Dunant's Dream -
Caroline Moorehead 1998
The Red Cross was the

dream of the Swiss
businessman Henri Dunant
that grew into the pre-
eminent international
humanitarian charity.
The story begins in

1859, when almost by chance, Dunant witnessed the butchery and lack of care for injured soldiers during the battle of Solferino. Realizing that, although modern warfare meant more, and worse, wounded, medical treatment for the first time could save significant numbers of them, he began a crusade leading to 137 national societies and 250 million members today.

*Unity of Mission
Civilian-Military Teams
in War and Peace* - U. S. Air Force 2017-01-20

The wars in Afghanistan and Iraq have been an integral part of the American consciousness for most of the new millennium. Military successes and failures have dominated the headlines. Names such as Tora Bora, Abbottabad, Abu Ghraib, and Fallujah, unknown to the American public (and

even regional specialists at the Pentagon and Foggy Bottom) a decade ago, have become catchphrases for a new generation of political and military analysts. Yet perhaps the most enduring legacy of US involvement in these wars has been the evolution of US military doctrine and the concomitant growth of the whole-of-government approach that puts stability operations and civil affairs on equal footing with combat operations. The whole-of-government approach is defined as "one where a government actively uses formal and/or informal networks across the different agencies within that government to coordinate the design and implementation of the range of interventions that the government's agencies will be making in order

to increase the effectiveness of those interventions in achieving the desired objectives."1 While these principles have exerted influence in national security strategies in the United States and among NATO other organizations since the mid-twentieth century, the concept was distilled early in the first decade of this century. It underlays work on stability operations, "complex operations," peacebuilding, and counterinsurgency (COIN) doctrine.

Fighting for Darfur -

Rebecca Hamilton
2011-02-01

Around the world, millions of people have added their voices to protest marches and demonstrations because they believe that, together, they can make a difference. When we

failed to stop the genocide in Rwanda in 1994, we promised to never let such a thing happen again. But nine years later, as news began to trickle out of killings in western Sudan, an area known as Darfur, the international community again faced the problem of how the United Nations and the United States government could respond to mass atrocity. Rebecca Hamilton passionately narrates the six-year grassroots campaign to draw global attention to the plight of Darfur's people. From college students who galvanized entire university campuses in the belief that their outcry could save millions of Darfuris still at risk, to celebrities such as Mia Farrow, who spurred politicians to act, to Steven Spielberg, who boycotted the 2008

Summer Olympics in Beijing, Hamilton details how advocacy for Darfur was an exuberant, multibillion-dollar effort. She then does what no one has done to date: she takes us into the corridors of power and the camps of Darfur, and reveals the impact of ordinary people's fierce determination to uphold the mantra of "never again." Fighting for Darfur weaves a gripping story that both dramatizes our moral dilemma and shows the promise and perils of citizen engagement in a new era of global compassion.

The Russian Military and the Georgia War - Ariel Cohen 2011-01-01

In this monograph, the authors state that Russia planned the war against Georgia in August 2008 aiming for the annexation of Abkhazia, weakening the Saakashvili regime, and

prevention of NATO enlargement. According to them, while Russia won the campaign, it also exposed its own military as badly needing reform. The war also demonstrated weaknesses of the NATO and the European Union security systems.

Black Index - Richard Newman 1981

Publisher description: American Indian Rhetorics of Survivance presents an original critical and theoretical analysis of American Indian rhetorical practices in both canonical and previously overlooked texts: autobiographies, memoirs, prophecies, and oral storytelling traditions. Ernest Stromberg assembles essays from a range of academic disciplines that investigate the rhetorical strategies of Native American orators, writers, activists,

leaders, and intellectuals. The contributors consider rhetoric in broad terms, ranging from Aristotle's definition of rhetoric as "the faculty . . . of discovering in the particular case what are the available means of persuasion," to the ways in which Native Americans assimilated and revised Western rhetorical concepts and language to form their own discourse with European and American colonists. They relate the power and use of rhetoric in treaty negotiations, written accounts of historic conflicts and events, and ongoing relations between American Indian governments and the United States. This is a groundbreaking collection for readers interested in Native American issues and the study of language. In presenting an

examination of past and present Native American rhetoric, it emphasizes the need for an improved understanding of multicultural perspectives.

