Gardens of the Roman Empire - Wilhelmina F. Jashemski 2017-12-28

In *Gardens of the Roman Empire*, the pioneering archaeologist Wilhelmina F. Jashemski sets out to examine the role of ancient Roman gardens in daily life throughout the empire. This study, therefore, includes for the first time, archaeological, literary, and artistic evidence about ancient Roman gardens across the entire Roman Empire from Britain to Arabia. Through well-illustrated essays by leading scholars in the field, various types of gardens are examined, from how Romans actually created their gardens to the experience of gardens as revealed in literature and art. Demonstrating the central role and value of gardens in Roman civilization, Jashemski and a distinguished, international team of contributors have created a landmark reference work that will serve as the foundation for future scholarship on this topic. An accompanying digital catalogue will be made available at: www.gardensoftheromanempire.org.

Cather Studies, Volume 10 - Cather Cather Studies 2015-08

Willa Cather and the Nineteenth Century explores, with textual specificity and historical alertness, the question of how the cultures of the nineteenth century--the cultures that shaped Willa Cather's childhood, animated her education, supplied her artistic models, generated her inordinate ambitions, and gave embodiment to many of her deeply held values--are addressed in her fiction. In two related sets of essays, seven contributors track within Cather's life or writing the particular cultural formations, emotions, and conflicts of value she absorbed from the atmosphere of her distinct historical moment; their ten colleagues offer a compelling set of case studies that articulate the manifold ways that Cather learned from, built upon, or resisted models provided by particular nineteenth-century writers, works, or artistic genres. Taken together with its *Cather Studies* predecessor, *Willa Cather and Modern Cultures*, this volume reveals Cather as explorer and interpreter, sufferer and master of the transition from a Victorian to a Modernist America.

Archaeoastronomy in the Roman World - Giulio Magli 2019-03-27

This book explores the insights that Cultural Astronomy provides into the classical Roman world by unveiling the ways in which the Romans made use of their knowledge concerning the heavens, and by shedding new light on the interactions between astronomy and heritage in ancient Roman culture. Leading experts in the field present fascinating information on how and why the Romans referred to the sky when deciding upon the orientation of particular monuments, temples, tombs and even urban layouts. Attention is also devoted to questions of broader interest, such as the contribution that religious interpretation of the sky made in the assimilation of conquered peoples. When one considers astronomy in the Roman world it is customary to think of the work and models of Ptolemy, and perhaps the Julian calendar or even the sighting of the Star of Bethlehem. However, like many other peoples in antiquity, the Romans interacted with the heavens in deeper ways that exerted a profound influence on their culture. This book highlights the need to take this complexity into account in various areas of research and will appeal to all those who wish to learn more about the application of astronomy in the lives and architecture of the Romans.

Four Lost Cities: A Secret History of the Urban Age - Annalee Newitz 2021-02-02

Named a Best Book of the Year by NPR and Science Friday A quest to explore some of the most spectacular ancient cities in human history—and figure out why people abandoned them. In *Four Lost Cities*, acclaimed science journalist Annalee Newitz takes readers on an entertaining and mind-bending adventure into the deep history of urban life. Investigating across the centuries and around the world, Newitz explores the rise and fall of four ancient cities, each the center of a sophisticated civilization: the Neolithic site of Çatalhöyük in Central Turkey, the Roman vacation town of Pompeii on Italy's southern coast, the medieval megacity of Angkor in Cambodia, and the indigenous metropolis Cahokia, which stood beside the Mississippi River where East St. Louis is today. Newitz travels to all four sites and investigates the cutting-edge research in archaeology, revealing the mix of environmental changes and political turmoil that doomed these ancient settlements. Tracing the early development of urban planning, Newitz also introduces us to the often anonymous workers—slaves, women, immigrants, and manual laborers—who built these cities and created monuments that lasted millennia. *Four Lost Cities* is a journey into the forgotten past, but, foreseeing a future in which the majority of people on Earth will be living in cities, it may also reveal something of our own fate.

Multisensory Living in Ancient Rome - Hannah Platts 2019-11-28

Classicists have long wondered what everyday life was like in ancient Greece and Rome. How, for example, did the slaves, visitors, inhabitants or owners experience the same home differently? And how did owners manipulate the spaces of their homes to demonstrate control or social hierarchy? To answer these questions, Hannah Platts draws on a diverse range of evidence and an innovative amalgamation of methodological approaches to explore multisensory experience – auditory, olfactory, tactile, gustatory and visual – in domestic environments in Rome, Pompeii and Herculaneum for the first time, from the first century BCE to the second century CE. Moving between social registers and locations, from non-elite urban dwellings to lavish country villas, each chapter takes the reader through a different type of room and offers insights into the reasons, emotions and cultural factors behind perception, recording and control of bodily senses in the home, as well as their sociological implications. *Multisensory Living in Ancient Rome* will appeal to all students and researchers interested in Roman daily life and domestic architecture.

Rome's Third Samnite War, 298–290 BC - Mike Roberts 2020-03-30

A compelling account of alliances, animosities, and ancient warfare in central Italy. The Third Samnite War was a crucial episode in the early history of Rome. Upon its outcome rested mastery of central Italy, and the independent survival of both Rome and the Samnites. Determined to resist aggressive Roman expansion, the Samnites forged a powerful alliance with the Senones (a tribe of Italian Gauls), Etruscans, and Umbrians. The result was eight years of hard campaigning, brutal sieges, and bitter battles that stretched Rome to the limit. The desperate nature of the struggle is illustrated by the ritual self-sacrifice (*devotio*) by the Roman consul Publius Decimus Mus at the Battle of Sentinum (295 BC), which restored the resolve of the wavering Roman troops, and by the Samnite Linen Legion at the Battle of Aquilonia (393 BC), each man of which was bound by a sacred oath to conquer or die on the battlefield. Mike Roberts, who has travelled the Italian landscape upon which these events played out, mines the sources—which are more reliable, he argues, than for Rome's previous wars—to produce a compelling narrative of this momentous conflict.

