Cities and Design - Paul L. Knox 2010-07-12

Cities, initially a product of the manufacturing era, have been thoroughly remade in the image of consumer society. Competitive spending among affluent households has intensified the importance of style and design at every scale and design professions have grown in size and importance, reflecting distinctive geographies and locating disproportionately in cities most intimately connected with global systems of key business services. Meanwhile, many observers still believe good design can make positive contributions to people's lives. *Cities and Design* explores the complex relationships between design and urban environments. It traces the intellectual roots of urban design, presents a critical appraisal of the imprint and effectiveness of design professions in shaping urban environments, examines the role of design in the material culture of contemporary cities, and explores the complex linkages among designers, producers and distributors in contemporary cities, for example: fashion and graphic design in New York; architecture, fashion and publishing in London; furniture, industrial design, interior design and fashion in Milan; haute couture in Paris and so on. This book offers a distinctive social science perspective on the economic and cultural context of design in

contemporary cities, presenting cities themselves as settings for design, design services and the 'affect' associated with design.

Netspaces - Katharine S. Willis 2017-05-15

The focus of this book is on understanding and explaining the way that our increasingly networked world impacts on the legibility of cities; that is how we experience and inhabit urban space. It reflects on the nature of the spatial effects of the networked and mediated world; from mobile phones and satnavs to data centres and wifi nodes and discusses how these change the very nature of urban space. It proposes that netspaces are the spaces that emerge at the interchange between the built world and the space of the network. It aims to be a timely volume for both architectural, urban design and media practitioners in understanding and working with the fundamental changes in built space due to the ubiquity of networks and media. This book argues that there needs to be a much better understanding of how networks affect the way we inhabit urban space. The volume defines five characteristics of netspaces and defines in detail the way that the spatial form of the city is affected by changing practices of networked world. It draws on theoretical approaches and contextualises the discussion with empirical case

studies to illustrate the changes taking place in urban space. This readable and engaging text will be a valuable resource for architects, urban designers, planners and sociologists for understanding how of networks and media are creating significant changes to urban space and the resulting implications for the design of cities.

limited language: rewriting design - Colin Davies
2009-11-06

Limited Language is a web-platform, co-founded in 2005 by Colin Davies (University of Wolverhampton) and Monika Parrinder (Royal College of Art, London), for generating writing and discussion about the design process. Over the last four years the site has collected a series of essays and commentary dealing with the key issues which effect and shape visual communication today. limited language: rewriting design, examines the relationship between traditional printed formats (the book) and new digital ones (blogging). Hybrid media forms are already transforming design. How might they be used to rethink design writing? limited language: rewriting design creates an alternative and innovative "writing space" - the reflection and distance which can be offered only by a book. Each of its sub-sections comprises an article from the website, followed by a reflection/response to the topic by the responses raised on limitedlanguage.org, while rich visual imagery in colour illustrates each article/response. "This is a rare book about design that embraces ideas with as much enthusiasm as objects. It illustrates its premise by showing feedback culture in action. If you find yourself wanting to join in the dialogue with thoughts of your own - and you will - their website is ready and waiting." -Rick Poynor www.limitedlanguage.org

Planning and Urban Design Standards - American Planning Association 2012-09-17

The new student edition of the definitive reference on urban planning and design Planning and Urban Design Standards, Student Edition is the authoritative and reliable volume designed to teach students best practices

and guidelines for urban planning and design. Edited from the main volume to meet the serious student's needs, this Student Edition is packed with more than 1,400 informative illustrations and includes the latest rules of thumb for designing and evaluating any land-use scheme--from street plantings to new subdivisions. Students find real help understanding all the practical information on the physical aspects of planning and urban design they are required to know, including: * Plans and plan making * Environmental planning and management * Building types * Transportation * Utilities * Parks and open space, farming, and forestry * Places and districts * Design considerations * Projections and demand analysis * Impact assessment * Mapping * Legal foundations * Growth management preservation, conservation, and reuse * Economic and real estate development Planning and Urban Design Standards, Student Edition provides essential specification and detailing information for various types of plans, environmental factors and hazards, building types, transportation planning, and mapping and GIS. In addition, expert advice guides readers on practical and graphical skills, such as mapping, plan types, and transportation planning.