Do the Geneva

Conventions Matter? -

Matthew Evangelista 2017

The Geneva Conventions are the best-known and longest-established laws governing warfare, but what difference do they make to how states engage in armed conflict? Since the start of the "War on Terror" with 9/11, these protocols have increasingly been incorporated into public discussion. We have entered an era where contemporary wars often involve terrorism and guerrilla tactics, but how have the rules that were designed for more conventional forms of interstate violence adjusted? Do the Geneva Conventions Matter?

provides a rich, comparative analysis of the laws that govern warfare and a more specific investigation relating to state practice. Matthew Evangelista and Nina Tannenwald convey the extent and conditions that symbolic or "ritual" compliance translates into actual compliance on the battlefield by looking at important studies across history. To name a few, they navigate through the Algerian War for independence from France in the 1950s and 1960s; the US wars in Korea, Vietnam, Iraq, and Afghanistan; Iranian and Israeli approaches to the laws of war; and the legal obligations of private security firms and peacekeeping forces. Thoroughly researched, this work adds to the law and society literature in sociology, the constructivist

literature in international relations, and legal scholarship on "internalization." Do the Geneva Conventions Matter? gives insight into how the Geneva regime has constrained guerrilla warfare and terrorism and the factors that affect protect human rights in wartime.

Genocide - Adam Jones
2006-09-27

An invaluable introduction to the subject of genocide, explaining its history from pre-modern times to the present day, with a wide variety of case studies. Recent events in the former Yugoslavia, Rwanda, East Timor and Iraq have demonstrated with appalling clarity that the threat of genocide

is still a major issue within world politics.

The book examines the differing

interpretations of genocide from

psychology, sociology, anthropology and

political science and analyzes the influence

of race, ethnicity, nationalism and gender

on genocides. In the final section, the

author examines how we punish those responsible

for waging genocide and how the international

community can prevent further bloodshed.

Technological Slavery (Large Print 16pt)

- Theodore J. Kaczynski
2011-02

Theodore Kaczynski saw violent collapse as the only way to bring down the techno-industrial system, and in more than a decade of mail bomb terror he killed three people and injured 23 others. One does not need to support the

actions that landed Kaczynski in supermax prison to see the value of his essays disabusing the notion of heroic technology while revealing the manner in which it is destroying the planet. For the first time, readers will have an uncensored personal account of his anti-technology philosophy, including a corrected version of the notorious 'Unabomber Manifesto,' a critique of anarcho-primitivism, and essays regarding 'the Coming Revolution.'

The Women's Army Corps, 1945-1978 - Bettie J. Morden 2011-10-07

After years out of print, this new and redesigned book brings back the best and most complete history of the Women's Army Corps. Loaded with history, tables, charts, statistics, photos, personalities, and many useful appendices

(including a history of WAC uniforms), *The Women's Army Corps, 1945-1978* is a must reading for anyone who served those years in the Army as well as for those who want a complete history of the modern-day military. Author Bettie Morden served from 1942-1972 and she used her experience and access to people and records to compile the definitive reference work. Col. Morden is a graduate of the WAC Officers' Advanced Course (1962); Command and General Staff College (1964); and the Army Management School (1965). She has been awarded the Distinguished Service Medal, the Legion of Merit, the Joint Service Commendation Medal, and the Army Commendation Medal with Oak Leaf Cluster.

Fundamentals of Genocide and Mass Atrocity

Prevention - Scott Straus 2016
"Fundamentals of Genocide and Mass Atrocity Prevention presents key insights into US and international efforts to prevent genocide and mass atrocities worldwide. Since the Holocaust and World War II, an international community of policy makers, scholars, and activists has developed a loose network of norms, institutions, and policy tools to prevent and respond to acts of mass violence against civilians. Fundamentals analyzes the normative, legal, and operational opportunities and challenges associated with preventing genocide and mass atrocities to date, and identifies unresolved issues in this nascent field of study and practice. It also offers important insights into

opportunities to strengthen both our understanding of and our ability to implement policies and programs to stop the world's worst violence." --Goodreads.

