between the people of Klwane First Nation, the land and animals, and the state. This book moves beyond conventional models of colonialism, in which the state is treated as a monolithic entity, and instead explores how "state power" is reproduced through everyday bureaucratic practices -- including struggles over the production and use of knowledge.

Implementing Industry 4.0 - Carlos Toro 2021-04-03

This book relates research being implemented in three main research areas: secure connectivity and intelligent systems, real-time analytics and manufacturing knowledge and virtual manufacturing. Manufacturing SMEs and MNCs want to see how Industry 4.0 is implemented. On the other hand, groundbreaking research on this topic is constantly growing. For the aforesaid reason, the Singapore Agency for Science, Technology and Research (A*STAR), has

created the model factory initiative. In the model factory, manufacturers, technology providers and the broader industry can (i) learn how I4.0 technologies are implemented on real-world manufacturing use-cases, (ii) test process improvements enabled by such technologies at the model factory facility, without disrupting their own operations, (iii) co-develop technology solutions and (iv) support the adoption of solutions at their everyday industrial operation. The book constitutes a clear base ground not only for inspiration of researchers, but also for companies who will want to adopt smart manufacturing approaches coming from Industry 4.0 in their pathway to digitization.

Scars, Marks & Tattoos - Jacqueline Caruso 2021-03-31

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.

Marketing and Smart Technologies - Álvaro Rocha 2021

This book includes selected papers presented at the International Conference on Marketing and Technologies (ICMarkTech 2020), held at ISCTE - University Institute of Lisbon, in the city of Lisbon in Portugal, between 8 and 10 October 2020. It covers up-to-date cutting-edge research on artificial intelligence applied in marketing, virtual and augmented reality in marketing, business intelligence databases and marketing, data mining and big data, marketing data science, web marketing, e-commerce and v-commerce, social media and networking, geomarketing and IoT, marketing automation and inbound marketing, machine learning applied to marketing, customer data management and CRM, and neuromarketing technologies.

Twelve Years A Slave (Illustrated) - Solomon Northup 2014-08-22

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

Automotive Control Systems - Uwe Kiencke 2005-04-13

Written by two of the most respected, experienced and well-known researchers and developers in the field (e.g., Kiencke worked at Bosch where he helped develop anti-breaking system and engine control; Nielsen has lead joint research projects with Scania AB, Mecel AB, Saab Automobile AB, Volvo AB, Fiat GM Powertrain AB, and DaimlerChrysler. Reflecting the trend to optimization through integrative approaches for engine, driveline and vehicle control, this valuable book enables control engineers to understand engine and vehicle models necessary for controller design and also introduces mechanical engineers to vehicle-specific signal processing and automatic control. Emphasis on measurement, comparisons between performance and modelling, and realistic examples derive from the authors' unique industrial experience. The

second edition offers new or expanded topics such as diesel-engine modelling, diagnosis and anti-jerking control, and vehicle modelling and parameter estimation. With only a few exceptions, the approaches

Backpacker - 2004-03

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

MUSIC 2013 will be the most comprehensive text focused on the various aspects of Mobile, Ubiquitous and Intelligent computing. MUSIC 2013 provides an opportunity for academic and industry professionals to discuss the latest issues and progress in the area of intelligent technologies in mobile and ubiquitous computing environment. MUSIC 2013 is the next edition of the 3rd International Conference on Mobile, Ubiquitous, and Intelligent Computing (MUSIC-12, Vancouver, Canada, 2012) which was the next event in a series of highly successful International Workshop on Multimedia, Communication and Convergence technologies MCC-11 (Crete, Greece, June 2011), MCC-10 (Cebu, Philippines, August 2010).

