This book is set against the background of the 'justice gap' in sexual

assault cases - the dramatic gap between the number of offences recorded by the police and the number of convictions. It seeks to examine the attitudinal problems which bedevil this area of law and possible strategies for addressing them. Written by a professor of law and a professor of psychology, it reviews evidence from socio-legal and social cognition research and presents new data drawn both from interviews with judges and barristers and from studies with prospective lawyers and members of the public. In the final part, it considers different ways in which rape trials could be improved and suggests steps that could be taken to change public attitudes about sexual assault.

Privacy, Due Process and the Computational Turn - Mireille Hildebrandt
2013-06-03

Privacy, Due process and the Computational Turn: The Philosophy of Law Meets the Philosophy of Technology engages with the rapidly developing computational aspects of our world including data mining, behavioural advertising, iGovernment, profiling for intelligence, customer relationship management, smart search engines, personalized news feeds, and so on in order to consider their implications for the assumptions on which our legal framework has been built. The contributions to this volume focus on the issue of privacy, which is often equated with data privacy and data security, location privacy, anonymity, pseudonymity, unobservability, and unlinkability. Here, however, the extent to which predictive and other types of data analytics operate in ways that may or may not violate privacy is rigorously taken up, both technologically and legally, in order to open up new possibilities for considering, and contesting, how we are increasingly being correlated and categorized in relationship with due process – the right to contest how the profiling systems are categorizing and deciding about us.

Litwak's Interstate Compact Law continues to throw bright light on all facets of compact law as it compares and contrasts compact law with other intergovernmental agreements. This new edition, the Fourth, includes a new chapter on compacts with international participation. Covering materials through Spring 2020, the book includes all the cases, both historical and recent, that are vital to understanding the ways that states cooperate through interstate compacts. The cases have been edited to focus on the compact at issue, in addition to core legal principles. Notes and questions present related materials, supporting and contrary examples, and inviting discussion points. Examining how and why States cooperate, Litwak takes students through the interwoven constitutional, contractual, and administrative law of compacts. Still the only comprehensive book about the law of such agreements, Interstate Compact Law prepares lawyers to apply compact law principles to any manner of intergovernmental cooperation, including states' agreements with foreign governments.
