Big Brother Naija and Popular Culture in Nigeria -

Christopher Isike 2023-02-28
This book is about Big Brother Naija (BBN), which is a Nigerian version of the Big Brother franchise featured in more than 50 countries of the world with its major concept drawn from George Orwell 's novel, Nineteen Eighty-Four . It is organised and starred by Nigerians but viewed in many parts of the world. The book

critically engages this relatively new phenomenon in Nigeria which apparently lacks scholarly attention. It proffers insights into the show's significance and implications for the nation with relation to mental health, morality, cultural di

•The 24 chapters contained in this volume provide diverse but also congruent perspectives on future foci for research into postgraduate education and supervision in the knowledge society. The chapters move from deliberations on challenges for postgraduate supervision at macro level (such as the pressure to increase postgraduate output and the implications of increasingly managerialist institutions) to meso level matters (the form and function of postgraduate education in specific countries) to the micro (rich case studies of individual institutions, programmes and supervisors).

Basel III Liquidity Regulation and Its Implications - Mark A.

Petersen 2014

The financial crisis of 2007-2009 had a deleterious effect on liquidity in the global banking system, resulting in the introduction of the new Basel III liquidity regulation. In this book, we apply such regulation to global liquidity data for 391 hand-selected LIBOR-based banks in 38 countries for the period 2002 to 2012. We show how to develop a framework for proposed Basel III liquidity regulation and demonstrate how to decide on methodologies for studying the aforementioned regulation. Basel III emphasizes both the use of liquidity coverage ratios (LCR) and net stable funding ratios (NSFR) as measures of liquidity risk. We show how these ratios may be approximated to measure risk and how liquidity affects bank insolvency and failure. Using LIBOR-OISS, we also demonstrate how market-wide liquidity risk was a major predictor of bank failures in 2009 and 2010, while idiosyncratic liquidity risk

(determined by other liquidity risk measures) was a less reliable predictor. Further, we determine how to analyze the connections between Basel III liquidity regulation and bank capital. Finally, we discuss how the implementation of Basel III liquidity regulation will affect sovereign credit as well as macroeconomic variables such as GDP, investment, inflation, consumption, personal disposable income, personal savings and employment. The book is intended to be used in executive banking courses, advanced undergraduate, Masters and MBA courses in banking; by banking practitioners, consultants and in consulting seminars as well as banking libraries.

Food Security and Food Sovereignty Challenges in Africa - Lere Amusan
2022-08-19

This edited volume advances knowledge of food security and food sovereignty for students

and researchers. The book analyses and interprets field data and interrogates relevant literature, which forms the basis for decisions on improving food security and sovereignty in Africa. It deepens an understanding of food fraud, and of multinational corporations' (MNCs) manipulations of food quality to the detriment of consumers. It provides information to advance new knowledge on the issue of international interdependency of unequal exchange, and the inactions of governments against the dumping and waste of food.

Investigating Audiences -

Andy Ruddock 2007-08-08

Picking up on some of the themes developed in his critically acclaimed book *Understanding Audiences* (SAGE, 2000), this new book on audience research focuses on qualitative methods and will draw upon students' own media experience. The book is divided into chapters that deal with audience research in terms of concepts and topics. Regarding concepts,

Investigating Audiences is firmly grounded within interpretive approaches to studying viewers, readers and listeners. Further to this, the book looks at the different ways in which media influence can be accessed and the attendant methodological consequences. These issues are then applied to a survey of recent scholarship on a variety of topics such as violence, pornography, video gaming, and children and advertising. Investigating Audiences will be very useful for undergraduates in media studies/mass communications courses containing qualitative research components and dealing with cultural studies themes and approaches to audience studies.

Science and Technology Teacher Education in the Anthropocene - Miranda

Rocksén 2022-05-18

This unique book compares anthropogenic challenges in science and technology teacher education between the northern and southern contexts of Sweden and South Africa, respectively. Presenting the results of a three-year research collaboration between science and technology teacher education researchers from South Africa and Sweden, the book explores theoretical perspectives and pedagogical experiences in response to challenges in the Anthropocene. It discusses research-informed practice in teacher education to address sustainable development. Chapters in the book collectively investigate the influence of current environmental and societal

changes on the education of teachers, answering the question of how science and technology teacher education can adjust to current changes in the world and prepare new teachers for work in their future profession. Touching on issues such as climate change, global warming and pandemic diseases, the book uses a comparative approach and explores opportunities and possibilities for fulfilling the goals of science and technology education for sustainable development. The book offers recommendations and opportunities to implement sustainability issues and develop sustainable teaching strategies. It will be a key reading for researchers, academics and post-graduate students in the fields of teacher education, science and technology education, sustainability education and comparative education.

