The Age of Fallibility - George Soros 2007-06-26

After reflecting on his support of a losing Democrat for president, George Soros steps back to revisit his views on why George Bush's policies around the world fall short in the arenas most important to Soros: democracy, human rights and open society. As a survivor of the Holocaust and a life-long proponent of free expression, Soros understands the meaning of

freedom. And yet his differences with George Bush, another proponent of freedom, are profound. In this powerful essay Soros spells out his views and how they differ from the president's. He reflects on why the Democrats may have lost the high ground on these values issues and how they might reclaim it. As he has in his recent books, *On Globalization* and *The Bubble of American Supremacy*, Soros uses facts, anecdotes, personal experience and philosophy to illuminate a major topic in a way that both enlightens and inspires.

Plain Roots - Becki Willis 2018-11
Taryn Clark thought she'd outgrown the need to find her birth mother. She thought that a successful career and a comfortable life in the city were enough to be happy. Did she really need to know about the woman who had given her away? Adopted at birth, her first few years were happy. It hadn't mattered that she didn't know her heritage; she had parents who loved her and wanted her. But divorce, and then death, ripped their tiny family apart, and at the tender age of six, she entered the foster care system. Over the next dozen years, she shuffled from home to home. Finding her roots seemed an impossible dream. But dreams are resilient. An unexpected discovery awakens old yearnings of belonging to a family, of being part of something bigger than herself. Finding the brief, ambiguous note from her birth mother is enough to unfurl the ribbons of hope still binding her heart. Her quest takes her to Lancaster County, Pennsylvania and the heart of the Plain community. Aided by her unique eye color, a healthy dose of luck, and the private investigator she hires, Taryn finds

her birth family easily enough, but finding the truth is another matter. In all her musings, she never imagined a scenario where her mother might be Amish. She never imagined that the fabric of her life might be a patchwork of faith and fear, stitched together with a dark family secret. Taryn is determined to trace her roots, even if it means digging in the mud to do so. Now she's caught in the quicksand of a shocking discovery and the consequences of choices made, almost forty years ago. She'll risk everything to uncover the truth and to claim the family--and the roots--she so desperately craves.

Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. Wake Up, Woods showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of Wake Up, Woods will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that happen in forests where we live and play.

Unlocking the Customer Value Chain - Thales S. Teixeira 2019-02-19

Based on eight years of research visiting dozens of startups, tech companies and incumbents, Harvard Business School professor Thales Teixeira shows how and why consumer industries are disrupted, and what established companies can do about it—while highlighting the specific strategies potential startups use to gain a competitive edge. There is a pattern to digital disruption in an industry, whether the disruptor is Uber, Airbnb, Dollar Shave Club, Pillpack or one of countless other startups that have stolen large portions of market share from industry leaders, often in a matter of a few years. As Teixeira makes clear, the nature of competition has fundamentally changed. Using innovative new business models, startups are stealing customers by breaking the links in how consumers discover, buy and use products and services. By decoupling the customer value chain, these startups, instead of taking on the Unilevers and Nikes, BMW's and Sephoras of the world head on, peel away a piece of the consumer purchasing process. Birchbox offered women a new way to sample beauty products from a variety of companies from the convenience of their homes, without having to visit a store. Turo doesn't compete with GM. Instead, it offers people the benefit of driving without having to own a car themselves. Illustrated with vivid, indepth and exclusive accounts of both startups, and reigning

incumbents like Best Buy and Comcast, as they struggle to respond, *Unlocking the Customer Value Chain* is an essential guide to demystifying how digital disruption takes place — and what companies can do to defend themselves.

Concept TV - Luca Bandirali 2021

"What is a television series? A widespread answer takes it to be a totality of episodes and seasons. Luca Bandirali and Enrico Terrone argue against this characterization. In *Concept TV: An Aesthetics of Television Series*, they contend that television series are concepts that manifest themselves through episodes and seasons, just as works of conceptual art can manifest themselves through installations or performances. In this sense, a television series is a conceptual narrative, a principle of construction of similar narratives. While the film viewer directly appreciates a narrative made of images and sounds, the TV viewer relies on images and sounds to grasp

the conceptual narrative that they express. Here lies the key difference between television and film. Reflecting on this difference paves the way for an aesthetics of television series that makes room for their alleged prolixity, their tendency to repetition, and their lack of narrative closure. Bandirali and Terrone shed light on the specific ways in which television series are evaluated, arguing that some apparent flaws of them are, indeed, aesthetic merits when considered from a conceptual perspective. Hence, to maximize the aesthetic value of television series, one should not assess them in the same framework in which films are assessed but rather in this new conceptual framework"--

Global Tax Fairness - Thomas Pogge
2016-02-04

This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development. While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act.
