Beginner Piano/Keyboard Instruction

Enrique Granados - Walter Aaron Clark 2006

"Granados was among the leading pianists of his time, and his eloquence at the keyboard inspired critics to dub him the "poet of the piano." In Enrique Granados: Poet of the Piano, Walter Aaron Clark offers the first substantive study in English of this virtuoso pianist, composer, and music pedagogue. While providing detailed analyses of his major works for voice, piano, and the stage, Clark argues that Granados's art represented a unifying presence on the cultural landscape of Spain during a period of imperial decline, political unrest, and economic transformation. Drawing on newly discovered documents, Clark explores the cultural spheres in which Granados moved, particularly of Castile and Catalonia. Granados's best-known music was inspired by the art of Francisco Goya, especially the Goyescas suite for solo piano that became the basis for the opera. These pieces evoked the colorful and dramatic world that Goya inhabited and depicted in his art. Granados's fascination with Goya's Madrid set him apart from fellow nationalists Albeniz and Falla, who drew their principal inspiration from Andalusia. Though he was resolutely apolitical, Granados's attraction to Castile antagonized some Catalan nationalists, who resented

Castilian domination. Yet, Granados also made important contributions to Catalan musical theater and was a prominent figure in the modernist movement in Barcelona."

Michael Aaron Adult Piano Course, Book 1 -

Michael Aaron 1999-11-24

The interest in piano and the desire to play, has increased tremendously in the past few years. Especially is this noticeable among adults who have either had some elementary piano instruction in their youth or have been denied this study for various reasons. This increased interest is partly due to the widespread influence of radio. Hearing music almost daily has become an integral part of our lives and it is this constant influence which has awakened a keen and natural desire to become an active participant. It is to the furtherance and stimulation of this natural desire that this course was planned. The adult approach has been kept constantly in mind, however not to the exclusion of certain basic principles which are necessary in order to make rapid and satisfactory progress. The logical and stepwise manner of progression in this course should prove of inestimable aid to both the student and teacher.

Poco Piano for Young Children, Bk 1 - Ying Ying Ng 2016-08

Book 1 introduces the child to the keyboard, staves, clefs, simple time signatures, note values, and rests. Reading encompasses notes to a 5th above and a 5th below Middle C. The notes A and E are introduced first, played by a braced 3rd finger of each hand. This encourages free movement of the whole arm from the shoulder, and develops a natural, balanced hand position, before the 5-finger position is gradually mastered. The first line of the treble staff and the fifth line of the bass staff are highlighted, and further lines are similarly treated as the child learns more notes. Staccato, slurs, ties, upbeats, and repeat signs are all experienced in Book 1. Tempo and dynamic markings encourage musical playing, and are in English, in order to avoid "knowledge overload."

Sarmiento's Travels in the U.S. in 1847 - Michael Aaron Rockland 2015-03-08

Domingo Faustino Sarmiento (1811-1888), Argentine educator, statesman, and writer, self-educated after the model of Benjamin Franklin, was "not a man but a nation," in the words of Mrs. Horace Mann. Like De Tocqueville, this remarkable man visited the United States in its early years and wrote a detailed account of this new phenomenon. Full of shrewd social commentary and unique vignettes of the America of this period-of Boston, for instance, where Sarmiento met the Horace Manns and later Emerson and Longfellow-Travels should take its place among the important commentaries on the United States written during the last century by foreign visitors. Professor Rockland's introductory essay provides the broader context in which Travels must be seen: its place in Sarmiento's life and career and its importance as testimony to forgotten lines of influence between North and South America. Originally published in 1970. Processing, second edition - Casey Reas 2014-12-19

The new edition of an introduction to computer programming within the context of the visual arts, using the open-source programming language Processing; thoroughly updated throughout. The

visual arts are rapidly changing as media moves into the web, mobile devices, and architecture. When designers and artists learn the basics of writing software, they develop a new form of literacy that enables them to create new media for the present, and to imagine future media that are beyond the capacities of current software tools. This book introduces this new literacy by teaching computer programming within the context of the visual arts. It offers a comprehensive reference and text for Processing (www.processing.org), an open-source programming language that can be used by students, artists, designers, architects, researchers, and anyone who wants to program images, animation, and interactivity. Written by Processing's cofounders, the book offers a definitive reference for students and professionals. Tutorial chapters make up the bulk of the book; advanced professional projects from such domains as animation, performance, and installation are discussed in interviews with their creators. This second edition has been thoroughly updated. It is the first book to offer in-depth coverage of Processing 2.0 and 3.0, and all examples have been updated for the new syntax. Every chapter has been revised, and new chapters introduce new ways to work with data and geometry. New "synthesis" chapters offer discussion and worked examples of such topics as sketching with code, modularity, and algorithms. New interviews have been added that cover a wider range of projects. "Extension" chapters are now offered online so they can be updated to keep pace with technological developments in such fields as computer vision and electronics.