ADA Handbook - Martha R. Williams 1993

The Americans with Disabilities Act of 1990 ensures for disabled people the right to work and conduct their lives as fully as possible. This legislation affects millions of employers and businesses. Written in straightforward, non-legal language, this guide discusses the issues surrounding employment and construction requirements. It also contains the complete text of the ADA and the complete ADA Accessibility Guidelines.

Retail Design - Ann Petermans 2016-12-01

The late twentieth century saw rapid growth in consumption and the expansion of retailing and services. This was reflected in the number and type of stores and locations, from regional shopping malls and out-of-town superstores to concept and flagship stores. Retail design became an essential part of its success by

creating distinctive brands and formats. However, the economic recession in the developed world and competition for consumer goods from the developing world has led to a re-assessment of the growth-led conventions of the retail industry. In addition, the rapid advance of e-commerce and online shopping has created new challenges for physical stores and the communication and distribution of retail brands. The book will provide students, researchers and practitioners a detailed assessment of retail design, taking a distinctive global approach to place design practice and theory in context. Chapters are devoted to key issues in the visual and structural contribution of design to retail brands and format development, and to the role of design in communication. In the course of the book, the authors engage with problems of convergence between retailing and other services and between the physical and virtual worlds, and also changing patterns of use, re-use and ownership of retail spaces and buildings. Retail Design concerns designers and organisations but also defines its broader contribution to society, culture and economy.

Brilliance by Design - Vicki Halsey 2011-01-10

Many subject matter experts are just that, subject matter experts--not experts in the art of teaching, facilitating, or designing. Thousands of authors, trainers, and speakers have great content, but they lack the skills required to convey their content in a way that inspires learners to unleash their brilliance and move the learning to practice.. They often spend 70% of their time on WHAT they are going to teach, and 30% of their time on HOW, when they should be spending 30% on WHAT, and 70% on HOW. Their instructional techniques often are at odds with their message of inclusivity, eagerness for people to learn, and hopes that their content will change lives and organizations. "Brilliance by Design" outlines how to design learning interactions (such as meetings and workshops) that enable people to do their best thinking. Using the tested, signature ENGAGE model, it helps anyone who brings people together

for the purpose of learning, problem-solving, or innovating to develop a clear, high-impact training design that unleashes brilliance. It presents a model that enables teachers to analyze learner and teacher needs, create objectives that meet those needs, and incorporate interactive tools that "fire 'em up," ensuring all key outcomes are met. To help readers unleash the brilliance in others, this book provides the structure, tools, language, and models needed to create optimal learning experiences from their ideas, practices, models and books. In learning these techniques, readers will achieve powerful outcomes, building communities of learners who share best practices and communicate at a deep and profound level while doing real work.

Ghost industries - Irene Curulli 2018-08-03

What is the role of water in the conversion of former industrial areas? How is water used in engaging the public to experience these sites both as physical and cultural places? Can ecological design foster the coexistence of industry and environment? The book addresses these core questions by examining the impact of the former Oregonian industry (1830-1940) on the Willamette River landscape and discussing how projects of transformation interpret the triangular interplay among industry, landscape and water. This book is a source of suggestions and ideas for scholars, students and professionals in architecture, landscape architecture, planning and their related fields who want to manage the urban landscapes successfully.

Participatory Practice in Space, Place, and Service

Design - Kelly L. Anderson 2022-10-18

'Participatory Practice in Space, Place, and Service Design' is premised on a belief in the importance of participatory practices in finding creative solutions to the plethora of problems we face today. It argues that engaging professions with the public in mutual exploration, analysis, and creative thinking is essential. It not only ensures better quality products, places, services, and a greater sense of civic agency but also facilitates fuller access to them and the life opportunities they can unleash. This book offers a uniquely varied perspective of the myriad ways in which participatory practices operate across disciplines and how they impact the worlds and communities we create and inhabit. This book suggests that participatory practices are multi-disciplinary and relevant in fields as diverse as design, architecture, education, health care, sustainability, and community activism, to name a few of those discussed here. How do designed objects and environments affect wellness, creativity, learning, and a sense of belonging? How do products and services affect everyday experience and attitudes towards issues such as sustainability? How does giving people a creative voice in their own education, services, and built environments open up their potential and strengthen identity and civic agency? Addressing these questions requires a rethinking of relations between people, objects, and environments; it demands attention to space, place, and services.

