Multidisciplinary Coordinated Caregiving - Ronda C. Talley 2013-11-19

Effective, meaningful caregiving requires a well-coordinated and informed effort guided by various highly skilled specialists across several interrelated professions, including psychologists, social workers, and occupational therapists. Multidisciplinary Coordinated Caregiving addresses the information needs of these interrelated professionals, contributing to the direct care of individuals and serving as an essential resource for those who ultimately create collaborative approaches to contemporary caregiving plans. In addition, the volume provides a wealth of evidence-based research findings to facilitate ongoing dialogue about multidisciplinary and interdisciplinary perspectives on and interventions for the complex challenge of caregiving in America. Key areas of coverage include: The status of professional caregiving in the United States. Nursing perspectives on the state of family caregiving. Psychological aspects of caregiving. A human development, lifespan perspective on caregiving during late life. Public health contributions to caregiving. Multidisciplinary Coordinated Caregiving offers a wealth of insights for those researchers, practitioners, and graduate students who seek to optimize the care of individuals across such fields as psychology, social work, public health, geriatrics and gerontology, and medicine as well as public and educational policy making.

Global Health - Kevin McCracken 2017-07-14

Global Health continues to provide readers with a comprehensive, up-to-date and thought-provoking outline and understanding of the constantly evolving global health landscape. In this new edition the authors have maintained the successful structure and organisation of the previous edition to examine and explain recent health changes and consider likely future patterns. New or expanded topics covered include: emerging and re-emerging infectious disease threats increasing awareness of, and interest in, antimicrobial resistance and superbugs terrorism, global conflict and health the new UN 2030 Agenda for Sustainable Development the drive for Universal Health Coverage (UHC) the use of information technology in global health substance abuse palliative and end-of-life-care ethical issues in global health. Using clear and original explanations of complex issues, this text makes extensive use of boxed case studies and international examples, with discussion questions posed for readers at the end of each chapter. Readers will also be able to take advantage of the new website that was designed to complement this book. Global Health is essential reading for students and researchers of global health, public health and development studies.

Self-Efficacy in Changing Societies - Albert Bandura 1997-05-13

The volume addresses important issues of human adaptation and change.

Causal Cognition - Fyssen Foundation. Symposium 1995

An understanding of cause-effect relationships is fundamental to the study of cognition. In this book, outstanding specialists from comparative psychology, social psychology, developmental psychology, anthropology, and philosophy present the newest developments in the study of causal cognition and discuss their different perspectives. They reflect on the role and forms of causal knowledge, both in animal and human cognition, on the development of human causal cognition from infancy, and on the relationship between individual and cultural aspects of causal understanding. The result is a state-of-the-art, informative, insightful, and interdisciplinary debate aimed at the non-specialist.

Musical Imaginations - David Hargreaves 2012

Middle Range Theory for Nursing, Fourth Edition - Mary Jane Smith, PhD, RN, FAAN 2018-03-10

Three-time recipient of the AJN Book of the Year Award! Praise for the third edition: "This is an outstanding edition of this book. It has great relevance for learning about, developing, and using middle range theories. It is very user friendly, yet scholarly." Score: 90, 4 Stars -Doody's Medical Reviews The fourth edition of this invaluable publication on middle range theory in nursing reflects the most current theoretical advances in the field. With two additional chapters, new content incorporates exemplars that bridge middle range theory to advanced nursing practice and research. Additional content for DNP and PhD programs includes two new theories: Bureaucratic Caring and Self-Care of Chronic Illness. This user-friendly text stresses how theory informs practice and research in the everyday world of nursing. Divided into four sections, content sets the stage for understanding middle range theory by elaborating on disciplinary perspectives, an organizing framework, and evaluation of the theory. Middle Range Theory for Nursing, Fourth Edition presents a broad spectrum of 13 middle range theories. Each theory is broken down into its purpose, development, and conceptual underpinnings, and includes a model demonstrating the relationships among the concepts, and the use of the theory in research and practice. In addition, concept building for research through the lens of middle range theory is presented as a rigorous 10-phase process that moves from a practice story to a conceptual foundation. Exemplars are presented clarifying both the concept building process and the use of conceptual structures in research design. This new edition remains an essential text for advanced practice, theory, and research courses. New to the Fourth Edition: Reflects new theoretical advances Two completely new chapters New content for DNP and PhD programs Two new theories: Bureaucratic Caring and Self-Care of Chronic Illness Two articles from Advances in Nursing Science documenting a historical meta-perspective on middle range theory development Key Features: Provides a strong contextual foundation for understanding middle range theory Introduces the Ladder of Abstraction to clarify the range of nursing's theoretical foundation Presents 13 middle range theories with philosophical, conceptual, and empirical dimensions of each theory Includes Appendix summarizing middle range theories from 1988 to 2016