[New Directions in Ecofeminist Literary Criticism](#) - Andrea Campbell 2009-03-26

As ecofeminism continues to gain attention from multiple

academic discourses, the field of literary criticism has been especially affected by this philosophy/social movement. Scholars using ecofeminist literary criticism are making new and important arguments concerning literature across the spectrum and issues of environment, race, class, gender, sexuality, and other forms of oppression. The essays in *New Directions in Ecofeminist Literary Criticism* highlight the intersections of these oppressions through the works of different authors including Barbara Kingsolver, Ruth Ozeki, Linda Hogan and Flora Nwapa, and demonstrate the expansion of ecofeminist literary criticism to a more global scale as well as important connections with the field of environmental justice. This collection offers fresh insight and expands the important discussion surrounding the field of ecofeminism and literature.

The Management of Intellectual Property - D.

Bosworth 2006-01-01

This book will be a useful

resource for those studying or teaching the management of IP. . . a welcome addition on the reading list for all good IP management courses. Duncan Bucknell, *Journal of Intellectual Property Law and Practice* This book brings together innovative contributions on the management of intellectual property (IP) and intellectual property rights by an esteemed and multi-disciplinary group of economists, management scientists, accountants and lawyers. Offering a broad and enlightening picture of the measurement and management of IP, the contributors argue that the shift towards a knowledge-based economy has increased the importance of IP and more generally, intangible assets, as a focus for company decision-making behaviour. The book explores these intangible assets, which are driven by investments in R&D, marketing, education and training, management information systems and organizational structure. The inherent risk in the development of such assets

born from the involvement of creativity and innovation is also discussed. The Management of Intellectual Property should prove of use to both students of management and managers in the field who have to make decisions with regard to investments in, and the protection of, IP and other intangible assets.

A scholarly contribution to educational praxis - M.A.

Mokoena 2016-12-31

This publication contains original research targeting scientific specialists in the field of education, through research endeavours grounded on a philosophical basis, as well as being embedded in the empirical. The research methodology of each chapter emanates from applicable philosophical assumptions in the form of an applicable theoretical and conceptual framework. The latter forms a firm basis for the application of sound empiricism. The content of this book adds to the body of scholarly knowledge in education. In his evaluation of the book, Acting Executive

Dean, Faculty of Education and Training, Professor Akpovire Oduaran, made the following remarks: 'To a large extent, the ideas put together in this book have come from data generated not just from literature found in books and journals but actual interactions with educators and the learning environment. So then, what the reader is offered in this volume is the articulation of ideas that have been interrogated, structured and presented in surprisingly simplistic and yet incisive and academically enriching content that can match the standards of scholarship that is available in the Western World. Yet, what makes this book so welcome, relevant and timely, is the fact that it is built around Afrocentric theories and practices such as one may find in imported literature.'

Academic Literacy

Development - Laura-Mihaela Muresan 2021-03-11

This edited book brings together an international cast of contributors to examine how academic literacy is learned

and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners

interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

Advanced Coating Materials - Liang Li 2018-12-06

Provides a comprehensive, yet practical source of reference, and excellent foundation for comparing the properties and performance of coatings and selecting the most suitable materials based on specific service needs and environmental factors. Coating technology has developed significant techniques for protecting existing infrastructure from corrosion and erosion, maintaining and enhancing the performance of equipment, and provided novel functions such as smart coatings greatly benefiting the medical device, energy, automotive and construction industries. The mechanisms, usage, and manipulation of cutting-edge coating methods are the focus of this book. Not only are the working mechanisms of coating

materials explored in great detail, but also craft designs for further optimization of more uniform, safe, stable, and scalable coatings. A group of leading experts in different coating technologies demonstrate their main applications, identify the key bottlenecks, and outline future prospects. Advanced Coating Materials broadly covers the coating techniques, including cold spray, plasma vapor deposition, chemical vapor deposition, sol-gel method, etc., and their significant applications in microreactor technology, super(de)wetting, joint implants, electrocatalyst, etc. Numerous kinds of coating structures are addressed, including nanosize particles, biomimicry structures, metals and complexed materials, along with the environmental and human compatible biopolymers resulting from microbial activities. This state-of-the-art book is divided into three parts: (1) Materials and Methods: Design and Fabrication, (2) Coating Materials: Nanotechnology,

and (3) Advanced Coating Technology and Applications. *Political Economy of Resource, Human Security and Environmental Conflicts in Africa* - Kelechi Johnmary Ani 2021-08-31