The Roman Retail Revolution - Steven J. R. Ellis 2018-03-22

Tabernae were ubiquitous in all Roman cities, lining the busiest streets and dominating their most crowded intersections in numbers far exceeding those of any other form of building. That they played a vital role in the operation of the city, and indeed in the very definition of urbanization in ancient Rome, is a point too often under-appreciated in Roman studies, and one which bears fruitful further exploration. The Roman Retail

Revolution offers a thorough investigation into the social and economic worlds of the Roman shop, focusing on food and drink outlets in particular. Combining critical analysis of both archaeological material and textual sources, it challenges many of the conventional ideas about the place of retailing in the Roman city and unravels the historical development of tabernae to identify three major waves or revolutions in the shaping of retail landscapes. The volume is underpinned by two new and important bodies of evidence: the first generated from the University of Cincinnati's recent archaeological excavations into a Pompeian neighborhood of close to twenty shop-fronts, and the second resulting from a field-survey of the retail landscapes of more than a hundred cities from across the Roman world. The richness of this information, combined with the volume's interdisciplinary approach to the lives of the Roman sub-elite, results in a refreshingly original look at the history of retailing and urbanism in the Roman world.

Pompeii and Herculaneum - Alison E. Cooley 2013-10-01

The original edition of Pompeii: A Sourcebook was a crucial resource for students of the site. Now updated to include material from Herculaneum, the neighbouring town also buried in the eruption of Vesuvius, Pompeii and Herculaneum: A Sourcebook allows readers to form a richer and more diverse picture of urban life on the Bay of Naples. Focusing upon inscriptions and ancient texts, it translates and sets into context a representative sample of the huge range of source material uncovered in these towns. From the labels on wine jars to scribbled insults, and from advertisements for gladiatorial contests to love poetry, the individual chapters explore the early history of Pompeii and Herculaneum, their destruction, leisure pursuits, politics, commerce, religion, the family and society. Information about Pompeii and Herculaneum from authors based in Rome is included, but the great majority of sources come from the cities themselves, written by their ordinary inhabitants – men and women, citizens and slaves. Incorporating the latest research and finds from the two cities and enhanced with more photographs, maps, and plans, Pompeii and Herculaneum: A Sourcebook offers an invaluable resource for anyone studying or visiting the sites.

Un-Roman Sex - Tatiana Ivleva 2020-05-18

Un-Roman Sex explores how gender and sex were perceived and represented outside the Mediterranean core of the Roman Empire. The volume critically explores the gender constructs and sexual behaviours in the provinces and frontiers in light of recent studies of Roman erotic experience and flux gender identities. At its core, it challenges the unproblematised extension of the traditional Romano-Hellenistic model to the provinces and frontiers. Did sexual relations and gender identities undergo processes of "provincialisation" or

"barbarisation" similar to other well-known aspects of cultural negotiation and syncretism in provincial and border regions, for example in art and religion? The 11 chapters that make up the volume explore these issues from a variety of angles, providing a balanced and rounded view through use of literary, epigraphic, and archaeological evidence. Accordingly, the contributions represent new and emerging ideas on the subject of sex, gender, and sexuality in the Roman provinces. As such, *Un-Roman Sex* will be of interest to higher-level undergraduates and graduates/academics studying the Roman empire, gender, and sexuality in the ancient world and at the Roman frontiers.

Poverty in Ancient Greece and Rome - Filippo Carlà-Uhink 2022-09-02

This volume presents an innovative picture of the ancient Mediterranean world. Approaching poverty as a multifaceted condition, it examines how different groups were affected by the lack of access to symbolic, cultural and social – as well as economic – capital. Collecting a wide range of studies by an international team of experts, it presents a diverse and complex analysis of life in antiquity, from the archaic to the late antique period. The sections on Greece, Rome, and Late Antiquity offer in-depth studies of ancient life, integrating analysis of socio-economic dynamics and cultural and discursive strategies that shaped this crucial element of ancient (and modern) societies. Themes like social cohesion and control, exclusion, gender, agency, and identity are explored through the combination of archaeological, epigraphic, and literary evidence, presenting a rich panorama of Greco-Roman societies and a stimulating collection of new approaches and methodologies for their understanding. The book offers a comprehensive view of the ancient world, analysing different social groups – from wealthy elites to poor peasants and the destitute – and their interactions, in contexts as diverse as Classical Athens and Sparta, imperial Rome, and the late antique towns of Egypt and North Africa. *Poverty in Ancient Greece and Rome: Discourses and Realities* is a valuable resource for students and scholars of ancient history, classical literature, and archaeology. In addition, topics covered in the book are of interest to social scientists, scholars of religion, and historians working on poverty and social history in other periods.

The Roman Street - Jeremy Hartnett 2017-05-09

Every day Roman urbanites took to the street for myriad tasks, from hawking vegetables and worshipping local deities to simply loitering and socializing. Hartnett takes readers into this thicket of activity as he repopulates Roman streets with their full range of sensations, participants, and events that stretched far beyond simple movement. As everyone from slave to senator met in this communal space, city dwellers found unparalleled opportunities for self-aggrandizing display and the negotiation of social and political tensions. Hartnett charts how Romans preened and paraded in the street, and how they exploited the street's collective space to lob insults and respond to personal rebukes. Combining textual evidence, comparative historical material, and contemporary urban theory with architectural and art historical analysis, *The Roman Street* offers a social and cultural history of urban spaces that restores them to their rightful place as primary venues for social performance in the ancient world.