Living Through Loss - Nancy R. Hooyman 2021-08-31

Living Through Loss provides a foundational identification of the many ways in which people experience loss over the life course, from childhood to old age. It examines the interventions most effective at each phase of life, combining theory, sound clinical practice, and empirical research with insights emerging from powerful accounts of personal experience. The authors emphasize that loss and grief are universal yet highly individualized. Loss comes in many forms and can include not only a loved one's death but also divorce, adoption, living with chronic illness, caregiving, retirement and relocation, or being abused, assaulted, or otherwise traumatized. They approach the topic from the perspective of the resilience model, which acknowledges people's capacity to find

meaning in their losses and integrate grief into their lives. The book explores the varying roles of age, race, culture, sexual orientation, gender, and spirituality in responses to loss. Presenting a variety of models, approaches, and resources, *Living Through Loss* offers invaluable lessons that can be applied in any practice setting by a wide range of human service and health care professionals. This second edition features new and expanded content on diversity and trauma, including discussions of gun violence, police brutality, suicide, and an added focus on systemic racism.

Ageing, Diversity and Equality - Sue Westwood 2020-05-30

Current understandings of ageing and diversity are impoverished in three main ways. Firstly, with regards to thinking about what inequalities operate in later life there has been an excessive preoccupation with economic resources. On the other hand, less attention has been paid to cultural norms and values, other resources, wider social processes, political participation and community engagement. Secondly, in terms of thinking about the 'who' of inequality, this has so far been limited to a very narrow range of minority populations. Finally, when considering the 'how' of inequality, social gerontology's theoretical analyses remain under-developed. The overall effect of these issues is that social gerontology remains deeply embedded in normative assumptions which serve to exclude a wide range of older people. *Ageing, Diversity and Equality* aims to challenge and provoke the above described normativity and offer an alternative approach which highlights the heterogeneity and diversity of ageing, associated inequalities and their intersections. Health Literacy Among Older Adults - Dr. Karen Kopera-Frye 2016-09-28

The first graduate text to address health literacy in the aging population Low health literacy is a critical issue among adults, with over one-third found to have difficulty understanding such basic information as that found on prescription bottles. This is the first graduate textbook to address key health literacy issues as they affect the health and wellbeing of the aging population. Embracing a topic spanning numerous disciplines, it features a dynamic, multiple contextual systems approach and includes contributions from renowned scholars and practitioners in gerontology, public health, social work, nursing, and other related fields. The text emphasizes increasing health literacy among older adults through the use of technological tools and features the most current research, evidence-based programs, and practices. The book provides expansive coverage of the intersection of technology and health literacy, highlighting innovative approaches and discussing how to use technology with resource-limited groups. The text gives special consideration to rural, impoverished, culturally diverse, and low literacy elders and presents gold standard intervention programs and models. Also covered are the policy implications of programs focusing on increasing health literacy and future directions for meeting the Healthy People 2020 initiative. Case studies,

review questions, accompanying powerpoint lectures, learning objectives, will reinforce learning. Key Features: Provides a one-of-a-kind, multidisciplinary survey of the key health literacy issues of older adults Focuses on increasing health literacy across the disciplines Addresses a priority area of Healthy People 2020 Incorporates research and practice from gerontology, psychology, public health, social work, sociology, medicine, and nursing Includes case studies, review questions, learning objectives, and PowerPoint slides for assisting instructors.

Social Gerontology - Nancy R. Hooyman 2011

This textbook provides a survey of the field of social gerontology, taking a multi-disciplinary approach to the social aspects of aging and/or working with older adults. The authors demonstrate how age-related changes in the biological, functional, and psychological domains can influence the older person's interactions with his/her social and physical environment. They offer a view that presents aging positively, portraying concepts of active aging and resiliency, and defining "productive aging" by elaborating on the numerous ways elders contribute to society and their families. Based on the latest research findings, it offers understanding to critical issues of aging, attending to differences by age and cohort, gender, ethnic minority status, sexual orientation, and socio-economic status.