Italian Signs, American Streets - Fred L. Gardaphé 1996
In the first major critical reading of Italian American narrative literature in two decades, Fred L. Gardaphé presents an interpretive overview of Italian American literary history. Examining works from the turn of the twentieth century to the present, he develops a new perspective--variously historical, philosophical, and cultural--by which American writers of Italian descent can be read, increasing the discursive power of an ethnic literature that has received too little serious critical attention. Gardaphé draws on Vico's concept of

history, as well as the work of Gramsci, to establish a culture-specific approach to reading Italian American literature. He begins his historical reading with narratives informed by oral traditions, primarily autobiography and autobiographical fiction written by immigrants. From these earliest social-realist narratives, Gardaphé traces the evolution of this literature through tales of "the godfather" and the mafia; the "reinvention of ethnicity" in works by Helen Barolini, Tina DeRosa, and Carole Maso; the move beyond ethnicity in fiction by Don DeLillo and Gilbert Sorrentino; to the short fiction of Mary Caponegro, which points to a new direction in Italian American writing. The result is both an ethnography of Italian American narrative and a model for reading the signs that mark the "self-fashioning" inherent in literary and cultural production. *Italian Signs, American Streets* promises to become a landmark in the understanding of literature and culture produced by Italian Americans. It will be of interest not only to students, critics, and scholars of this ethnic experience, but also to those concerned with American literature in general and the place of immigrant and ethnic literatures within that wide framework.

The World Book Encyclopedia - 2002

An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

Lackawanna Heritage Valley, Management Action Plan - 2004

Services Marketing - Jochen Wirtz 2016-03-29

Services Marketing: People, Technology, Strategy is the eighth edition of the globally leading textbook for *Services Marketing* by Jochen Wirtz and Christopher Lovelock, extensively updated to feature the latest academic research, industry trends, and technology, social media and case examples. This textbook takes on a strong managerial approach presented through a coherent and progressive pedagogical framework rooted in solid

academic research. Featuring cases and examples from all over the world, *Services Marketing: People, Technology, Strategy* is suitable for students who want to gain a wider managerial view of Services Marketing.

Introduction to Landscape Design - John L. Motloch
2000-08-25

Outstanding explorations of design concepts, principles, and processes This Second Edition of *Introduction to Landscape Design* offers even broader coverage of the environmental, human, technological, and aesthetic issues associated with landscape design than the first edition. Beginning with the way we perceive, manage, and design the landscape, it moves on to explore the forces that influence land design. An overview of landscape management, planning, and design includes a discussion of the roles and integration of the professions involved, modes of professional practice, and site scale design processes. The book explores the ecology of design and the integration of land design decisions into dynamic systems. This fully updated new edition: * Presents landscape design as a synergism of art and science * Addresses the interplay between buildings and sites * Provides insights into the breadth of people-environment relationships * Places special emphasis on our growing understanding of interrelationships between the landscape and human decisions A superb introduction for students as well as a useful reference for practicing professionals, this book is an excellent guide for anyone who wants to develop a better understanding of landscape design.

Urban Architecture and Local Spaces in Pakistan - Suneela Ahmed
2022-10-27

This book is set in Karachi, Pakistan and investigates the possibility of achieving localness through identifying urban process and their impact on built form, addressing how locals associate with the urban spaces and how they value it. Thus, the investigation, using the local terminology *maqamiyat*, goes beyond the physicality of space and develops a framework that helps to understand the social, ethnic, economic, ecological

and other the non-physical aspects of space, which are of value to the locals. The aim is to investigate the possibility of achieving localness through identifying urban design elements that can be incorporated into the process of designing new built forms that acknowledges what is valued by the locals instead of superimposing imported designs, negating the contextual realities, both physical and social. For this purpose, the book includes three case studies from Karachi. The book questions the aspiration of many cities in the South Asian context to imitate the built forms of Western cities (increasingly, Singapore and Shanghai) which are viewed as modern and represents future. The book will make a theoretical contribution to the existing literature on postcolonial urbanism and explore space from a local vantage point for understanding how to look inwards for aspiration.

