Fiberglass and Glass Technology - Frederick T. Wallenberger 2009-11-27
Fiberglass and Glass Technology: Energy-Friendly Compositions and Applications provides a detailed overview of fiber, float and container glass technology with special emphasis on energy- and environmentally-friendly compositions, applications and manufacturing practices which have recently become available and continue to emerge. Energy-friendly compositions are variants of incumbent fiberglass and glass compositions that are obtained by the reformulation of incumbent compositions to reduce the viscosity and thereby the energy demand. Environmentally-friendly compositions are variants of incumbent fiber, float and container glass compositions that are obtained by the reformulation of incumbent compositions to reduce environmentally harmful emissions from their melts. Energy- and environmentally-friendly compositions are expected to become a key factor in the future for the fiberglass and glass industries. This book consists of two complementary sections: continuous glass fiber technology and soda-lime-silica glass technology.

Important topics covered include: o Commercial and experimental compositions and products o Design of energy- and environmentally-friendly compositions o Emerging glass melting technologies including plasma melting o Fiberglass composite design and engineering o Emerging fiberglass applications and markets
Fiberglass and Glass Technology: Energy-Friendly Compositions and Applications is written for researchers and engineers seeking a modern understanding of glass technology and the development of future products that are more energy- and environmentally-friendly than current products.

The Virginia Giant - Sherry Norfolk 2014-08-01

The Virginia Giant, a one-man army! Peter Francisco was believed to have had almost super-human strength. According to legend, George Washington said, "Without him we would have lost two crucial battles, perhaps the war, and with it our freedom." Francisco, a Portuguese immigrant, was raised outside Richmond and after hearing Patrick Henry's "Give Me Liberty or Give Me Death" speech, he joined the Virginia Colonial Militia. He was known for his battle-hardened skills, and his bravery at Brandywine, Stony Point, Camden and Guilford Courthouse led to stories of epic portions. Join authors Bobby and Sherry Norfolk as they separate fact from myth on topics ranging from pirates to redcoats to exciting acts of valor in this remarkable story of a true American hero.

Children's Picturebooks - Martin Salisbury 2012-01-30

Children's picturebooks are the very first books we encounter, and they form an important, constantly evolving, and dynamic sector of the publishing world. But what does it take to create a successful picturebook for children? In seven chapters, this book covers the key stages of conceiving a narrative, creating a visual language and developing storyboards and design of a picturebook. The book includes interviews with leading children's picturebook illustrators, as well as case studies of their work. The picturebooks and artists featured hail from Australia, Belgium, Cuba, France, Germany, Hungary, Ireland, Italy, Japan, Norway, Poland, Portugal, Russia, Singapore, South Korea, Spain, Taiwan, the UK and the USA. In this publication, Martin Salisbury and Morag Styles introduce us to the world of children's picturebooks, providing a solid background to the industry while

exploring the key concepts and practices that have gone into the creation of successful picturebooks.

An Invisible Thread - Laura Schroff 2019-05-07

A Parents' Choice Recommended Award Winner A Junior Library Guild Gold Standard Selection From New York Times bestselling authors Laura Schroff and Alex Tresniowski comes the young readers edition of an unbelievable memoir about an unlikely friendship that forever changed the lives of a busy sales executive and a hungry eleven-year-old boy. On one rainy afternoon, on a crowded New York City street corner, eleven-year-old Maurice met Laura. Maurice asked Laura for spare change because he was hungry, and something made Laura stop and ask Maurice if she could take him to lunch. Maurice and Laura went to lunch together, and also bought ice cream cones and played video games. It was the beginning of an unlikely and magical friendship that changed both of their lives forever. An Invisible Thread is the true story of the bond between an eleven-year-old boy and a busy sales executive; a heartwarming journey of hope, kindness, adventure, and love—and the power of fate to help us find our way.

