CliffsNotes Grade 6 Common Core Math Review - Sandra Luna McCune 2015

A subject review of the Common Core Math for Grade 6, including topic reviews, example problems, and two practice tests to help students better understand this high-stakes subject.

Ready, Set, SCIENCE! - National Research Council 2007-11-30

What types of instructional experiences help K-8 students learn science with understanding? What do science educators, teachers, teacher leaders, science specialists, professional development staff, curriculum designers, and school administrators need to know to create and support such experiences? Ready, Set, Science! guides the way with an account of the groundbreaking and comprehensive synthesis of research into teaching and learning science in kindergarten through eighth grade. Based on the recently released National Research Council report Taking

Science to School: Learning and Teaching Science in Grades K-8, this book summarizes a rich body of findings from the learning sciences and builds detailed cases of science educators at work to make the implications of research clear, accessible, and stimulating for a broad range of science educators. Ready, Set, Science! is filled with classroom case studies that bring to life the research findings and help readers to replicate success. Most of these stories are based on real classroom experiences that illustrate the complexities that teachers grapple with every day. They show how teachers work to select and design rigorous and engaging instructional tasks, manage classrooms, orchestrate productive discussions with culturally and linguistically diverse groups of students, and help students make their thinking visible using a variety of representational tools. This book will be an essential resource for science education practitioners and contains information that will be extremely useful to everyone – including parents – directly or indirectly involved in the teaching of science.

Teaching Elementary School Social Studies - J. Bryan Moffet 1977

Effective Teaching in Elementary Social Studies - Tom V. Savage 1987

SYSTEMATIC INSTRUCTION IN READING FOR SPANISH-SPEAKING STUDENTS - Elva Duran 2013-04-01

Students whose first language is not English are the fastest-growing group in public schools in all regions of the United States. Almost 10 million children between the ages of five and 17 live in the homes and communities in which a language other than English is spoken and presently most schools in the U.S. are under-educating many English learners. The achievement of Hispanic students needs to improve dramatically over the next five years and this book describes the cornerstone elements for bringing about this change. The initial chapter introduces direct instruction to be used with reading and literacy programs. Chapters 2 and 3 provide excellent review of the literature in language development and address developing language instruction, listening, and speaking with Spanish-speaking students and offers what a comprehensive language development program should look like. Chapter 4 reviews academic language and literacy instruction while the next addresses the components of instruction in Spanish. Chapter 6 offers lesson plan suggestions for Spanish-speaking students, while the following two sections discuss components that transfer and do not transfer in Spanish to English reading instruction. Chapter 9 reviews English language development and provides lesson plans for implementing SDAIE programs. Finally, Chapter 10 discusses two-way bilingual immersion and shares actual classroom schedules and lessons. This unique text will help in the preparation of primary grade teachers throughout the U.S. so that they may be successful with Hispanic students entering the public schools with little or no English background. It will also be a useful tool for school districts' staff development in addressing school improvement goals for increasing the achievement of Hispanic students.

The Civil Rights Movement in Mississippi - Ted Ownby
2013-10-17

Based on new research and combining multiple scholarly approaches, these twelve essays tell new stories about the civil rights movement in the state most resistant to change. Wesley Hogan, Françoise N. Hamlin, and Michael Vinson Williams raise questions about how civil rights organizing took place. Three pairs of essays address African Americans' and whites' stories on education, religion, and the issues of violence. Jelani Favors and Robert Luckett analyze civil rights issues on the campuses of Jackson State University and the University of Mississippi. Carter Dalton Lyon and Joseph T. Reiff study people who confronted the question of how their religion related to their possible involvement in civil rights activism. By studying the Ku Klux Klan and the Deacons for Defense in Mississippi, David Cunningham and Akinyele Umoja ask who chose to use violence or to raise its possibility. The final three chapters describe some of the consequences and continuing questions raised by the civil rights movement. Byron D'Andra Orey analyzes the degree to which voting rights translated into political power for African American legislators. Chris Myers Asch studies a Freedom School that started in recent years in the Mississippi Delta. Emilye Crosby details the conflicting memories of Claiborne County residents and the parts of the civil rights movement they recall or ignore. As a group, the essays introduce numerous new characters and conundrums into civil rights scholarship, advance efforts to study African Americans and whites as interactive agents in the complex stories, and encourage historians to pull civil rights scholarship closer toward the present.

Harcourt School Publishers Storytown - Harcourt School Publishers 2005-12

Harcourt Horizons - 2003

Pájaros de la Cosecha - Blanca López de Mariscal 1995
Juan Zanate used to sit under his favorite tree--with his only friends, the harvest birds--dreaming and planning his life. Juan had big dreams of becoming a farmer like his father and grandfather. But when his father died and the land was divided, there was only enough for his two older brothers. In this charming story from the heart of the Indian tradition in Mexico, Juan learns to determine his own destiny--with help from his loyal friends, the harvest birds.

"This research publication accommodates in-depth studies that elucidate both the prospects and problems of learning assessment in higher education"--Provided by publisher.

Learning From Textbooks - Bruce K. Britton 2012-11-12

It is surprising that there is so little research on textbooks, given their centrality to teaching and learning in elementary and secondary schools. Textbooks have become a focus of political and cultural controversy, advocating a multicultural curriculum that has sparked some vigorous protests. Research is absent in this debate; therefore, questions of legitimate knowledge, the role of textbooks, textbook design, policy selection issues, and economic issues concerning the marketplace are not part of the current debate. Without insights of research on considerate text,

mentioning, illustrations and so forth, the current controversy will result in publishers responding to demands for more content not less; thus, textbooks will become compendia of information that on the surface satisfy everyone. This volume demonstrates how research on important issues relative to textbook design can advance our knowledge about what makes textbooks effective learning tools, and thus inform policymakers, publishers, and those involved in textbook selection. Representing pure and applied approaches, researchers present papers on the quality of writing, the role of questions, the role of pictures and illustrations, and the role of auxiliary materials in the design of effective textbooks. The chapters provide insight into research and its application to textbook design and improvement -- stimulating

others to follow this lead.