Architect - 2007

Designing Web Navigation - James Kalbach
2007-08-28

Thoroughly rewritten for today's web environment, this bestselling book offers a fresh look at a fundamental topic of web site development: navigation design. Amid all the changes to the Web in the past decade, and all the hype about Web 2.0 and various "rich" interactive technologies, the basic problems of creating a good web navigation system remain. *Designing Web Navigation* demonstrates that good navigation is not about technology-it's about the ways people find information, and how you guide them. Ideal for beginning to intermediate web designers, managers, other non-designers, and web development pros looking for another perspective, *Designing Web Navigation* offers basic design principles, development techniques and practical advice, with real-world examples and essential concepts seamlessly folded in. How does your web site serve your business objectives? How does it meet a user's needs? You'll learn that navigation design touches most other aspects of web site development. This book: Provides the foundations of web navigation and offers a framework for navigation design Paints a broad picture of web

navigation and basic human information behavior
Demonstrates how navigation reflects brand and affects site credibility
Helps you understand the problem you're trying to solve before you set out to design
Thoroughly reviews the mechanisms and different types of navigation
Explores "information scent" and "information shape"
Explains "persuasive" architecture and other design concepts
Covers special contexts, such as navigation design for web applications
Includes an entire chapter on tagging
While *Designing Web Navigation* focuses on creating navigation systems for large, information-rich sites serving a business purpose, the principles and techniques in the book also apply to small sites. Well researched and cited, this book serves as an excellent reference on the topic, as well as a superb teaching guide. Each chapter ends with suggested reading and a set of questions that offer exercises for experiencing the concepts in action.

Space Planning Basics - Mark Karlen 2011-09-20

Space planning involves much more than sketching a preliminary floor plan. A designer must take a client's programming needs into account and must also consider how other factors such as building codes and environmental factors affect a spatial composition. *Space Planning Basics*, now in its Third Edition, offers a highly visual, step-by-step approach to developing preliminary floor plans for commercial spaces. The book provides tools for visualizing space and walks the designer through other considerations such as building code requirements and environmental control needs. Specific programming techniques covered include matrices, bubble diagrams, CAD templates, block plans, and more. New to this edition are coverage of the basics of stair design, an essential aspect for planning spaces.

Exporting Chinese Architecture - Charlie Qiuli Xue
2022-08-18

This book studies the unexplored history of China-aided architecture erected in the developing world since the 1950s. By 2019, over 1,000 buildings had been delivered

to more than 160 countries, including parliament houses, convention centers, stadiums, gymnasiums, theaters, schools, hospitals, libraries, railways, and stations. These projects, which have played a significant role in promoting economic transformation, cultural engagement and social and environmental well-being, have largely been overlooked or misunderstood by the international community. Why did China donate so many foreign-aid buildings? How were these buildings built in the remote land of developing countries with intricate influences and limited resources? Have they helped modernize the recipient countries? The authors of this book use a wide range of representative projects built in different historic periods and geographical locations as case studies to address the above questions from various perspectives. This book fills an enormous gap in modern architecture in China and the world. It offers architectural students and scholars in various disciplines the necessary knowledge on "diplomatic architecture"; informs architects the appropriate methods of cross-border design and low-tech building; teaches government officials the best practice of donating and receiving foreign-aid buildings; and enhances public awareness of cultural diversity in Asia, Africa, Oceania, and Latin America. With abundant first-hand materials, historical pictures, and drawings, the book is a must-read for those who are interested in modern architecture and developmental aid in the world. China's architecture abroad, notably in Africa and Asia, has been perceived with both fascination and anxiety. Based on a wealth of sources often difficult to access for scholars from outside China, this book links the history and present of China's architectural mobilities in ways that will stimulate new debates in architectural history and urban studies. - Łukasz Stanek, Professor of Architectural History, The University of Manchester, UK

Cities Going Green - Roger L. Kemp 2014-01-10

Over the past several decades, numerous planning

movements have taken root within the United States. With names like "Urban Renewal," "Garden Cities," "Healthy Cities," "Smart Growth," "Eco-Cities" and "Sustainability," these programs promote ways to create, protect, preserve, enhance, and restore the quality of life in cities, towns and suburbs, especially in regards to the natural environment. This guide to the best practices of these programs introduces the rapidly evolving field before presenting more than 40 case studies of communities that are effectively "going green." An assessment of the future of these towns and cities and resources for citizens and officials seeking additional information conclude the work. By compiling these success stories, this handbook makes an excellent resource for anyone seeking to facilitate the restoration of the natural environment within their community.

