assumes consumers optimize their consumption intertemporally based exclusively on their permanent or lifetime income, Wagenknecht proposes a rule of thumb, according to which consumers will save if their current income exceeds basic expenditure, while they will demand credit when income can no longer meet basic needs.

Introducing Shakespeare - Nick Groom 2014-12-01

Shakespeare's absolute pre-eminence is simply unparalleled. His plays pack theatres and provide Hollywood with block-buster scripts; his works inspire mountains of scholarship and criticism every year. He has given us many of the very words we speak, and even some of the thoughts we think. Nick Groom and Piero explore how Shakespeare became so famous and influential, and why he is still widely considered the greatest writer ever. They investigate how the Bard has been worshiped at different times and in different places, used and abused to cultural and political ends, and the roots of intense controversies which have surrounded his work. Much more than a biography or a guide to his plays and sonnets, *Introducing Shakespeare* is a tour through the world of Will and concludes that even after centuries, Shakespeare remains the battlefield on which our very comprehension of humanity is being fought out.

Public Purpose - Mariana Mazzucato 2021-10-26

How governments can spur growth and innovation to solve their greatest challenges—from green energy to national security to building resilient health systems. Known around the world for challenging mainstream economics, economist Mariana Mazzucato believes that “the public sector can and should be a co-creator of wealth that actively steers growth to meet its goals” (The Financial Times). In *The Mission-Driven Economy*, she calls on governments to create the economies we need today. Mazzucato's challenge leads off a debate on the revival of industrial policy—roughly defined as deliberate government action to re(shape) the economy. Industrial policy has fallen out of favor in recent decades as economists defer to free markets to produce innovation and growth. Yet today thinkers across the political spectrum have begun expressing new interest in industrial policy as a way to address the most serious problems of our times: from national security and climate change, to the market's underfunding of public goods, to sluggish economic growth and labor market dysfunction. Together, contributors make a compelling case for industrial policy—what it is, and why we need it now. Addressing investment, innovation, supply chains, and growth, they offer a robust vision of a renewed industrial policy, and what it can offer the US economy in the face of climate change and a global pandemic.

Prosperity Without Greed - Sahra Wagenknecht 2017-05-11

It is time to leave capitalism behind. We live in a system of economic feudalism that has nothing to do with a free market economy. The innovations we need for the solution of our truly important problems are not forthcoming. How can it be that technological developments financed by the taxpayer end up enriching private companies even if their activities violate public interests? We should reward talent and real performance and promote start-ups with good ideas. Based on a clear analysis and concrete proposals, Sahra Wagenknecht launches a discussion on new forms of ownership and sketches the outlines of an innovative and just economy.

Featuring insights and in-depth case studies from leading researchers and university decision makers from around the world, this book argues that institutions of higher education, in order to be successful, have to actively reflect on circumstances, visions, and strategies to master the future. Drawing from their experiences across a diverse array of institutions in Europe, Asia, and the Americas, the authors explore the pressures on today's universities and the opportunities for excelling in the contest for resources. They discuss operational issues, such as strategic management, IT governance, leadership development, and entrepreneurial culture, and broader concerns, such as the roles and responsibilities of universities in promoting technology transfer and economic and social development. The result is a resource that not only reveals and analyzes universities from an organizational perspective, but presents best practice models and concrete inspiration for management and policymaking.

The Loop Approach - Sebastian Klein 2020-05

How best to adapt established companies to a rapidly changing economy has long been a topic of debate in both the corporate and academic worlds. This challenge is especially pressing for large organizations that may have grown top-heavy and rigid with time but now need to be light on their feet to stay relevant and profitable. Until now, the best attempts have consisted of plucking tools and methods from the world of start-ups and applying them wholesale in large corporate environments. Most of these efforts have either fizzled or failed outright because they lacked a framework for a comprehensive corporation-sized rollout. The Loop Approach introduces a new series of methods that could help change the course of operations for even the most colossal organizations. Sebastian Klein and Ben Hughes provide a wide-ranging set of guidelines for achieving corporate agility, complete with checklists and worksheets that should prove instantly applicable. Want proof? The methods outlined in *The Loop Approach* have already been successfully implemented at such European corporate giants as Audi, Deutsche Bahn, and Telekom.