The Sociology of Mental Illness - Jane D. McLeod 2010

The *Sociology of Mental Illness* is a comprehensive collection of readings designed to help students develop a nuanced and sophisticated appreciation of the most important, heated--and fascinating--controversies in the field. Drawing primarily from sociological sources, the text features both classical and contemporary selections that cover the full range of sociological topics, perspectives, and debates, including the social construction of mental illness, the social origins of mental illness, and contemporary mental health treatment. This rich, varied assortment gives students a "roadmap" to the evolution and development of sociological research over time and insight into key controversies in the field. Selections include such classical readings as Scheff's original statement of labeling theory, contemporary reports on the prevalence of mental illness in countries around the world, and recent analyses of the changing treatment system. The readings are organized progressively in order to help students recognize the dynamic character of mental health research and the important role that controversies play in advancements in the field; this organization also gives students the tools they need to formulate their own views and opinions on crucial matters. A versatile, engaging text, *The Sociology of Mental Illness* is ideal for undergraduate and graduate courses in the sociology of mental illness.

A Vision for the Aging Church - James M. Houston 2011-10-10

James M. Houston and Michael Parker believe now is the time for the church to offer ministry to its increasing numbers of seniors and to benefit from ministry they can offer. They issue an urgent call to reconceive the place and part of the elderly in the local congregation, showing that seniors aren't the problem--they are the solution.

Agging - Harry R. Moody 2017-01-12

Presenting current research in an innovative text-reader format, *Agging: Concepts and Controversies, Ninth Edition* encourages students to become involved and take an informed stand on the major aging issues we face as a society. Not simply a summary of research literature, Harry R. Moody and Jennifer R. Sasser's text focuses on controversies and questions, rather than on assimilating facts or arriving at a single "correct" view about aging and older people. Drawing on their extensive expertise, the authors first provide an overview of aging in three domains: aging over the life course, health care, and the socioeconomic aspects of aging. Each section is followed by a series of edited readings, offering different perspectives from experts and specialists on that subject. New readings focus on whether current federal spending on the elderly is sustainable and fair to other groups, how older consumers are reshaping the business landscape, and the challenges of marketing and selling to customers 60 and over. More emphasis is placed on how social class and inequality earlier in life can shape our final years and the number of older Americans living in poverty. The section on *Agging and Health Care* has been thoroughly updated to reflect the latest data about chronic diseases that affect the elderly, government spending on health care, and policy changes to programs like Medicaid and Medicare. The section on the *Social and Economic Outlook for an Aging Society* gives the most current picture of the racial and ethnic diversity of older Americans, their participation in the labor force, and their income and wealth.

Morality and Spirituality in the Contemporary World - Chandana Chakrabarti 2012-12-07

The contemporary world faces a number of problems that are both deep-seated and interrelated, since they arise from the very nature of technological society. The environment upon which all life depends is seriously threatened by climate change, rising sea levels, pollution, overpopulation, resource depletion and increased risks of droughts, forest fires, floods and other extreme weather events. Environmental degradation is intimately connected to the consumer lifestyle of developed countries. This lifestyle promotes materialism, entertainment and hedonistic superficiality that ultimately lead to moral corruption. Our insensitive and destructive attitude towards nature is not isolated, or unrelated to other problems of social justice. The environmental crisis reflects human structures of domination that include political and economic exploitation, racism, sexism and ageism. These challenges are immense, and solutions to them will require a renewed dedication to moral reflection and a commitment to social justice. This book discusses the challenges in connection with topics such as human rights, economic exploitation and inequality, environmental protection, globalization, global food justice, technology, gender equality and ageism. It provides a plurality of moral and spiritual perspectives including Hinduism, Buddhism, Daoism and Christianity that offer guidance in finding responses that are both possible and reasonable.