Signs of Disability - Stephanie L. Kerschbaum 2022-12-13

"This book centers on story as a means of making disability available for noticing. The framework of signs of disability forwarded in this book is drawn from the author's lived experience of disability and deafness as well as rhetoric, feminist materialist scholarship, and critical disability studies"--

Interdisciplinary work at the gateway to design

The Image of the City - Kevin Lynch 1964-06-15

The classic work on the evaluation of city form. What does the city's form actually mean to the people who live there? What can the city planner do to make the city's image more vivid and memorable to the city dweller? To answer these questions, Mr. Lynch, supported by studies of Los Angeles, Boston, and Jersey City, formulates a new criterion—imageability—and shows its potential value as a guide for the building and rebuilding of cities. The wide scope of this study leads to an original and vital method for the evaluation of city form. The architect, the planner, and certainly the

city dweller will all want to read this book.

The Emerald Handbook of Multi-Stakeholder Communication

- Pantea Foroudi 2022-10-21

The Emerald Handbook of Multi-Stakeholder Communication gathers an international, multidisciplinary team of experts to explore effective brand messaging for multiple stakeholders, utilizing a diverse array of theoretical and methodological approaches that cumulatively present an up-to-date overview of the whole field.

Proceedings of the 20th Congress of the International

Ergonomics Association (IEA 2018) - Sebastiano Bagnara

2018-08-04

This book presents the proceedings of the 20th Congress of the International Ergonomics Association (IEA 2018), held on August 26-30, 2018, in Florence, Italy. By highlighting the latest theories and models, as well as cutting-edge technologies and applications, and by combining findings from a range of disciplines including engineering, design, robotics, healthcare, management, computer science, human biology and behavioral science, it provides researchers and practitioners alike with a comprehensive, timely guide on human factors and ergonomics. It also offers an excellent source of innovative ideas to stimulate future discussions and developments aimed at applying knowledge and techniques to optimize system performance, while at the same time promoting the health, safety and wellbeing of individuals. The proceedings include papers from researchers and practitioners, scientists and physicians, institutional leaders, managers and policy makers that contribute to constructing the Human Factors and Ergonomics approach across a variety of methodologies, domains and productive sectors. This volume includes papers addressing the following topics: Aging, Gender and Work, Anthropometry, and Ergonomics for Children and Education.

Race, Rhetoric, and Technology - Adam J. Banks

2006-08-15

Examines moments in traditions of appeals, warnings,

demands, and debates to make explicit the connections between technological issues and African Americans' equal and just participation in American society. This volume is intended for researchers, professionals, and students in Rhetoric, Computers and Composition, and African American Studies.

Deaf Gain - H-Dirksen L. Bauman 2014-10-15

Deaf people are usually regarded by the hearing world as having a lack, as missing a sense. Yet a definition of deaf people based on hearing loss obscures a wealth of ways in which societies have benefited from the significant contributions of deaf people. In this bold intervention into ongoing debates about disability and what it means to be human, experts from a variety of disciplines—neuroscience, linguistics, bioethics, history, cultural studies, education, public policy, art, and architecture—advance the concept of Deaf Gain and challenge assumptions about what is normal. Through their in-depth articulation of Deaf Gain, the editors and authors of this pathbreaking volume approach deafness as a distinct way of being in the world, one which opens up perceptions, perspectives, and insights that are less common to the majority of hearing persons. For example, deaf individuals tend to have unique capabilities in spatial and facial recognition, peripheral processing, and the detection of images. And users of sign language, which neuroscientists have shown to be biologically equivalent to speech, contribute toward a robust range of creative expression and understanding. By framing deafness in terms of its intellectual, creative, and cultural benefits, Deaf Gain recognizes physical and cognitive difference as a vital aspect of human diversity. L'Enfant's Legacy - Michael Bednar 2006-05-31

Outstanding Academic Title for 2007, Choice Magazine Many American democratic ideals are embodied in the public spaces of its cities, especially in Washington, D.C. In L'Enfant's Legacy architect and scholar Michael Bednar explores the public spaces of the nation's capital, examining the context of the surrounding architecture and the roles of the spaces in the changing functional life of the city. Bednar examines the ways in which L'Enfant's innovative plan of 1791, along with later developments, symbolizes and encourages democratic freedoms and traditions. In the spaces of Capitol Square, citizens expect to encounter their government directly in a dignified setting, a symbolic public forum. On the White House grounds they expect to meet the president where he works and lives. At the National Mall—America's front lawn—citizens exercise their rights of assembly and free speech, as well as play football, eat lunch, and socialize. From historic Lincoln Square, Dupont Circle, and Judiciary Square to the newly developed Freedom Plaza, Pershing Park, and Market Square, Bednar's thoughtful study provides a fresh perspective on the role of public space in the expression of democratic ideals.

