Testing and Assessment in Translation and Interpreting Studies - Claudia V. Angelelli
2009-10-22

Testing and Assessment in Translation and Interpreting Studies examines issues of measurement that are essential to translation and interpreting. Conceptualizing testing both as a process and a product, the collection of

papers explores these issues across languages and settings (including university classrooms, research projects, the private sector, and professional associations). The authors have approached their chapters from different perspectives using a variety of methods, some focusing on very specific variables, and others providing a much broader overview of the issues at hand. Chapters range from a discussion of the measurement of text cohesion in translation; the measurement of interactional competence in interpreting; the use of a particular scale to measure interpreters' renditions to the application of a specific approach to grading or general program assessment (such as interpreter or translator certification at the national level or program admissions processes). These studies point to the need for greater integration of research and practice in the specific area of testing and assessment and are a welcome addition to the field.

Without You, There Is No Us - Suki Kim
2014-10-14

A haunting account of teaching English to the sons of North Korea's ruling class during the last six months of Kim Jong-il's reign Every day, three times a day, the students march in two straight lines, singing praises to Kim Jong-il and North Korea: Without you, there is no motherland. Without you, there is no us. It is a

chilling scene, but gradually Suki Kim, too, learns the tune and, without noticing, begins to hum it. It is 2011, and all universities in North Korea have been shut down for an entire year, the students sent to construction fields—except for the 270 students at the all-male Pyongyang University of Science and Technology (PUST), a walled compound where portraits of Kim Il-sung and Kim Jong-il look on impassively from the walls of every room, and where Suki has gone undercover as a missionary and a teacher. Over the next six months, she will eat three meals a day with her young charges and struggle to teach them English, all under the watchful eye of the regime. Life at PUST is lonely and claustrophobic, especially for Suki, whose letters are read by censors and who must hide her notes and photographs not only from her minders but from her colleagues—evangelical Christian missionaries who don't know or choose to ignore that Suki doesn't share their faith. As the weeks pass, she is mystified by how easily her students lie, unnerved by their obedience to the regime. At the same time, they offer Suki tantalizing glimpses of their private selves—their boyish enthusiasm, their eagerness to please, the flashes of curiosity that have not yet been extinguished. She in turn begins to hint at the existence of a world beyond their own—at such exotic activities as surfing the Internet or traveling freely and, more dangerously, at electoral democracy and other ideas forbidden in a country where defectors risk torture and execution. But when Kim Jong-il dies, and the boys she has come to love appear devastated, she wonders whether the gulf between her world and theirs can ever be bridged. Without You, There Is No Us offers a moving and incalculably rare glimpse of life in the world's most unknowable country, and at the privileged young men she calls "soldiers and slaves."

Fundamental Aspects of Interpreter Education - David Sawyer 2004

The author offers an overview of the Interpreting Studies literature on curriculum and assessment. A discussion of curriculum definitions, foundations, and guidelines suggests a framework based upon scientific and humanistic approaches—curriculum as process and as interaction. Language testing concepts are introduced and related to interpreting. By

exploring means of integrating valid and reliable assessment into the curriculum, the author breaks new ground in this under-researched area. Case studies of degree examinations provide sample data on pass/fail rates, test criteria, and text selection. A curriculum model is outlined as a practical example of synthesis, flexibility, and streamlining. This volume will appeal to interpretation and translation instructors, program administrators, and language industry professionals seeking a discussion of the theoretical and practical aspects of curriculum and assessment theory. This book also presents a new area of application for curriculum and language testing specialists.

Providing Language Interpretation Services in Health Care Settings - Mara Youdelman 2002

Race, Ethnicity, and Language Data - Institute of Medicine 2009-12-30

The goal of eliminating disparities in health care in the United States remains elusive. Even as quality improves on specific measures, disparities often persist. Addressing these disparities must begin with the fundamental step of bringing the nature of the disparities and the groups at risk for those disparities to light by collecting health care quality information stratified by race, ethnicity and language data. Then attention can be focused on where interventions might be best applied, and on planning and evaluating those efforts to inform the development of policy and the application of resources. A lack of standardization of categories for race, ethnicity, and language data has been suggested as one obstacle to achieving more widespread collection and utilization of these data. *Race, Ethnicity, and Language Data* identifies current models for collecting and coding race, ethnicity, and language data; reviews challenges involved in obtaining these data, and makes recommendations for a nationally standardized approach for use in health care quality improvement.