Cruising through Caregiving - Jennifer L. FitzPatrick 2016-09-27

Aging and Diversity - Chandra Mehrotra 2013-03-07

This new edition has been completely rewritten and includes chapters that address key topics in diversity and aging: research methods, psychological aging; health beliefs, behaviors, and services; health disparities; informal and formal care for older persons; work and retirement; religious affiliation and spirituality; and death, dying, and bereavement. Taking a broad view of diversity, Mehrotra and Wagner discuss elements of diversity such as gender, race or ethnicity, religious affiliation, social class, rural-urban community location and sexual orientation. Including these elements allows them to convey some of the rich complexities of our diverse culture - complexities that provide both challenges to meet the needs of diverse population and opportunities to learn how to live in a pluralistic society. Throughout the book, Mehrotra and Wagner present up-to-date knowledge and scholarship in a way that engages readers in active learning. Rather than simply transmitting information, the authors place ongoing emphasis on developing readers' knowledge and skills; fostering higher order thinking and encouraging exploration of personal values and attitudes. Distinctive features of the book include: Opening vignettes for each chapter that present a sampling of how the issues to be discussed apply to diverse elders. Active learning experiences that invite readers to interview diverse elders, conduct internet searches, and give an analysis of a case study. Quizzes at the end of the chapters help readers ascertain the extent to which they have learned the material; the key for each quiz includes details about correct and incorrect responses so that additional learning can occur. Aging and Diversity Online boxes interspersed throughout the book provide internet resources that readers may use to find new research and publications. Suggested readings and audiovisual resources given at the end of each chapter serve as a guide to additional information on topics covered in the chapter. This approach of presenting the material will help the readers understand and apply key concepts and principles in ways that will not only improve the lives of older people they serve, but will also enhance their own aging experience.

The New Dynamics of Ageing Volume 1 - Alan Walker 2018-02-28

This volume and its companion, The new dynamics of ageing volume 2, provide comprehensive multi-disciplinary overviews of the very latest research on ageing. It reports the outcomes of the most concerted investigation ever undertaken into both the influence shaping the changing nature of ageing and its consequences for individuals and society. This book concentrates on three major themes: active ageing, design for ageing well and the relationship between ageing and socio-economic development. Each chapter provides a state of the art topic summary as well as reporting the essential research findings from New Dynamics of Ageing research projects. There is a strong emphasis on the practical implications of ageing and how evidence-based policies, practices and new products can produce individual and societal benefits.

Older Women: Current and Future Challenges of Professionals with an Aging Population - Teresa Kilbane 2016-10-14

Older Women: Current and Future Challenges of Professionals With An Aging Population is about older women and the unique challenges they face now and in coming decades. Elderly women face problems that require response from multiple service providers in the social welfare, health care and legal sectors. Due to the complexity of the various issues and the multi-systemic responses required to address these problems among diverse groups, an interdisciplinary perspective in a multicultural context needs to be examined. This book is an attempt to explain the multidisciplinary facets of social work with elderly women. Readers are also introduced to the ethical issues and challenges caused by economic disparities and are also provided with guidelines on potential responses and intervention strategies to such difficulties. Readers are also introduced to the concept of cultural competence in terms of working with aged women. The integration of theory, research and practice in this book makes it a valuable resource for academicians and working professionals who are or will be in frequent contact with older adults.

Communities in Action - National Academies of Sciences, Engineering, and Medicine 2017-04-27

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide

problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Aging Matters - Nancy R. Hooyman 2015-05-18

NOTE: This edition features the same content as the traditional text in a convenient, three-hole-punched, loose-leaf version. Gerontological Nursing: Competencies for Care - Kristen L. Mauk 2010-10-25

Important Notice: The digital edition of this book is missing some of the images or content found in the physical edition. *Gerontological Nursing: Competencies for Care, Second Edition* is a comprehensive and student-accessible text that offers a holistic and inter-disciplinary approach to caring for the elderly. The framework for the text is built around the Core Competencies set forth by the American Association of Colleges of Nursing (AACN) and the John A. Hartford Foundation Institute for Geriatric Nursing. Building upon their knowledge in prior medical surgical courses, this text gives students the skills and theory needed to provide outstanding care for the growing elderly population. It is the first of its kind to have more than 40 contributing authors from many different disciplines. Some of the key features include chapter outlines, learning objectives, discussion questions, personal reflection boxes, and case studies.

Occupational Therapy Practice Framework - American Occupational Therapy Association 2008-01-01

The Framework, an official AOTA document, presents a summary of interrelated constructs that define and guide occupational therapy practice. The Framework was developed to articulate occupational therapy's contribution to promoting the health and participation of people, organizations, and populations through engagement in occupation. The revisions included in this second edition are intended to refine the document and include language and concepts relevant to current and emerging occupational therapy practice. Implicit within this summary are the profession's core beliefs in the positive relationship between occupation and health and its view of people as occupational beings. Numerous resource materials include a glossary, references and a bibliography, as well as a table of changes between the editions.