Emerging Concepts in Urban Space Design - Geoffrey

Broadbent 2003-09-06

This important work, now available in paperback, from Professor Geoffrey Broadbent, provides a clear analysis of the nature of many of today's design problems, identifying their causes in history and suggesting a basis for co-ordinated solutions. The author discusses 'picturesque' and 'formal' tendencies in modern architecture, relating them to parallels between philosophic thought and design theory through the ages. Using a wealth of international examples from around the world including America, UK, Italy, Germany and France and with over 250 photographs and illustrations, *Emerging Concepts in Space Design* offers a fascinating insight into the history and likely future directions of urban design.

Making Healthy Places, Second Edition - Nisha Botchwey
2022-07-12

The first edition of *Making Healthy Places* offered a visionary and thoroughly researched treatment of the connections between constructed environments and human health. Since its publication over 10 years ago, the field of healthy community design has evolved significantly to address major societal problems, including health disparities, obesity, and climate change. Most recently, the COVID-19 pandemic has upended how we live, work, learn, play, and travel. In *Making Healthy Places, Second Edition: Designing and Building for Well-Being, Equity, and Sustainability*, planning and public health experts Nisha D. Botchwey, Andrew L. Dannenberg, and Howard Frumkin bring together scholars and practitioners from across the globe in fields ranging from public health, planning, and urban design, to sustainability, social work, and public policy. This updated and expanded edition explains how to design and build places that are beneficial to the physical, mental, and emotional health of humans, while also considering the health of the planet. This edition expands the treatment of some topics that received less attention a decade ago, such as the relationship of the built environment to equity and health disparities,

climate change, resilience, new technology developments, and the evolving impacts of the COVID-19 pandemic.

Drawing on the latest research, *Making Healthy Places, Second Edition* imparts a wealth of practical information on the role of the built environment in advancing major societal goals, such as health and well-being, equity, sustainability, and resilience. This update of a classic is a must-read for students and practicing professionals in public health, planning, architecture, civil engineering, transportation, and related fields.

Light: The Shape of Space - Lou Michel 1995-10-27

Light: The Shape of Space Designing with Space and Light
Lou Michel Every design professional who touches a space shapes the light and the feeling of that space.

Architect, lighting engineer, interior designer, lighting or home furnishing manufacturer: each contributes an aesthetic layer, sometimes yielding unexpected results. All too often the best laid plans of one professional are unintentionally subverted by another. Removing surprises and guess work from design, Lou Michel, honored architectural lighting educator, has created *Light: The Shape of Space*, showing how to design with the effects of light rather than light itself. The book is a revolutionary resource for all design professionals and manufacturers of surfacing materials. Drawing on over fifteen years' experience of research and teaching in the architectural Space and Light Laboratory at The University of Kansas, Michel masterfully examines the interrelationship of lighting and the design of architectural space as perceived not in architectural photos or paint chips and fabric swatches, but by human vision - the gateway to emotional response. The book was written for professionals who care about how people feel in the spaces they design, and focuses on the humanization of architecture. Taking a non-stylistic approach to design, Michel analyzes architecture from the perspective of how the users see their surroundings as they move through space. The reader will learn what pleases and what disturbs people based on how the human visual system responds to color,

texture, pattern, and brightness. The book features principles of design for the student and professional, and is generously supported by illustrations and research. Michel also provides a method for evaluating the visual effectiveness of building materials and lighting systems, including those that will appear on the market long after this book is dog-eared. Michel unveils a groundbreaking luminance brightness rating system (LBR) and a nine-zone brightness scale to aid designers in previsualizing the appearance of surfacing materials at every stage of the design process, from schematics to development to refinement. Among the topics treated are: the interaction of lighting and spatial design color theory for space and light the luminance relationships between free-standing objects and the surrounding spatial boundaries against which they are seen the appearance of building materials in color and brightness when modified by light and spatial location lighting spatial connections, including the perception of rooms adjacent to the observer lighting and perception of spaces screened by architectural grilles creating lighted space Designing with the effects of light is both an art and a science. No other book on the market bridges that gap as successfully as *Light: The Shape of Space*.

