Just Business: Multinational Corporations and Human Rights (Norton Global Ethics Series) - John Gerard Ruggie 2013-03-25

"A true master class in the art of making the impossible possible." —Paul Polman One of the most vexing human rights issues of our time has been how to protect the rights of individuals and communities worldwide in an age of globalization and multinational business. Indeed, from Indonesian sweatshops to oil-based violence in Nigeria, the challenges of regulating harmful corporate practices in some of the world's most difficult regions long seemed insurmountable. Human rights groups and businesses were locked in a stalemate, unable to find common ground. In 2005, the United Nations appointed John Gerard Ruggie to the modest task of clarifying the main issues. Six years later, he had accomplished much more than that. Ruggie had developed his now-famous "Guiding Principles on Business and Human Rights," which provided a road map for ensuring responsible global corporate practices. The principles were unanimously endorsed by the UN and embraced and implemented by other international bodies,

businesses, governments, workers' organizations, and human rights groups, keying a revolution in corporate social responsibility. *Just Business* tells the powerful story of how these landmark "Ruggie Rules" came to exist. Ruggie demonstrates how, to solve a seemingly unsolvable problem, he had to abandon many widespread and long-held understandings about the relationships between businesses, governments, rights, and law, and develop fresh ways of viewing the issues. He also takes us through the journey of assembling the right type of team, of witnessing the severity of the problem firsthand, and of pressing through the many obstacles such a daunting endeavor faced. *Just Business* is an illuminating inside look at one of the most important human rights developments of recent times. It is also an invaluable book for anyone wanting to learn how to navigate the tricky processes of global problem-solving and consensus-building and how to tackle big issues with ambition, pragmatism, perseverance, and creativity.

The Third Industrial Revolution in Global Business - Giovanni Dosi 2013-04-29

Has digital technology, the authors ask, led to structural changes and greater efficiency and innovation? The Fourth Industrial Revolution - Klaus Schwab 2017-01-03
World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross

them. We all have the opportunity to contribute to developing new frameworks that advance progress.