Working with Interpreters and Translators - Henriette W. Langdon 2015-10-15

Working with Interpreters and Translators: A Guide for Speech-Language Pathologists and Audiologists offers state-of-the-art procedures to

conduct interviews, assessments, and conferences with students with limited English language proficiency and their families. As no research base is available in the field of communicative disorders on this specific topic, the information presented in this guide is supported by a critical review of the literature on best practices in interpreting for international conferences and legal and medical fields. Furthermore, the authors' experience working with language interpreters and training professionals as well as graduate students in communicative disorders, makes this a very valuable resource for professionals, interpreters/translators, as well as undergraduate and graduate students. Federal and state laws specify that, if necessary, English-language learners (ELL) need to be assessed in their native language when referred for possible special education. The number of ELL students attending public schools across the nation has increased in the past few decades. There are not enough speech-language pathologists (SLPs) or audiologists who are proficient in the various languages spoken by ELL students--even in Spanish, the most common language spoken by ELL students in the United States. The next best solution is to conduct assessments in collaboration with a trained interpreter/translator. Key features include: * Information and references for the most common languages spoken by ELL students * Discussion of culturally based variables that need to be considered in the process of interviewing and working with linguistically and culturally diverse populations *Description of the roles and responsibilities for individuals who will be collaborating as interpreters and translators with SLPs and audiologists in various contexts, such as interviews, assessments, and various meetings (such as IEPs and IFSPs), as well as suggestions on training individuals in this collaborative process *Review of best practices in speech-language and audiological assessments, both with and without materials in the given language Disclaimer: Please note that ancillary content (such documents, audio, and video) may not be included as published in the original print version of this book. Working with Interpreters and Translators: A Guide for Speech-Language Pathologists and Audiologists

is a must-have reference for anyone working with ELL students. Although the process was developed with the pediatric population in mind, much of this information can be applied to older culturally and linguistically diverse populations in need of speech-language and/or hearing services. It will also be useful to professionals working with language interpreters in allied health professions in other countries.

We all have the tools to learn what might not seem to come naturally to us at first--the secret is to understand how the brain works so we can unlock its power. This book explains: Why sometimes letting your mind wander is an important part of the learning process How to avoid "rut think" in order to think outside the box Why having a poor memory can be a good thing The value of metaphors in developing understanding A simple, yet powerful, way to stop procrastinating Filled with illustrations, application questions, and exercises, this book makes learning easy and fun.

The Practice of Court Interpreting - Alicia Betsy Edwards 1995-01-01

The Practice of Court Interpreting describes how the interpreter works in the court room and other legal settings. The book discusses what is involved in court interpreting: case preparation, ethics and procedure, the creation and

avoidance of error, translation and legal documents, tape transcription and translation, testifying as an expert witness, and continuing education outside the classroom. The purpose of the book is to provide the interpreter with a map of the terrain and to suggest methods that will help insure an accurate result. The author, herself a practicing court interpreter, says: "The structure of the book follows the structure of the work as we do it." The book is intended as a basic course book, as background reading for practicing court interpreters and for court officials who deal with interpreters.

The Health Care Professional's Guide to Cultural Competence - E-Book - Rani Srivastava 2022-05-10

The Routledge Handbook of Translation and Health - Şebnem Susam-Saraeva 2021-05-10

The Routledge Handbook of Translation and Health provides a bridge between translation studies and the burgeoning field of health humanities, which seeks novel ways of understanding health and illness. As discourses around health and illness are dependent on languages for their transmission, impact, spread, acceptance and rejection in local settings, translation studies offers a wealth of data, theoretical approaches and methods for studying health and illness globally. Translation and health intersect in a multitude of settings, historical moments, genres, media and users. This volume brings together topics ranging from interpreting in healthcare settings to translation within medical sciences, from historical and contemporary travels of medicine through translation to areas such as global epidemics, disaster situations, interpreting for children, mental health, women's health, disability, maternal health, queer feminisms and sexual health, and nutrition. Contributors come from a wide range of disciplines, not only from various branches of translation and interpreting studies, but also from disciplines such as psychotherapy, informatics, health communication, interdisciplinary health science and classical Islamic studies. Divided into four sections and each contribution written by leading international authorities, this timely Handbook is an indispensable resource for all students and researchers of translation and health within translation and interpreting studies, as well as medical and health humanities.

