The Invented Reality - Paul Watzlawick
1984-03

Common sense suggests that reality can be discovered. In contrast, constructivism postulates that what we call reality is a personal interpretation, a particular way of looking at the world acquired through communication. Reality is, therefore, not discovered, but literally invented.

The Butcher's Tale: Murder and Anti-Semitism in a German Town - Helmut Walser Smith 2003-11-17

One of the most dramatic explorations of a German town in the grip of anti-Semitic passion ever written. In 1900, in a small Prussian town, a young boy was found murdered, his body dismembered, the blood

drained from his limbs. The Christians of the town quickly rose up in violent riots to accuse the Jews of ritual murder—the infamous blood-libel charge that has haunted Jews for centuries. In an absorbing narrative, Helmut Walser Smith reconstructs the murder and the ensuing storm of anti-Semitism that engulfed this otherwise peaceful town. Offering an instructive examination of hatred, bigotry, and mass hysteria, *The Butcher's Tale* is a modern parable that will be a classic for years to come. Winner of the Fraenkel Award and a Los Angeles Times Best Book of 2002.

New York in Photobooks - Horacio Fernández 2016

New York in photobooks gathers and studies a selection of images of the capital of the twentieth century, the most photogenic and most photographed city in history. In these images from the books selected (only a fraction of those in existence), the city of skyscrapers is captured from construction thereof in the 1930s to the destruction of the World Trade Center in 2001, alongside the urban life of the New Yorkers themselves, recorded in a model style of street photography. Many of the books are the work of European and Japanese photographers, who discovered multiple perspectives (human, cultural, social, economic) from which to view the city that shaped the twentieth century. *New York in Photobooks* is the catalogue of a travelling exhibition curated by Horacio Fernandez, who is also the editor of the book: a collaborative effort in which, in addition to the many images, there are texts by numerous photography scholars. The photographers represented include Berenice Abbott, Nobuyoshi Araki, Cecil Beaton, Mario Bucovich, Roy DeCarava, Bruce Davidson, Raymond De-pardon, Juan Fresan, Bruce Gilden, Gyorgy Lorinczy, Lewis Hine, Evelyn Hofer, Karol Kallay, Andre Kertesz, William Klein Helen Levitt, Danny Lyon, Daido Moriyama, Ugo Mulas, Robert Rauschenberg, Kees Scherer, Aaron Siskind, Weegee, Kojima Yasutaka, Ruiko Yoshida, among others. 350 photographs

Anything Goes? - Esra Akcan 2021

In 1987, Berlin as a whole became a laboratory for architecture. A wide range of notable buildings with a unique density was created in the East and the West in connection with the city's 750th anniversary. While the buildings were vilified at the time, they now appear as important witnesses to a 'postmodern' era of building, which called the traditional architecture of the modern living environment into question. Today, the buildings have disappeared, been modified, or are threatened with demolition. For the first time, the exhibition and publication examine the significance of the architectural visions developed in East and West Berlin in the final decade before the fall of the Berlin Wall.

This extensively researched guide to creating EPUB files by best-selling author Elizabeth Castro shows you how to prepare EPUB files, make the files look great on the screen, work around EPUB weaknesses, and fix common errors. In this essential book, Liz shares her hard-earned experience for how to: Create EPUB files from existing Microsoft Word or Adobe InDesign files, or from scratch. Tweak EPUB files to take full advantage of the power of EPUB in each respective ereader. Control spacing, indents, and margins. Insert images and sidebars and wrap text around them. Roy Lichtenstein in His Studio - Laurie Lambrecht 2011-10-25

Roy Lichtenstein in His Studio is a portfolio of vivid and engaging photographs by Laurie Lambrecht, who was an administrative assistant to Lichtenstein for three years. She and the artist worked together daily, and the bond between them is evident in the photographs. Lichtenstein is shown working on two major series, Reflections and The Interiors. He is completely absorbed, oblivious to the camera, as he mounts ladders, assembles colors, composes, and steps back to consider the effect. During this period Lambrecht assisted in gathering material for a major retrospective at the Guggenheim Museum in New York. As a result, the photographs include scrapbooks and sketchbooks and other archival material that document Lichtenstein's entire career. There are stencils of Ben-Day dots, clippings from newspapers and comic books, Polaroid snapshots, rolls of tape, and boxes of colored pencils. Lichtenstein encouraged Lambrecht to make photographs and was often pleased and amused by the results. These images offer fascinating insight into Lichtenstein's working processes and source materials, as well as being vibrant works of art in their

own right. In her essay Dorothy Lichtenstein, wife of the artist, recalls the collegial atmosphere of the studios in New York and Southampton in the early 1990s, a time of extraordinary productivity. Edward Robinson, an associate curator at the Los Angeles County Museum of Art, describes Lambrecht's process and approach.