100 Years of Prandtl's Wedge - S. Van Baars 2018-04-17

The biggest problem for a shallow foundation, just as for any other type of foundation, is a failure due to an overestimation of the bearing capacity. This means that the correct prediction of the bearing capacity of the foundation is often the most important part of the design of a civil structure. That is why the publication by Prandtl in 1920 about the hardness of a plastic body, was a major step in solving the bearing capacity of shallow foundations, although it is well possible that he never realised this, because his solution was not made for civil engineering purposes, but for mechanical purposes. Over the last 100 years, a lot of extensions have been made, for example with inclination factors and shape factors. Also many laboratory experiments have been done and numerical calculations have been made. Some even try to extrapolate the failure mechanism for shallow foundations to the failure mechanism around the tip of a pile. All this scientific work leads back to the first publication by Ludwig Prandtl in 1920. This book, "100 Years of Prandtl's Wedge", is intended for all those who are interested in these fundamentals of

foundation engineering and their history. The Appendices include a copy of Prandtl's *Über die Härte plastischer Körper* and of Reissner's publication of 1924, *Zum Erddruckproblem*.

[Ranger Confidential](#) - Andrea Lankford 2010-04-02

For twelve years, Andrea Lankford lived in the biggest, most impressive national parks in the world, working a job she loved. She chaperoned baby sea turtles on their journey to sea. She pursued bad guys on her galloping patrol horse. She jumped into rescue helicopters bound for the heart of the Grand Canyon. She won arguments with bears. She slept with a few too many rattlesnakes. Hell yeah, it was the best job in the world! Fortunately, Andrea survived it. In this graphic and yet surprisingly funny account of her and others' extraordinary careers, Lankford unveils a world in which park rangers struggle to maintain their idealism in the face of death, disillusionment, and the loss of a comrade killed while holding that thin green line between protecting the park from the people, the people from the park, and the people from each other. *Ranger Confidential* is the story behind the scenery of the nation's crown jewels—Yosemite, Grand Canyon, Yellowstone, Great Smokies, Denali. In these iconic landscapes, where nature and humanity constantly collide, scenery can be as cruel as it is redemptive.

Avoid Food-Drug Interactions - U.s. Food and Drug Administration 2014-07-05

What you eat and drink can affect the way your medicines work. Use this guide to alert you to possible "food-drug interactions" and to help you learn what you can do to prevent them. In this guide, a food-drug interaction is a change in how a medicine works caused by food, caffeine, or alcohol. A food-drug interaction can: prevent a medicine from working the way it should cause a side effect from a medicine to get worse or better cause a new side effect A medicine can also change the way your body uses a food. Any of these changes can be harmful. This guide covers interactions between some common prescription and over-the counter medicines and food, caffeine, and alcohol. These interactions come from medicine labels that FDA has approved. This guide uses the generic names of medicines, never brand names.

The Study of Games - Elliott Morton Avedon 2015-01-27

The authors, Elliott Morton Avedon and Brian Sutton-Smith are recognized authorities on the study of games. Elliott Morton Avedon was born on 28 April 1930 in Florida. He is the author of "Therapeutic Recreation Service: An Applied Behavioural Approach." Brian Sutton-Smith was born in Wellington, New Zealand in 1924. His academic career is focused on children's games, adult games, children's play, children's drama, films and narratives, as well as children's gender issues and sibling position. Brian Sutton-Smith is the author of some 50 books, the most recent of which is *The Ambiguity of Play*, and some 350 scholarly articles. He has been the President of The Anthropological Association for the Study of Play and of The American Psychological Association, Division g10 (Psychology and the Arts). As a founder of the Children's Folklore Society he has received a Lifetime Achievement Award from the American Folklore Society.

Astrobiology - Julian Chela-Flores 2012-12-06

The general topic of this book concerns the origin, evolution, distribution, and destiny of life in the Universe. It discusses the transition from inert matter to cellular life and its evolution to fully developed intelligent beings, and also the possibility of life occurring elsewhere, particularly in other environments in our own and other solar systems. The theoretical framework of Astrobiology may be probed with a forthcoming series of space missions, which at the time of writing are being planned for the next 10 to 15 years. Advanced extraterrestrial life can also be probed by means of radioastronomy in the well-established project of search for extraterrestrial intelligence. Astrobiology pays special attention to the robust growth in our capacity to search for microorganisms, as well as signals of extraterrestrial life, with recent significant technological progress in planetary science and radioastronomy. The progress of the main space agencies is highlighted. Audience: This volume is aimed at advanced undergraduate and graduate students, as well as researchers in the many areas of basic, earth, and life sciences that contribute to the study of chemical evolution and the origin of life.