This book shows the push and pull effects between resources, human security and conflicts in Africa. It recognizes the need for resources in Africa to be processed into finished goods in order to influence global market and redefine the pattern of trade relations with powerful countries of Asia, America and Europe in shaping the destiny and future of African countries. The achievement of this laudable objective is plagued by the security challenges which are directly or indirectly linked to resource-related conflicts rocking most of the resource endowed countries in the continent, thereby threatening global peace and security. To deal with this menace in the continent, it requires global co-operation and support of foreign governments, international organizations,

international non-government organizations, governments of host countries and its citizens. The book presents the cases and experiences of countries that are endowed with resource, as well as have experienced different forms of human insecurity and have witnessed environmental conflicts in its analysis, which make the discourse interesting and quite educating.

Handbook Of The Sociology Of Youth In Brics Countries -

Dwyer Tom 2017-11-08

Youth are, by definition, the future. This book brings initial analyses to bear on youth in the five BRICS countries: Brazil, Russia, India, China and South Africa, which are home to nearly half of the world's youth. Very little is known about these youth outside of their own countries since the mainstream views on "youth" and "youth culture" are derived from the available literature on youth in the industrialized West, which is home to a small part of the world's youth. This book aims to help fill in this gap. The handbook examines the state of youth, their past, present and permits the development of insights about future. The BRICS countries have all engaged in development processes and some remarkable improvements in young people's lives over recent decades are documented. However, the chapters also show that these gains can be undermined by instabilities,

poor decisions and external factors in those countries. Periods of economic growth, political progress, cultural opening up and subsequent reversals rearticulate differently in each society. The future of youth is sharply impacted by recent transformations of economic, political and social realities. As new opportunities emerge and the influence of tradition on youth's lifestyles weakens and as their norms and values change, the youth enter into conflict with dominant expectations and power structures. The topics covered in the book include politics, education, health, employment, leisure, Internet, identities, inequalities and demographics. The chapters provide original insights into the development of the BRICS countries, and place the varied mechanisms of youth development in context. This handbook serves as a reference to those who are interested in having a better understanding of today's youth. Readers will become acquainted with many issues

that are faced today by young people and understand that through fertile dialogues and cooperation, youth can play a role in shaping the future of the world. *Doctoral Education in South
Africa* - Cloete, Nico
2015-12-08
Worldwide, in Africa and in

South Africa, the importance of
the doctorate has increased
disproportionately in relation
to its share of the overall
graduate output over the past
decade. This heightened
attention has not only been
concerned with the traditional
role of the PhD, namely the
provision of future academics;
rather, it has focused on the
increasingly important role
that higher education - and,
particularly, high-level skills -
is perceived to play in national
development and the
knowledge economy. This book
is unique in the area of
research into doctoral studies
because it draws on a large
number of studies conducted
by the Centre of Higher
Education Trust (CHET) and
the Centre for Research on
Evaluation, Science and
Technology (CREST), as well as
on studies from the rest of
Africa and the world. In
addition to the historical
studies, new quantitative and
qualitative research was
undertaken to produce the
evidence base for the analyses
presented in the book. The

findings presented in Doctoral Education in South Africa pose anew at least six tough policy questions that the country has struggled with since 1994, and continues to struggle with, if it wishes to gear up the system to meet the target of 5 000 new doctorates a year by 2030. Discourses framed around the single imperatives of growth, efficiency, transformation or quality will not, however, generate the kind of policy discourses required to resolve these tough policy questions effectively. What is needed is a change in approach that accommodates multiple imperatives and allows for these to be addressed simultaneously.

Historical Dictionary of

Lesotho - Rosenberg

2003-12-16

Although Lesotho is a small state never likely to be a major player in global affairs, its special interactions with South Africa make it a prototype for

regional cooperation. Joint action by South Africa's and Botswana's military forces to end anarchy and preserve democracy in Lesotho serves as an important test case of regional peacekeeping in Africa. This reference provides comprehensive entries on historical events and personalities and focuses especially on the Basotho who have shaped Lesotho's development rather than on colonial officials and other expatriates. Greatest attention is given to the events, institutions, issues, personalities, places and external relationships of the post-independence era. The bibliography introduces a plethora of newer publications about Lesotho that have supplanted the rather sparse published literature previously available. An extensive chronology of Lesotho's evolution is included. The authors range of professional expertise and ability to compliment each author's areas of specialization. Offers in depth coverage of the most

crucial events and participants
in Lesotho's development.