Community Wayfinding: Pathways to Understanding -
Rebecca H. Hunter 2016-05-11

This book examines wayfinding from a broad public health perspective and articulates what needs to be done to create better wayfinding for all people regardless of age, ability, or mode of transportation. Addressing both science and the human experience, the book brings together a group of international experts to examine community wayfinding from a variety of viewpoints. It first presents a critical foundation for understanding wayfinding from an individual perspective. Next, it describes relevant design principles and practices by drawing upon architecture, environmental graphic design, universal design (UD), and urban planning. The book then goes on to examine wayfinding tools and innovative

technologies ranging from maps to apps to complex systems. In addition, coverage includes case studies, lessons from wayfinding improvement initiatives, and recommendations for future research, practice, and policy. /div Overall, the book focuses on the economic and commercial benefits of good wayfinding, its potential impact on the health of individuals and communities, as well as strategies for the journey ahead. It will appeal to numerous professionals across many disciplines from architecture and cartography to public health and urban planning. Additionally, the book can help advance a dialogue among those interested in enhancing the livability of their communities.

Universal Design 2016: Learning from the Past, Designing for the Future - H. Petrie 2016-09-15

Universal Design is the term used to describe the design of products and environments which can be used by all people, to the greatest extent possible, without the need for adaptation or specialized design. It is not a euphemism for 'designs for people with a disability', but really is about designing to include all people, regardless of their age, ability, cultural background or status in life. However it remains the case that many designers and developers fail to understand the need for universal design and lack the skills needed to implement it. This book presents papers from the 3rd International Conference on Universal Design (UD 2016), held in York, UK, in August 2016. The theme of the conference was: learning from the past, designing for the future, and it aimed to bring together policymakers, practitioners and researchers interested in the different strands of universal design to exchange ideas and best practice, review some of the developments in universal design from the last 20 years, and formulate strategies for taking the concept of universal design forward into the future. The book is divided into two sections. Section 1: About Universal Design, and Section 2: Universal Design In Practice. The book will be of interest to all those whose work involves design, from the built environment and tangible products to communication, services and

systems.

Hermeneutic Humility and the Political Theology of Cinema - Sean Desilets 2016-06-10

This book revisits the tradition of Western religious cinema in light of scholarship on St. Paul's political theology. The book's subtitle derives from the account in the Book of Acts that St. Paul was temporarily blinded in the wake of his conversion on the road to Damascus. In imitation of Paul, the films on which Sean Desilets's analysis hinges (including those of Carl-Th. Dreyer, Robert Bresson, Pier Paolo Pasolini, and Carlos Reygadas) place a god-blind mechanism, the camera, between themselves and the divine. Desilets calls the posture they adopt "hermeneutic humility": hermeneutic in that it interprets the world, but humble in that it pays particular—even obsessive—attention to its own limits. Though these films may not consciously reflect Pauline theology, Desilets argues that they participate in a messianic-hermeneutic tradition that runs from Paul through St. Augustine, Blaise Pascal, Karl Barth, and Walter Benjamin, and which contributes significantly to contemporary discussions in poststructuralist literary theory, political theology, and religious studies. Desilets's insightful explication of Jean-Luc Nancy's deconstruction of Christianity and Giorgio Agamben's recent work on religion makes a substantial contribution to film philosophy and emerging critical trends in the study of religion and film. This book puts forward a nuanced theoretical framework that will be useful for film scholars, students of contemporary political

theology, and scholars interested in the intersections of religion and media.

Cross-Cultural Design - P.L.Patrick Rau 2014-06-02

This volume constitutes the refereed proceedings of the 6th International Conference on Cross-Cultural Design, CCD 2014, held as part of the 16th International Conference on Human-Computer Interaction, HCI International 2014, held in Heraklion, Crete, Greece, jointly with 13 other thematically similar conferences. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from numerous submissions. The papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. They thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The 76 papers included in this volume deal with the following topics: cross-cultural product and service design; cross-cultural issues in interaction; social aspects and implications of cross-cultural design; cross-cultural issues in e-commerce, marketing and branding; cross-cultural design for knowledge sharing and learning; cross-cultural design for the smart city and cross-cultural design for creativity.

Universal Principles of Design, Revised and Updated - William Lidwell 2010

Universal Principles of Design is the first comprehensive, cross-disciplinary encyclopedia of design.