Instrumental Methods in Food and Beverage Analysis - D.L.B. Wetzel
1998-05-29

Advances in instrumentation and applied instrumental analysis methods have allowed scientists concerned with food and beverage quality, labeling, compliance, and safety to meet ever increasing analytical demands. Texts dealing with instrumental analysis alone are usually organized by the techniques without regard to applications. The biannual review issue of Analytical Chemistry under the topic of Food Analysis is organized by the analyte such as N and protein, carbohydrate, inorganics, enzymes, flavor and odor, color, lipids, and vitamins. Under 'flavor and odor' the subdivisions are not along the lines of the analyte but the matrix (e.g. wine, meat, dairy, fruit) in which the analyte is being determined. In "Instrumentation in Food and Beverage Analysis" the reader is referred to a list of 72 entries entitled "Instrumentation and Instrumental Techniques" among which molecular spectroscopy, chromatographic and other sophisticated separations in addition to hyphenated techniques such as GS-Mass spectrometry. A few of the entries appear under a chapter named for the technique. Most of the analytical techniques used for determination, separations and sample work prior to determination are treated in the context of an analytical method for a specific analyte in a particular food or beverage matrix with which the author has a professional familiarity, dedication, and authority. Since, in food analysis in particular, it is usually the food matrix that presents the research analytical chemist involved with method development the greatest challenge.

Solid State Nuclear Magnetic Resonance Studies of Model Biological Membranes - Jose Silva Santos 2001

Letters to Freya - Helmuth Von Moltke
1995-01-15

The compelling true story of a man of conscience at the heart of the Third Reich. In the years when most Germans were abetting a policy of conquest and genocide,

Helmuth James von Moltke, an aristocratic and devoutly Christian young lawyer drafted into the German Intelligence Service, was working tirelessly against it. Throughout the war, he fought through the labyrinthine insanity of wartime bureaucracy on behalf of Jews and foreign prisoners and organized a clandestine resistance to the Nazi regime. From 1939 to the eve of his execution from treason in 1945, von Moltke wrote letters to his wife, Freya. Gathered here, these letters transcend their format to create at once a horrifying record of the daily workings of the Third Reich and an inspiring testament to the powers of love, courage, and conscience in the most conscienceless of times. "Remarkable . . . A unique historical document, a morality tale, a love story, all set within the very heart of the Third Reich and, in a real sense, in the soul of a man of conscience."—Los Angeles Times Book Review "The words of this extraordinary patriot and humanitarian echo with astonishing relevance [and] stand on their own as testament to the impact for good a courageous individual can still exert."—Chicago Sun-Times "One of the great books of the twentieth century, [telling] a story of human failure, of overwhelming odds, of patience, and of grace."—Christian Science Monitor

Saviors of God - Nikos Kazantzakis 2012-09-04

As a writer and philosopher, Nikos Kazantzakis struggled all his life with existential questions, once spending several months in a monastery in an attempt to attain a closer relationship with God. His relentless quest to understand the nature of life through travel, extensive reading, and constant conversation with a diverse array of compatriots ultimately led Kazantzakis to compose this book of "spiritual exercises" meant to help the reader achieve harmony between the countervailing human impulses toward an immortality-seeking asceticism and toward a more nihilistic and materialist view of death. As with all Kazantzakis's philosophical works, *The Saviors of God* sheds light on a mind uniquely suited to a nuanced examination of what it means to be human, and establishes a hopeful vision for a dazzlingly syncretic approach to spiritual life.

Titian and the Renaissance in Venice - Bastian Eclercy 2019-04-30

This dazzling survey of 16th-century Venetian painting captures the striking colors and revolutionary characteristics of one of art history's greatest chapters. It is hard to imagine more profoundly influential artists than the Venetian painters of the 16th century. Whether creating sweeping devotional altarpieces or intimate portraits, the Venetian painters changed the way artists employed color and composition. These defining qualities are on brilliant display in this book that covers fascinating aspects of the work of Titian, Veronese, Tintoretto, Lorenzo Lotto, Jacopo Bassano, and many others. More than one hundred paintings, drawings, and prints are reproduced in stunning detail. Side-by-side comparisons draw readers into the conversations between Venetian artists as they tackled similar subjects and vied for commissions. The book opens with fascinating essays about the history of 16th-century Venice, the Venetian School of painting, and the techniques of the Venetian masters. As beautiful as it is

informative, this book features all of the excitement and splendor of one of the most prolific and important chapters in the history of European art.

First seeing action in the wake of the German invasion of the USSR in June 1941, the Royal Rumanian Air Force had been allied to the Luftwaffe since the Romanian government signed a Tripartite Pact with Germany and Italy in November 1940. This book reveals how, despite suffering heavy

losses to the numerically superior Russian forces, the Rumanians inflicted even greater casualties on the communists. Locked in bitter conflict with the Soviets until September 1944, when the Red Army poured across the Rumanian frontier and forced an armistice, the modest fighter force claimed 1500+ kills using primarily Bf 109's, E's.

Rosie and the Nightmares - Philip Waechter 2005-11-10

Philip Waechter, the creator of the wonderfully all-too-human hero bear in Me!, now shows an equally keen and sensitive appreciation of the dilemmas of childhood. In Rosie he has created a feisty and courageous little heroine, who can stand proudly next to William Steig's Brave Irene and Kevin Henke's Lily.