The Concept of Mens Rea in International Criminal Law - Mohamed Elewa Badar 2013-01-30
The purpose of this book is to find a unified

approach to the doctrine of mens rea in the sphere of international criminal law, based on an in-depth comparative analysis of different legal systems and the jurisprudence of international criminal tribunals since Nuremberg. Part I examines the concept of mens rea in common and continental legal systems, as well as its counterpart in Islamic Shari'a law. Part II looks at the jurisprudence of the post-Second World War trials, the work of the International Law Commission and the concept of genocidal intent in light of the travaux préparatoires of the 1948 Genocide Convention. Further chapters are devoted to a discussion of the boundaries of mens rea in the jurisprudence of the International Criminal Tribunals for

the former Yugoslavia and Rwanda. The final chapter examines the definition of the mental element as provided for in Article 30 of the Statute of the International Criminal Court in light of the recent decisions delivered by the International Criminal Court. The study also examines the general principles that underlie the various approaches to the mental elements of crimes as well as the subjective element required in perpetration and participation in crimes and the interrelation between mistake of law and mistake of fact with the subjective element. With a Foreword by Professor William Schabas and an Epilogue by Professor Roger Clark From the Foreword by William Schabas Mohamed Elewa Badar has taken this complex landscape of

mens rea at the international level and prepared a thorough, well-structured monograph. This book is destined to become an indispensable tool for lawyers and judges at the international tribunals. From the Epilogue by Professor Roger Clark This is the most comprehensive effort I have encountered pulling together across legal systems the 'general part' themes, especially about the 'mental element', found in confusing array in the common law, the civil law and Islamic law. In this endeavour, Dr Badar's researches have much to offer us.

The Law of Global Governance - Eyal Benvenisti 2014-07-02

Also available as an e-book The book argues that the decision-making processes within international organizations and other global governance bodies ought to be subjected to procedural and substantive legal constraints that are associated domestically with the requirements of the rule of law. The book explains why law – international, regional, domestic, formal or soft – should restrain global actors in the same way that judicial oversight is applied to domestic administrative agencies. It outlines the emerging web of global norms designed to protect the rights and interests of all affected individuals, to enable public deliberation, and to promote the legitimacy of the global bodies. These norms are being shaped by a growing convergence of

expectations of global institutions to ensure public participation and representation, impartiality and independence of decision-makers, and accountability of decisions. The book explores these mechanisms as well as the political and social forces that are shaping their development by analysing the emerging judicial practice concerning a variety of institutions, ranging from the UN Security Council and other formal organizations to informal and private standard-setting bodies.

Combating Trafficking in Persons - 2009

Trafficking in persons is a form of modern-day slavery, a human rights violation that constitutes a crime against the individual and the State. It must be recognized and punished by legislative means. Parliamentarians have an essential role to play in the fight against human trafficking. The Handbook for Parliamentarians suggests some practical ways in which they can develop and promote the comprehensive frameworks needed to do so.

Engineering - Unesco
2010-01-01

This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to

identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of making engineering more attractive to young people, especially women.--Publisher's description.

Stiff: The Curious Lives of Human Cadavers - Mary

Roach 2004-05-17

Beloved, best-selling science writer Mary Roach's "acutely entertaining, morbidly fascinating" (Susan Adams, Forbes) classic, now with a new epilogue. For two thousand years, cadavers – some willingly, some unwittingly – have been involved in science's boldest strides and weirdest undertakings. They've tested France's first guillotines, ridden the NASA Space Shuttle, been crucified in a Parisian laboratory to test the authenticity of the Shroud of Turin, and helped solve the mystery of TWA Flight 800. For every new surgical procedure, from heart transplants to gender confirmation

surgery, cadavers have helped make history in their quiet way.

"Delightful—though never disrespectful" (Les Simpson, Time Out New York), *Stiff*

investigates the strange lives of our bodies postmortem and answers the question: What should we do after we die? "This quirky, funny read offers perspective and insight about life, death and the medical profession. . . . You can close this book with an appreciation of the miracle that the human body really is." —Tara Parker-Pope, Wall Street Journal "Gross, educational, and unexpectedly sidesplitting."

War, Women, and Power - Marie E. Berry

2018-03-15

Rwanda and Bosnia both experienced mass violence in the early 1990s. Less than ten years later, Rwandans surprisingly elected the world's highest level of women to parliament. In Bosnia, women launched thousands of community organizations that became spaces for informal political participation. The political mobilization of women in both countries complicates the popular image of women as merely the victims and spoils of war. Through a close examination of these cases, Marie E. Berry

unpacks the puzzling relationship between war and women's political mobilization. Drawing from over 260 interviews with women in both countries, she argues that war can reconfigure gendered power relations by precipitating demographic, economic, and cultural shifts. In the aftermath, however, many of the gains women made were set back. This book offers an entirely new view of women and war and includes concrete suggestions for policy makers, development organizations, and activists supporting women's rights.