Digital Selling - Nicolai Barth 2017-03-02

SAP Nation - Deal Architect 2014-12-05

From its humble beginnings in Germany, SAP skyrocketed to become a global powerhouse and the technology backbone for tens of thousands of enterprises. The economy around it grew even faster, and "SAP Nation" now approaches the GDP of Ireland in size. This book documents both trajectories, based on decades of research and interviews of hundreds of customers, market analysts and competitors. SAP's influence has declined in the last decade, as enterprises invest in cloud, social, analytical and mobile technologies and in custom development of "systems of advantage" in their products, channels and business models. Yet, shockingly, customer spending in SAP Nation remains stubbornly high. The model in the book estimates post-recession investment at more than one trillion dollars (yes). This book brings out loudly the voice of SAP customers as they cope with this runaway economy. Twenty-five case studies showcase a spectrum of strategies - some are "ring fencing" SAP with Workday, others are switching maintenance to Rimini Street, yet others are in-sourcing, while still others are evaluating newer SAP products like HANA and acquisitions like Concur. Part root cause analysis and part strategy manual, this book is a must-read for anyone with interest in SAP - as customer, employee, partner, investor or competitor. It is a fast-paced look at decades of what SAP has done well, and what it could have done better. Executives everywhere, even those in non-SAP settings, will benefit from the strategies described in the book to migrate inefficient back-office IT dollars to front-office innovation.

GENARO STROBEL (BILINGUAL EDITION) - 2021-01-25

Genaro Strobel creates monumental works on paper using a printing process he developed, which starts with the classic woodcut, but also includes photography, painting, drawing, and collage. The medium of wood becomes the content, as the printing blocks are cut into commercially available types of veneer wood by high-precision lasers working according to computer-generated templates. In this way, the wood grain in the compositions is always visibly imprinted and not simply reproduced. Even the source photographs, such as pictures from an inventor's fair or the Messel pit, shine through in places. With a sense for large-scale compositions, Genaro Strobel always introduces new colors. This publication

compiles a selection of his unique pieces, which are four to ten meters high and seven meters wide and on display at the Kunsthalle Darmstadt. GENARO STROBEL (*1984, Frankfurt am Main) is the current Charlotte Prince Scholar of the Science City Darmstadt. He finished his studies at the Berlin University of the Arts and the Berlin-Weissensee Art Academy in 2014 through the Academy of Visual Arts in Leipzig. He has participated in numerous exhibitions at home and abroad.

The Patient Room - Wolfgang Sunder 2020-10

The patient room is the smallest cell of the hospital organism. Its layout determines the structure of the ward and is therefore a decisive factor for the entire building. Many requirements have to be met. The patient's sense of well-being can be positively influenced by the design: homely materials, an attractive view and sufficient privacy are important objectives. Equally important are the working conditions for the staff, especially short distances and an efficient care routine. Finally, even the risk of infection can be reduced by a conscientiously planned room layout. This publication provides a systematic overview of the design task patient room and shows exemplary solutions: both typologically and in selected case studies.

The History of Media and Communication Research - David W. Park 2008

«Strictly speaking», James Carey wrote, «there is no history of mass communication research.» This volume is a long-overdue response to Carey's comment about the field's ignorance of its own past. The collection includes essays of historiographical self-scrutiny, as well as new histories that trace the field's institutional evolution and cross-pollination with other academic disciplines. The volume treats the remembered past of mass communication research as crucial terrain where boundaries are marked off and futures plotted. The collection, intended for scholars and advanced graduate students, is an essential compass for the field.