Vision - Hans P. Bacher 2018-05-15
Featuring hundreds of carefully hand-crafted illustrations as well as significant tuition on how to best compose and use images to create the most powerful frames, this book is potentially Hans P. Bacher's life's work encapsulated in one volume. Here, the internationally renowned production designer shares his expertise in an easy-to-follow and imaginative way – giving tips, exercises, and a depth of knowledge garnered from a lifetime in the

industry. Bacher's production designs have established the look of many seminal animated films such as *The Lion King*, *Balto*, *Mulan* and *Beauty and the Beast*, so fans of his work will be delighted. While keeping the focus on storytelling, Bacher instructs readers in the art of animated cinematography with the ever-present aim of soliciting an emotional response from the audience. *Vision: Color and Composition for Film* represents an amazing depth of experience – and is visually arresting to boot.

Neurosecretion - B. Pickering
2012-03-30

This volume collects together the Proceedings of the Tenth International Symposium on Neurosecretion which was held in Bristol in September 1987. This series of symposia began with a meeting in Naples in 1953 and it was particularly gratifying to welcome two members of that original gathering, Berta Scharrer and Ellen Thomsen, to the 10th Symposium. The acceptance of the invitation to meet in Bristol gave particular pleasure to the Local Organising Committee because it was the first time that a former venue was revisited - the 3rd Symposium was organised in Bristol by Hans Heller in 1961 and we were very glad that his widow, Josephine, was able to be the Guest-of-Honour at the banquet of our 10th symposium. Neurosecretion has diversified considerably since the first meeting

in 1953. From the outset, the local committee decided to focus the meeting by organising it under the title "Cellular aspects of the production and release of neuropeptides." Having sought advice from the International Committee for Symposia on Neurosecretion, we invited 28 scientists from throughout the world to present their work on aspects ranging from the organisation of the gene through to the electrical properties of peptide-secreting neurones. The progress of studies in neurosecretion owes much to the comparative approach and we attempted to reflect this in the programme of the tenth symposium by inviting the speakers, to illustrate the various aspects of neuropeptide secretion, from among scientists working with systems in many parts of the animal kingdom.

Physical Principles of Electrospinning (Electrospinning as a Nano-Scale Technology of the Twenty-First Century) - D. Lukas 2009-03-01
After introducing the history and process of electrospinning, this book, Volume 41.2 of the journal *Textiles Progress*, highlights the self-organization of fluid in electrospinning. It then describes the jet path and its possible control by special collectors and spinning electrodes. The authors also discuss two electrospinning variants (melt and core-shell electrospinning) as well as two exceptional features of electrospinning (electric wind and accompanying irradiations). The book concludes with a discussion on the quality of polymeric solutions for electrospinning from the standpoint of Hansen solubility parameters and entanglements among polymeric chains.

Posy Simmonds - Paul Gravett
2019-06-11

An inaugural volume in a new series showcasing the most significant illustrators of the modern era, this book explores the satirical cartoons of Posy Simmonds. Illustrator Posy Simmonds is known for her extraordinarily precise drawings, keen powers of observation, and sharp but well-tempered wit, all of which have made her an internationally renowned artist. This generously illustrated book examines Simmonds's life and work from early childhood to the present day, offering insights into her creative process. Paul Gravett has had unprecedented access to her archive and includes pages from her sketchbooks as well as rare or never-before-seen artwork. The portrait of Simmonds that emerges underlines her role as a keen chronicler and critic of contemporary British society—a storyteller who writes and illustrates with rare perception and humanity. Posy Simmonds is one of the first titles

in Thames & Hudson's new The Illustrators series, which celebrates illustration as an art form. The book will appeal to the many fans of Simmonds's work, and anyone interested in illustration will adore this unrivaled exploration of a sophisticated innovator.

The Environmental Behaviour of Polonium - International Atomic Energy Agency 2018-01-31

Polonium-210 is an alpha emitting radionuclide with no radioactive progeny and produces only very-low-intensity gamma rays at very low abundance. This means doses largely arise from internal exposure. In addition to the relatively high ingestion dose coefficient of ^{210}Po , radionuclide transfer in the environment results in high activity concentrations in certain foods. This publication focuses on radionuclide transfers in terrestrial, freshwater and marine environments, and provides information on key transfer processes, concepts and models--back cover.