Social Gerontology - Nancy R. Hooyman 2002

This best-selling book on social aging takes a multidisciplinary approach by considering the many factors - biological, psychological, historical, cultural - that affect the way aging individuals experience the world. The book provides a comprehensive, holistic view of aging that considers an older person's interactions with their social and physical environments, including the immediate environment of family, friends, and home, as well as the larger social structure of community, organizations, and society. Based on the latest research findings, the book offers greater depth and breadth to the critical issues of aging, attending to differences by age and cohort, gender, ethnic minority status, sexual orientation and socio-economic status. For sociologists, social workers, psychologists, health professionals, and students planning to work with the elderly.

Global Health Complications of Obesity - Jahangir Moini 2020-04-01

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. **The Adult Learner** - Malcolm S. Knowles 2020-12-21

How do you tailor education to the learning needs of adults? Do they learn differently from children? How does their life experience inform their learning processes? These were the questions at the heart of Malcolm Knowles' pioneering theory of andragogy which transformed education theory in the 1970s. The resulting principles of a self-directed, experiential, problem-centred approach to learning have been hugely influential and are still the basis of the learning practices we use today. Understanding these principles is the cornerstone of increasing motivation and enabling adult learners to achieve. The 9th edition of *The Adult Learner* has been revised to include: Updates to the book to reflect the very latest advancements in the field. The addition of two new chapters on diversity and inclusion in adult learning, and andragogy and the online adult learner. An updated supporting website. This website for the 9th edition of *The Adult Learner* will provide basic instructor aids. For each chapter, there will be a PowerPoint presentation, learning exercises, and added study questions. Revisions throughout to make it more readable and relevant to your practices. If you are a researcher, practitioner, or student in education, an adult learning practitioner, training manager, or involved in human resource development, this is the definitive book in adult learning you should not be without.

Gerontology and Social Education - Luis Jacob 2020-11-04

This book aims to learn about the development and characterization of the education for seniors, in particular the senior universities (U3A) and the possible impact they can have on their regulars. Senior universities are a lifelong education project, involving more than 100 countries, thousands of organizations and teachers and millions of students. The positive influence of these organizations in the lives of seniors is well known. The data reveal an improvement in the perception of students' physical and mental health status; increase in the number of social contacts and consequently decrease in the feeling of loneliness; there was a reduction in the antidepressant medication taken; depression levels are substantially lower than in the general population; the level of knowledge has increased, practically in the digital area, self-esteem has risen, and students feel more active and better inserted in the community. U3A worldwide have nearly two models, French and English, which does not prevent the emergence of hybrid models. In this book, we will address some issues related to ageing and lifelong education, as well as making a short history of the emergence of U3A in the world and how they currently organized. In the end, we will discuss in more detail the U3A in Portugal.

Transitions Theory - Afaf I. Meleis, PhD, DrPS (hon), FAAN 2010-02-17

"It is very exciting to see all of these studies compiled in one book. It can be read sequentially or just for certain transitions. It also can be used as a template for compilation of other concepts central to nursing and can serve as a resource for further studies in transitions. It is an excellent addition to the nursing literature." Score: 95, 4 Stars. --Doody's "Understanding and recognizing transitions are at the heart of health care reform and this current edition, with its numerous clinical examples and descriptions of nursing interventions, provides important lessons that can and should be incorporated into health policy. It is a brilliant book and an important contribution to nursing theory." Kathleen Dracup, RN, DNSc Dean and Professor, School of Nursing University of California San Francisco Afaf Meleis, the dean of the University of Pennsylvania School of

Nursing, presents for the first time in a single volume her original "transitions theory" that integrates middle-range theory to assist nurses in facilitating positive transitions for patients, families, and communities. Nurses are consistently relied on to coach and support patients going through major life transitions, such as illness, recovery, pregnancy, old age, and many more. A collection of over 50 articles published from 1975 through 2007 and five newly commissioned articles, Transitions Theory covers developmental, situational, health and illness, organizational, and therapeutic transitions. Each section includes an introduction written by Dr. Meleis in which she offers her historical and practical perspective on transitions. Many of the articles consider the transitional experiences of ethnically diverse patients, women, the elderly, and other minority

populations. Key Topics Discussed: Situational transitions, including discharge and relocation transitions (hospital to home, stroke recovery) and immigration transitions (psychological adaptation and impact of migration on family health) Educational transitions, including professional transitions (from RN to BSN and student to professional) Health and illness transitions, including self-care post heart failure, living with chronic illness, living with early dementia, and accepting palliative care Organization transitions, including role transitions from acute care to collaborative practice, and hospital to community practice Nursing therapeutics models of transition, including role supplementation models and debriefing models