Price Setting and Price Regulation in Health Care - OECD 2019-06-26

The objectives of this study are to describe experiences in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating

with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan).

Outliers - Malcolm Gladwell 2008-11-18
From the bestselling author of *Blink* and *The Tipping Point*, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

Cultural Diversity - Ruben J. Echemendia
2015-10-23

Cultural Diversity studies the relationship between culture and neuropsychology. Its goal is to examine salient aspects of this relationship and assist in bringing the issue of culture and cultural diversity to the forefront of neuropsychological discussions. The articles help further the understanding that ethnic and cultural variables are important not only in research design but also in clinical practice. In addition they urge clinicians to make cultural variables an integral component of any neuropsychological assessment and examine clinical data in the context of the patient's ethnic and cultural background.

Free Food for Millionaires - Min Jin Lee
2007-07-02

In this One Book, One New York 2019 nominee from the author of National Book Award Finalist *Pachinko*, the Korean-American daughter of first-generation immigrants strives to join Manhattan's inner circle. Meet Casey Han: a strong-willed, Queens-bred daughter of Korean immigrants immersed in a glamorous Manhattan lifestyle she can't afford. Casey is eager to make it on her own, away from the judgements of her parents' tight-knit community, but she soon finds that her Princeton economics degree isn't enough to rid her of ever-growing credit card debt and a toxic boyfriend. When a chance encounter with an old friend lands her a new opportunity, she's determined to carve a space for herself in a glittering world of privilege, power, and wealth-but at what cost? Set in a city where millionaires scramble for the free lunches the poor are too proud to accept, this sharp-eyed epic of love, greed, and ambition is a compelling portrait of intergenerational strife, immigrant struggle, and social and economic mobility. Addictively readable, Min Jin Lee's bestselling debut *Free Food for Millionaires* exposes the intricate layers of a community clinging to its old ways in a city packed with haves and have-nots.

Healthcare Interpreting - Franz Pöchhacker 2007-01-01

This volume □ the first-ever collection of research on healthcare interpreting □ centers on three interrelated themes: cross-cultural communication in healthcare settings, the interactional role of persons serving as interpreters and the discourse patterns of interpreter-mediated interaction. The individual chapters, by seven innovative researchers in the area of community-based interpreting, represent a pioneering attempt to look beyond stereotypical perceptions of interpreter-mediated interactions. First published as a Special Issue of *Interpreting* 7:2 (2005), this volume offers insights into the impact of the interpreter □ whether s/he is a trained professional or a member of the patient's family □ including ways in which s/he may either facilitate or impair reliable communication between patient and healthcare provider. The five articles cover a range of settings and specialties, from general medicine to pediatrics, psychiatry and speech therapy, using languages as diverse as Arabic, Dari, Farsi, Italian and Spanish in combination with Danish, Dutch, English and French.

The core audience is interpreters and their trainers and educators. While the emphasis is on medical, educational and social services interpreting, legal and faith-based interpreting are also addressed.

The Bilingual Courtroom - Susan Berk-Seligson 2017-05-23

Susan Berk-Seligson's groundbreaking book draws on more than one hundred hours of audio recordings of Spanish/English court proceedings in federal, state, and municipal courts—along with a number of psycholinguistic experiments involving mock juror reactions to interpreted testimony—to present a systematic study of court interpreters that raises some alarming, vitally important concerns. Contrary to the assumption that interpreters do not affect the dynamics of court proceedings, Berk-Seligson

shows that interpreters could potentially make the difference between a defendant being found guilty or not guilty of a crime. This second edition of the *The Bilingual Courtroom* includes a fully updated review of both theoretical and policy-oriented research relevant to the use of interpreters in legal settings, particularly from the standpoint of linguistic pragmatics. It provides new insights into interpreting in quasi-judicial, informal, and specialized judicial settings, such as small claims court, jails, and prisons; updates trends in interpreter certification and credentialing, both in the United States and abroad; explores remote interpreting (for example, by telephone) and interpreter training programs; looks at political trials and tribunals to add to our awareness of international perspectives on court interpreting; and expands upon cross-cultural issues. Also featuring a new preface by Berk-Seligson, this second edition not only highlights the impact of the previous versions of *The Bilingual Courtroom*, but also draws attention to the continued need for critical study of interpreting in our ever diversifying society.