100 Great Children's Picturebooks - Martin Salisbury 2015-05-05

This unashamed visual feast celebrates the best designed and illustrated picturebooks from around the world over the past one hundred years. Each book is a creation of genius and inventiveness, and their design and illustration represent such diverse trends as the Russian Constructivists, Italian Futurists, and Postwar Neo-romantics. They are also mirrors of their times reflecting social concerns from a child's and family's perspectives throughout the twentieth and into the twenty-first century. Fearlessly confronting the frontiers between a child's picturebook and art, this is a collection of books that anyone with an interest in design, illustration, or simply children's literature should know about.

Worldly Saints - Leland Ryken 2010-09-28

"Ryken's *Worldly Saints* offers a fine introduction to seventeenth-century Puritanism in its English and American contexts. The work is rich

in quotations from Puritan worthies and is ideally suited to general readers who have not delved widely into Puritan literature. It will also be a source of information and inspiration to those who seek a clearer understanding of the Puritan roots of American Christianity." - Harry Stout, Yale University "...the typical Puritans were not wild men, fierce and freaky, religious fanatics and social extremists, but sober, conscientious, and cultured citizens, persons of principle, determined and disciplined excelling in the domestic virtues, and with no obvious shortcomings save a tendency to run to words when saying anything important, whether to God or to a man. At last the record has been put straight." -J.I. Packer, Regent College "Worldly Saints provides a revealing treasury of primary and secondary evidence for understanding the Puritans, who they were, what they believed, and how they acted. This is a book of value and interest for scholars and students, clergy and laity alike." -Roland Mushat Frye, University of Pennsylvania "A very persuasive...most interesting book...stuffed with quotations from Puritan sources, almost to the point of making it a mini-anthology." - Publishers Weekly "With Worldly Saints, Christians of all persuasions have a tool that provides ready access to the vast treasures of Puritan thought." -Christianity Today "Ryken writes with a vigor and enthusiasm that makes delightful reading-never a dull moment." -Fides et Historia "Worldly Saints provides a valuable picture of Puritan life and values. It should be useful for general readers as well as for students of history and literature." -Christianity and Literature

Trooper - Forrest Bryant Johnson
2020-04-21

A charming tale for fans of Marley & Me and Dewey's Nine Lives. Whenever middle-aged desert tour guide Forrest Bryant Johnson went out on his daily walks into the Mojave, all was usually peaceful and serene. But one beautiful summer day in 1987, Forrest heard a cry of distress. Following the cries, he came upon a small bobcat kitten, injured, orphaned, and desperately in need of help. So Forrest took his new feline friend home for a night. But when the little "trooper" clearly needed some more time to recoup, that night turned into two nights, a week, and eventually nineteen years. And so Trooper became a part of the Johnson family. And in those nineteen years, Trooper lived his nine lives to the fullest. He explored desert flora and fauna around him, befriending kit foxes, jackrabbits, desert tortoises, and other creatures and getting into mischief along the way. Trooper became a "big brother" to stray tabby Little Brother, teaching, guiding, and protecting Brother on the pair's adventures and misadventures. He became a beloved patient at his local vet, and cherished housemate of Forrest's wife, Chi. And Trooper even managed to melt the icy heart of a tough guy neighbor. But most of all, throughout his nineteen years, Trooper became Forrest's best friend, as the two shared each other's worries and frustrations, musings and rants, joys and laughter. Harrowing and heartfelt, Trooper: The Bobcat Who Came in from the Wild is for any reader who ever had their heart

stolen by their pet.

Flora - DK 2018-10-23

Let the experts at the Royal Botanic Gardens guide you around the beautiful and mysterious world that is the plant kingdom. From regulating the air we breathe to providing food, clothes, fuels, and medicines - plants are fundamental to our lives. Discover an extraordinary diversity of species, which includes a grass that grows a meter a day, roots that breathe air, and "queen of the night" cactuses whose rare blooms vanish before dawn. In a combination of art and science, Flora celebrates plants from majestic trees to microscopic algae, explaining how they germinate, grow, and reproduce. It presents species that have evolved to

accommodate pollinating insects such as the foxglove, and plants that have adapted to flourish in even the most hostile of habitats. Pierre-Joseph Redoute in the 18th-century was described as the "Raphael of flowers". Flora showcases his botanical paintings as well as those of Georg Ehret and others in this gorgeous visual celebration of plants through the ages. Whether you are a

keen gardener, naturalist, or botany student, this beautiful book is a treat that will entice, inform, and amaze.
