**Global Employment Trends
for Youth - Sara Elder
2010**

This report examines the

vulnerability of youth to unemployment and the shortage of decent work. It shows where progress has or has not been made in terms of tapping the energy, talent, and creativity of young

people for the benefit of the economy's productive potential. It updates the world and regional youth labor market indicators and gives detailed analyses of longer-term trends in youth population, labor force, and employment, while providing a first glimpse at new estimates of working poverty among youth. The report shows that the impacts of the economic crisis have been disproportionately severe for young people around the world. It also offers valuable lessons learned from evaluating youth employment programs.

Green Economy and Good Governance for Sustainable Development

- José Antonio Puppim de Oliveira 2012

Much of the debate on green growth and environmental governance tends to be general in nature, and is often conceptual or limited to

single disciplines. This book examines such terms within the context of wide-interest topics including education, oceans and cities, and mixes conceptual discussion with empirical research. It takes stock of the achievements and obstacles towards sustainability over the last 20 years, and proposes new ideas and changes to create a more sustainable future. Students, academics and professionals interested in the notion of using a green economy and good governance to achieve sustainable development and poverty eradication are recommended to read this book.

Guide to Maritime Security and the ISPS Code - International Maritime Organization 2012

This user guide has been developed to consolidate existing IMO maritime

security-related material into a companion guide to SOLAS chapter XI-2 and the ISPS Code so as to assist States in promoting maritime security through development of the requisite legal framework, associated administrative practices, procedures and the necessary material, technical and human resources. The intention is to assist SOLAS Contracting Governments in the implementation, verification, compliance with, and enforcement of, the provisions of SOLAS chapter XI-2 and the ISPS Code.

Early Modern Humans at the Moravian Gate -
Maria Teschler-Nicola
2007-07-28

The Upper Paleolithic fossils of the Mladec caves, South Moravia, excavated at the end of the 19th century, hold a

key position in the current discussion on modern human emergence within Europe and the fate of the Neanderthals. Although undoubtedly early modern humans - recently radio carbon dated to 31.000 years BP - their morphological variability and the presence of archaic features are indicative to some degree of regional Neanderthal ancestry. The beautifully illustrated monograph addresses - for the first time - the complete assemblage of the finds, including the human cranial, post cranial, teeth and jaw fragments of several individuals (most of them stored at the Natural History Museum Vienna) as well as the faunal remains and the archaeological objects. Leading scientists present their results, obtained with innovative

techniques such as DNA analysis, 3D-morphometry and isotope analysis, which are of great importance for further discussions on both human evolution and archaeological issues.

Global Wage Report 2012/13 - International Labour Office 2013

Wages are a major component of decent work, yet serious knowledge gaps remain in this increasingly important area. The *Global Wage Report*, published biennially, is divided into two parts. Part I provides policy-makers, social partners and academics around the world with information on regional and global trends in the areas of wage statistics and wage policies. This information is illustrated and enriched with country-specific examples and noteworthy policy initiatives. Part II offers readers deeper

yet accessible insights into a single wage-related issue, for instance minimum wage fixing, col ...

Bringing a Case to the European Court of Human Rights - Council of Europe 2011

The European Court of Human Rights is currently overloaded with cases. Some 90% of all applications are eventually declared inadmissible. Such cases clog up the Court's docket and obstruct its examination of more deserving cases where the admissibility requirements have been satisfied and which may concern serious allegations of human rights violations. The 2010 Interlaken Conference on the reform of the Court called upon the "States Parties and the Court to ensure that comprehensive and objective information is provided to potential

applicants on the Convention and the Court's case-law, in particular on the application procedures and admissibility criteria." The Court's first response to this call was to prepare this practical guide on admissibility criteria. The guide seeks to reduce the number of obviously inadmissible cases by enabling legal practitioners to properly advise their clients on their chances of bringing an admissible application. This second edition covers case-law up to the end of March 2011 and provides lay applicants with more succinct information on the admissibility criteria. The book includes a foreword by Sir Nicolas Bratza, President of the European Court of Human Rights.

The World's Heritage -

Unesco 2014

A unique guide to every UNESCO World Heritage site, this book explores some of the world's most extraordinary places.

Social Protection for Older Persons - Sri

Wening Handayani

2012-07-01

The rising number of older persons in Asia has accentuated the importance of strengthening the systems of social protection in the region. This book examines the effectiveness and relevance of noncontributory or social pensions in supporting older persons in Asia. It discusses the political economy and financial sustainability of social pension reform, implications for gender equity and social rights, and design and implementation challenges. Case studies

from Bangladesh, Nepal, Thailand, Viet Nam, and South Caucasus and Central Asia provide key lessons for informing development policy and practice in Asia and the Pacific.

Work Inequalities in the Crisis - Daniel Vaughan-Whitehead 2011-01-01

'Who are the losers and the occasional winners in the current economic crisis? How have employers responded to the slump in economic growth? What lessons can be learned both from their and government labour policies? Daniel Vaughan-Whitehead, and a team of leading researchers address these questions applying the latest data and research including company case studies from across Europe, including Turkey and the transition economies. They observe some similarities, but also enormous differences.

They find novel answers as the policies developed over the past two decades to foster greater flexibility have altered the way firms respond to market changes. Are all these changes socially desirable? The authors are to be congratulated for providing such a detailed panorama and frank assessment which will be of value to both academic and policy readers.' David Marsden, London School of Economics, UK 'Since the successive crises erupted the increase in inequality has not been addressed. This important publication offers a comprehensive overview of recent developments in the workplace. It will help to promote a different policy agenda that is desperately needed to overcome the causes and consequences of the crisis, namely

addressing work inequalities.' Philippe Pochet, Catholic University of Louvain la Neuve, Belgium, and General Director of the European Trade Union Institute (ETUI), Brussels, Belgium *Work Inequalities in the Crisis* provides an in-depth overview of the effects of the crisis on inequalities in the world of work. It examines these inequalities multi-dimensionally, looking at employment, wages and incomes, working conditions and social dialogue. At the same time, it investigates whether the crisis may halt the progress made in Europe towards better quality jobs and working conditions. This book offers a unique

combination of research, case studies and policy discussions. An assessment of national trends in 30 European countries precedes case studies of 14 of them, in which noted European specialists report on individual enterprises or sectors. The volume's survey of national- and local-level policy solutions contributes to identifying those responses that strengthen economic competitiveness, preserve social cohesion and do not deepen inequalities. This timely resource will be of particular interest to academics, students and researchers in labour economics, to policymakers, and to those involved in European studies more generally.
